All non-listed subcontractors and lower tier sub-subcontractors shall be registered prior to starting work on the project. It is the general contractor's responsibility that all non-listed sub-contractors at any tier have their certificate prior to starting work on the job.

Under the law a "contractor" is "a person, partnership, association, joint stock company, trust, corporation or other legal business entity or successor thereof who enters into a contract" which is subject to the provisions of the New Jersey Prevailing Wage Act [N.J.S.A. 34:11-56.25, et seq.] It applies to contractors based in New Jersey or in another state.

The law defines "public works projects" as contracts for "public work" as defined in the Prevailing Wage statute [N.J.S.A. 34:11-56.26(5)]. The term means:

- "Construction, reconstruction, demolition, alteration, or repair work, or maintenance work, including painting and decorating, done under contract and paid for in whole or in

part out of the funds of a public body, except work performed under a rehabilitation program.

- "Public work" shall also mean construction, reconstruction, demolition, alteration, or repair work, done on any property or premises, whether or not the work is paid for from public funds..."
- "Maintenance work" means the repair of existing facilities when the size, type or extent of such facilities is not thereby changed or increased. While "maintenance" includes painting and decorating and is covered under the law, it does not include work such as routine landscape maintenance or janitorial services.

To register, a contractor must provide the State Department of Labor with a full and accurately completed application form. The form is available online at [www.state.nj.us/labor/lssc/lspubcon.html](http://www.state.nj.us/labor/lssc/lspubcon.html).

N.J.S.A. 34:11-56.55 specifically prohibits accepting applications for registration as a substitute for a certificate of registration.

Note: Executive Order (EO) 13706, Establishing Paid Sick Leave for Federal Contractors applies to all contracts subject to the Davis-Bacon Act for which the contract is awarded (and any solicitation was issued) on or after January 1, 2017. If this contract is covered by the EO, the contractor must provide employees with 1 hour of paid sick leave for every 30 hours they work, up to 56 hours of paid sick leave each year. Employees must be permitted to use paid sick leave for their own illness, injury or other health-related needs, including preventive care; to assist a family member (or person who is like family to the employee) who is ill, injured, or has other health-related needs, including preventive care; or for reasons resulting from, or to assist a family member (or person who is like family to the employee) who is a victim of, domestic violence, sexual assault, or stalking. Additional information on contractor requirements and worker protections under the EO is available at <https://www.dol.gov/agencies/whd/government-contracts>.

Unlisted classifications needed for work not included within the scope of the classifications listed may be added after award only as provided in the labor standards contract clauses (29CFR 5.5 (a) (1) (iii)).

-----  
The body of each wage determination lists the classification and wage rates that have been found to be prevailing for the cited type(s) of construction in the area covered by the wage determination. The classifications are listed in alphabetical order of ""identifiers"" that indicate whether the particular rate is a union rate (current union negotiated rate for local), a survey rate (weighted average rate) or a union average rate (weighted union average rate).

Union Rate Identifiers

A four letter classification abbreviation identifier enclosed in dotted lines beginning with characters other than ""SU"" or ""UAVG"" denotes that the union classification and rate were prevailing for that classification in the survey. Example: PLUM0198-005 07/01/2014. PLUM is an abbreviation identifier of the union which prevailed in the survey for this classification, which in this example would be Plumbers. 0198 indicates the local union number or district council number where applicable, i.e., Plumbers Local 0198. The next number, 005 in the example, is an internal number used in processing the wage determination. 07/01/2014 is the effective date of the most current negotiated rate, which in this example is July 1,

2014.

Union prevailing wage rates are updated to reflect all rate changes in the collective bargaining agreement (CBA) governing this classification and rate.

#### Survey Rate Identifiers

Classifications listed under the ""SU"" identifier indicate that no one rate prevailed for this classification in the survey and the published rate is derived by computing a weighted average rate based on all the rates reported in the survey for that classification. As this weighted average rate includes all rates reported in the survey, it may include both union and non-union rates. Example: SULA2012-007 5/13/2014. SU indicates the rates are survey rates based on a weighted average calculation of rates and are not majority rates. LA indicates the State of Louisiana. 2012 is the year of survey on which these classifications and rates are based. The next number, 007 in the example, is an internal number used in producing the wage determination. 5/13/2014 indicates the survey completion date for the classifications and rates under that identifier.

Survey wage rates are not updated and remain in effect until a new survey is conducted.

#### Union Average Rate Identifiers

Classification(s) listed under the UAVG identifier indicate that no single majority rate prevailed for those classifications; however, 100% of the data reported for the classifications was union data. EXAMPLE: UAVG-OH-0010 08/29/2014. UAVG indicates that the rate is a weighted union average rate. OH indicates the state. The next number, 0010 in the example, is an internal number used in producing the wage determination. 08/29/2014 indicates the survey completion date for the classifications and rates under that identifier.

A UAVG rate will be updated once a year, usually in January of each year, to reflect a weighted average of the current negotiated/CBA rate of the union locals from which the rate is based.

#### State Adopted Rate Identifiers

Classifications listed under the ""SA"" identifier indicate that the prevailing wage rate set by a state (or local) government was adopted under 29 C.F.R. 1.3(g)-(h). Example: SAME2023-007 01/03/2024. SA reflects that the rates are state adopted. ME refers to the State of Maine. 2023 is the year during which the state completed the survey on which the listed classifications and rates are based. The next number, 007 in the example, is an internal number used in producing the wage determination. 01/03/2024 reflects the date on which the classifications and rates under the ?SA? identifier took effect under state law in the state from which the rates were adopted.

#### WAGE DETERMINATION APPEALS PROCESS

1.) Has there been an initial decision in the matter? This can be:

\* an existing published wage determination

- \* a survey underlying a wage determination
- \* a Wage and Hour Division letter setting forth a position on a wage determination matter
- \* a conformance (additional classification and rate) ruling

On survey related matters, initial contact, including requests for summaries of surveys, should be with the Wage and Hour National Office because National Office has responsibility for the Davis-Bacon survey program. If the response from this initial contact is not satisfactory, then the process described in 2.) and 3.) should be followed.

With regard to any other matter not yet ripe for the formal process described here, initial contact should be with the Branch of Construction Wage Determinations. Write to:

Branch of Construction Wage Determinations  
Wage and Hour Division  
U.S. Department of Labor  
200 Constitution Avenue, N.W.  
Washington, DC 20210

2.) If the answer to the question in 1.) is yes, then an interested party (those affected by the action) can request review and reconsideration from the Wage and Hour Administrator (See 29 CFR Part 1.8 and 29 CFR Part 7). Write to:

Wage and Hour Administrator  
U.S. Department of Labor  
200 Constitution Avenue, N.W.  
Washington, DC 20210

The request should be accompanied by a full statement of the interested party's position and by any information (wage payment data, project description, area practice material, etc.) that the requestor considers relevant to the issue.

3.) If the decision of the Administrator is not favorable, an interested party may appeal directly to the Administrative Review Board (formerly the Wage Appeals Board). Write to:

Administrative Review Board  
U.S. Department of Labor  
200 Constitution Avenue, N.W.  
Washington, DC 20210

4.) All decisions by the Administrative Review Board are final.

END OF GENERAL DECISION"

# Prevailing Wage Rates

STATE OF NEW JERSEY  
Department of Labor and Workforce Development  
Division of Wage and Hour Compliance - Public Contracts Section  
PO Box 389  
Trenton, NJ 08625-0389

**PREVAILING WAGE RATE DETERMINATION**

The New Jersey Prevailing Wage Act (N.J.S.A. 34:11-56.25 et seq.) requires that the Department of Labor and Workforce Development establish and enforce a prevailing wage level for workers engaged in public works in order to safeguard their efficiency and general well being and to protect them as well as their employers from the effects of serious and unfair competition.

Prevailing wage rates are wage and fringe benefit rates based on the collective bargaining agreements established for a particular craft or trade in the locality in which the public work is performed. In New Jersey, these rates vary by county and by the type of work performed.

Applicable prevailing wage rates are those wages and fringe benefits in effect on the date the contract is awarded. All pre-determined rate increases listed at the time the contract is awarded must also be paid, beginning on the dates specified. Rates that have expired will remain in effect until new rates are posted.

**Prevailing Wage Rate**

The prevailing wage rate for each craft will list the effective date of the rate and the following information:

**W** = Wage Rate per Hour                      **B** = Fringe Benefit Rate per Hour\*                      **T** = Total Rate per Hour

\* Fringe benefits are an integral part of the prevailing wage rate. Employers not providing such benefits must pay the fringe benefit amount directly to the employee each payday. Employers providing benefits worth less than the fringe benefit amount must pay the balance directly to the employee each payday.

Unless otherwise stated in the Prevailing Wage Rate Determination, the fringe benefit rate for overtime hours remains at the straight time rate.

When the Overtime Notes in the Prevailing Wage Rate Determination state that the overtime rates are "inclusive of benefits," the benefit rate is increased by the same factor as the wage rate (i.e. multiplied by 1.5 for time and one-half, multiplied by 2 for double time, etc.).

**Apprentice Rate Schedule**

An "apprentice" is an individual who is registered with the United States Department of Labor - Office of Apprenticeship and enrolled in a certified apprenticeship program during the period in which they are working on the public works project.

The apprentice wage rate is a percentage of the journeyman wage rate, unless otherwise indicated. The apprentice benefit rate is the full journeyman benefit rate, unless otherwise indicated.

If there is no apprentice rate schedule listed, the individual must be paid at least the journeyman rate even if that individual is in a certified apprentice program for that trade.

If there is no ratio of apprentices to journeymen listed for a particular craft, then the ratio shall be one (1) apprentice to every four (4) journeymen.

## Comments/Notes

For each craft listed there will be comments/notes that cover the definition of the regular workday, shift differentials, overtime, recognized holidays, and any other relevant information.

## Public Works Contractor Registration

The Public Works Contractor Registration Act (N.J.S.A. 34:11-56.48, et seq.) requires that **all** contractors, subcontractors, or lower tier subcontractors who are working on or who bid on public works projects register with the Department of Labor and Workforce Development. Applications are available at [www.nj.gov/labor](http://www.nj.gov/labor) (click on Wage & Hour and then go to Registration & Permits).

Pursuant to N.J.S.A. 34:11-56.51:

*No contractor shall bid on any contract for public work as defined in section 2 of P.L.1963, c. 150 (C.34:11-56.26) unless the contractor is registered pursuant to this act. No contractor shall list a subcontractor in a bid proposal for the contract unless the subcontractor is registered pursuant to P.L.1999, c.238 (C.34:11-56.48 et seq.) at the time the bid is made. No contractor or subcontractor, including a subcontractor not listed in the bid proposal, shall engage in the performance of any public work subject to the contract, unless the contractor or subcontractor is registered pursuant to that act.*

## Snow Plowing

Snow plowing contracts are not subject to the New Jersey Prevailing Wage Act or the Public Works Contractor Registration Act.

**CONSTRUCTION CONTRACTS**

During the performance of this contract, the contractor agrees as follows:

The contractor or subcontractor, where applicable, will not discriminate against any employee or applicant for employment because of age, race, creed, color, national origin, ancestry, marital status, affectional or sexual orientation, gender identity or expression, disability, nationality or sex. Except with respect to affectional or sexual orientation and gender identity or expression, the contractor will take affirmative action to ensure that such applicants are recruited and employed, and that employees are treated during employment, without regard to their age, race, creed, color, national origin, ancestry, marital status, affectional or sexual orientation, gender identity or expression, disability, nationality or sex. Such action shall include, but not be limited to the following: employment, up-grading, demotion, or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided by the Public Agency Compliance Officer setting forth provisions of this nondiscrimination clause.

The contractor or subcontractor, where applicable will, in all solicitations or advertisements for employees placed by or on behalf of the contractor, state that all qualified applicants will receive consideration for employment without regard to age, race, creed, color, national origin, ancestry, marital status, affectional or sexual orientation, gender identity or expression, disability, nationality or sex.

The contractor or subcontractor, where applicable, will send to each labor union or representative of workers with which it has a collective bargaining agreement or other contract or understanding, a notice, to be provided by the agency contracting officer advising the labor union or workers' representative of the contractor's commitments under this act and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

The contractor or subcontractor, where applicable, agrees to comply with any regulations promulgated by the Treasurer, pursuant to N.J.S.A. 10:5-31 et seq., as amended and supplemented from time to time and the Americans with Disabilities Act.

When hiring or scheduling workers in each construction trade, the contractor or subcontractor agrees to make good faith efforts to employ minority and women workers in each construction trade consistent with the applicable employment goal prescribed by N.J.A.C. 17:27-7.3; provided, however, that the Division may, in its discretion, exempt a contractor or subcontractor from compliance with the good faith procedures prescribed by the following provisions, A, B and C, as long as the Division is satisfied that the contractor or subcontractor is employing workers provided by a union which provides evidence, in accordance with standards prescribed by the Division, that its percentage of active "card carrying" members who are minority and women workers is equal to or greater than the applicable employment goal established in accordance with N.J.A.C. 17:27-7.3. The contractor or subcontractor agrees that a good faith effort shall include compliance with the following procedures:

- (A) If the contractor or subcontractor has a referral agreement or arrangement with a union for a construction trade, the contractor or subcontractor shall, within three business days of the contract award, seek assurances from the union that it will cooperate with the contractor or subcontractor as it fulfills its affirmative action obligations under this contract and in accordance with the rules promulgated by the Treasurer pursuant to N.J.S.A. 10:5-31 et. seq., as supplemented and amended

**MANDATORY EQUAL EMPLOYMENT OPPORTUNITY LANGUAGE**

from time to time and the Americans with Disabilities Act. If the contractor or subcontractor is unable to obtain said assurances from the construction trade union at least five business days prior to the commencement of construction work, the contractor or subcontractor agrees to attempt to hire or schedule minority and women workers directly, consistent with the applicable employment goal. If the contractor's or subcontractor's prior experience with a construction trade union, regardless of whether the union has provided said assurances, indicates a significant possibility that the trade union will not refer sufficient minority and women workers consistent with the applicable employment goal, the contractor or subcontractor agrees to be prepared to hire or schedule minority and women workers directly, consistent with the applicable employment goal, by complying with the hiring or scheduling procedures prescribed under (B) below; and the contractor or subcontractor further agrees to take said action immediately if it determines or is so notified by the Division that the union is not referring minority and women workers consistent with the applicable employment goal.

(B) If the hiring or scheduling of a workforce consistent with the employment goal has not or cannot be achieved for each construction trade by adhering to the procedures of (A) above, or if the contractor does not have a referral agreement or arrangement with a union for a construction trade, the contractor or subcontractor agrees to take the following actions consistent with the applicable county employment goals:

- 1) To notify the public agency compliance officer, the Division, and minority and women referral organizations listed by the Division pursuant to N.J.A.C. 17:27-5.3, of its workforce needs, and request referral of minority and women workers;
- 2) To notify any minority and women workers who have been listed with it as awaiting available vacancies;
- 3) Prior to commencement of work, to request that the local construction trade union refer minority and women workers to fill job openings, provided the contractor or subcontractor has a referral agreement or arrangement with a union for the construction trade;
- 4) To leave standing requests for additional referral to minority and women workers with the local construction trade union, provided the contractor or subcontractor has a referral agreement or arrangement with a union for the construction trade, the State Training and Employment Service and other approved referral sources in the area until such time as the workforce is consistent with the employment goal;
- 5) If it is necessary to lay off some of the workers in a given trade on the construction site, to assure, consistent with the applicable State and Federal statutes and court decisions, that sufficient minority and women employees remain on the site consistent with the employment goal; and to employ any minority and women workers laid off by the contractor on any other construction site on which its workforce composition is not consistent with an employment goal established pursuant to rules implementing N.J.S.A. 10:5-31 et. seq.;
- 6) To adhere to the following procedure when minority and women workers apply or are referred to the contractor or subcontractor:
  - (i) If said individuals have never previously received any document or certification signifying a level of qualification lower than that required in order to perform the work of the construction trade, the contractor or subcontractor shall determine the qualifications of such individuals and if the contractor's or subcontractor's workforce in each construction trade is

**MANDATORY EQUAL EMPLOYMENT OPPORTUNITY LANGUAGE**

not consistent with the applicable employment goal, it shall hire or schedule those individuals who satisfy appropriate qualification standards. However, a contractor or subcontractor shall determine that the individual at least possesses the requisite skills, and experience recognized by a union, apprentice program or a referral agency, provided the referral agency is acceptable to the Division. If necessary, the contractor or subcontractor shall hire or schedule minority and women workers who qualify as trainees pursuant to these rules. All of the requirements, however, are limited by the provisions of (C) below.

- (ii) If the contractor's or subcontractor's workforce is consistent with the applicable employment goal, the name of any interested women or minority individual shall be maintained on a waiting list for the first consideration, in the event the contractor's or subcontractor's workforce is no longer consistent with the applicable employment goal.
- (iii) If, for any reason, said contractor or subcontractor determines that a minority individual or a woman is not qualified or if the individual qualifies as an advanced trainee or apprentice, the contractor or subcontractor shall inform the individual in writing of the reasons for the determination, maintain a copy of the determination in its files, and send a copy to the public agency compliance officer and to the Division.

- 7) (7) To keep a complete and accurate record of all requests made for the referral of workers in any trade covered by the contract, on forms made available by the Division and submitted promptly to the Division upon request.

(C) The contractor or subcontractor agrees that nothing contained in (B) above shall preclude the contractor or subcontractor from complying with the union hiring hall or apprenticeship policies in any applicable collective bargaining agreement or union hiring hall arrangement, and, where required by custom or agreement, it shall send journeymen and trainees to the union for referral, or to the apprenticeship program for admission, pursuant to such agreement or arrangement. However, where the practices of a union or apprenticeship program will result in the exclusion of minorities and women or the failure to refer minorities and women consistent with the county employment goal, the contractor or subcontractor shall consider for employment persons referred pursuant to (B) above without regard to such agreement or arrangement; provided further, however, that the contractor or subcontractor shall not be required to employ women and minority advanced trainees and trainees in numbers which result in the employment of advanced trainees and trainees as a percentage of the total workforce for the construction trade, which percentage significantly exceeds the apprentice to journey worker ratio specified in the applicable collective bargaining agreement, or in the absence of a collective bargaining agreement, exceeds the ratio established by practice in the area for said construction trade. Also, the contractor or subcontractor agrees that, in implementing the procedures of (B) above, it shall, where applicable, employ minority and women workers residing within the geographical jurisdiction of the union.

After notification of award, but prior to signing a construction contract, the contractor shall submit to the public agency compliance officer and the Division an initial project workforce report (Form AA 201) provided to the public agency by the Division for distribution to and completion by the contractor, in accordance with N.J.A.C. 17:27-7. The contractor also agrees to submit a copy of the Monthly Project Workforce Report once a month thereafter for the duration of this contract to the Division and to the public agency compliance officer.

**MANDATORY EQUAL EMPLOYMENT OPPORTUNITY LANGUAGE**

The contractor agrees to cooperate with the public agency in the payment of budgeted funds, as is necessary, for on-the-job and/or off-the-job programs for outreach and training of minorities and women.

(D) The contractor and its subcontractors shall furnish such reports or other documents to the Division of Contract Compliance & EEO as may be requested by the Division from time to time in order to carry out the purposes of these regulations, and public agencies shall furnish such information as may be requested by the Division of Contract Compliance & EEO for conducting a compliance investigation pursuant to Subchapter 10 of the Administrative Code (N.J.A.C. 17:27).

In providing any aid, benefit, or service on behalf of the CRA pursuant to this contract, the Contractor agrees that the performance shall be in strict compliance with the Act.

## **PART 1 – PROJECT SCOPE**

### **1.01 PROJECT DESCRIPTION**

- A. All of the Parts and Sections of the Technical Requirements and General Conditions as listed in the Table of Contents, together with all referenced Attachments, constitute the entire Technical Specification and shall be considered as related to each other, and related to the whole, and shall be referred to within the text by the basic designation only.
- B. The term “work” means all the construction and services required by the Technical Specification. The contractor shall perform all the work described in the Technical Specification and provide all necessary labor, materials, and equipment, and perform all services required to complete the work and fulfill the contractor’s obligations.
- C. The Owner of the construction project is the City of Camden Redevelopment Agency (“Owner” or “CRA”), 520 Market Street Suite 1300, Camden City Hall, Camden, New Jersey 08101. Contact: Ms. Olivette Simpson, Interim Executive Director.
- D. The work is to be performed within two rectangular and one triangle-shaped portions of the Elijah Perry Park that measure approximately 6,000-square feet, situated in the southern park area surrounding three sides of a paved basketball court, located at NE Ferry Avenue and Phillip Street (Block 554, Lot 1) in the City of Camden, New Jersey. This area is hereinafter referenced as the Site.
- E. This project includes the remediation of regional historic fill material through excavation, disposal, capping, a deed notice and associated Remedial Action Permit (RAP) for soils, as well as the removal and replacement of five trees at the Site. Elijah Perry Park is identified by the NJDEP as Site Remediation Program Interest Number (SRPID) 93464 and the LSR (Licensed State Remediation) Activity number for this scope of work is 240001. The Licensed Site Remediation Professional (LSRP) of record is Michael P. McGowan (LSRP ID #783617).
- F. See the Plan Set and maps in the Attachments for construction details and locations.
- G. The work consists of the following items, described in **Part 2: Technical Requirements**:
  - 1. Soil Erosion & Sediment Control (SESC) Plan.
  - 2. Excavation and Disposal of regional historic fill material.
  - 3. Site Restoration.
  - 4. Project Record (As-Built) Drawings.
- H. Additional requirements for the work are described in **Part 3: General Conditions**. The General Conditions will not be measured for payment, and all costs connected, related, or corresponding to the work specified in Part 3 shall be included in the contract lump sum price for the Bid Item titled “General Conditions.”

### **1.02 GENERAL EXECUTION REQUIREMENTS**

- A. The contractor shall supervise and direct the work, and shall be solely responsible for, and have control over, construction means, methods, techniques, sequences, and procedures for

coordinating all portions of the work under the contract. The contractor shall be responsible to the Owner for acts and omissions of the contractor's employees, subcontractors and their agents and employees and other persons or entities performing portions of the work on behalf of the contractor or any of its subcontractors.

- B. All work, whether performed by contractor, or by subcontractors engaged by contractor, shall be completed in a workman-like manner and in compliance with all building codes and applicable laws. To the extent required by law, all work shall be performed by individuals duly licensed and authorized by law to perform said work.

### **1.03 PROJECT ADMINISTRATION**

- A. The CRA will designate a Project Manager (referred to as the "CRA Representative"), who shall have the authority to inspect all work and materials on the project, and to stop work when it appears to the CRA Representative that the requirements of the contract are not being met.
- B. The CRA Representative shall have the authority to reject any work or materials which are not performed in a workmanlike manner, or which do not meet the requirements of the plans and specifications, in the judgment of the CRA Representative. Any such rejected work shall be redone in a workmanlike manner, and any such rejected materials shall be removed from the work site and replaced with acceptable materials, conforming to the requirements of the Specifications.
- C. The CRA Representative shall have the authority to decide questions and make interpretations regarding issues which arise under the contract.
- D. Coordinate with the CRA Representative regarding Requests for Information (RFI) or interpretation seeking information required by or clarifications of the contract documents.
- E. Cooperate with the CRA Representative in allocation of mobilization areas of site for field offices and sheds, for project access, traffic, and parking facilities.
- F. Comply with the CRA Representative's procedures for project communications; submittals, reports and records, schedules, coordination drawings, and recommendations; and resolution of ambiguities and conflicts.
- G. Immediately report to the CRA Representative any questionable or obvious error or omission that may be contained in the contract documents. Do not proceed with work affected by these conditions until the CRA Representative has addressed or resolved the error or omission.
- H. The Contractor will attend one Pre-Construction Meeting to be scheduled by the CRA Representative after Notice of Award.
- I. The Contractor will attend project meetings or conference calls to be scheduled by the CRA Representative throughout the course of the work, as may be required to maintain project progress and schedule.

## **PART 2 – TECHNICAL REQUIREMENTS**

### **2.01 SOIL EROSION & SEDIMENT CONTROL (SESC) PLAN**

- A. The scope of work for the Site should adhere to the existing SESC Plan created in reference to the entire Elijah Perry Park area, prepared by a New Jersey Professional Engineer and certified by the Camden County Soil Conservation District (CCSCD). The contractor shall be responsible for implementing all temporary controls required by the plan during the project, and for removing of all temporary controls and providing to the CRA Representative a CCSCD Report of Compliance at the termination of all site activities.
- B. The SESC Plan has been prepared in conformance with the Standards for Soil Erosion and Sediment Control in New Jersey (7th Edition, January 2014) and the Topsoil and Seed Standard.
- C. The SESC Plan has been prepared in conformance with the submittal requirements of Section 3.14.
- D. The SESC Plan shows all areas to be used on-site for the temporary stockpiling of materials generated from the excavation and demolition activities, protection of catch basins and municipal stormwater sewers, construction entrances, material storage, and sediment barriers.
- E. The SESC Plan includes details for the temporary stockpiling of excavated material including placement on 20-mil polyethylene sheeting with watertight berms and sediment barriers (i.e. straw bales wrapped in plastic, silt fence, or filter socks as determined in the field) to prevent the drainage of soil water to the surrounding surface. Temporary stockpiles must be covered at all times with 20-mil polyethylene sheeting except when drying the soil and there is no chance of the material creating excessive dust or being exposed to rain.
- F. All disturbed areas shall be stabilized with permanent seed. Permanent seed mix is to be applied for final stabilization as per the Topsoil and Seed Standard.
- G. Clean backfill for filling and grading all disturbed areas, and all topsoil used for establishment of sod shall be paid for and brought to the site by the contractor. The clean fill and topsoil shall be certified clean by the provider in accordance with the provisions set forth in the NJDEP Guidance Document “Fill Material Guidance for SRP Sites” (April 2015). The certifications must be provided to and approved by the CRA Representative and LSRP prior to bringing the material on-site. Copies of all bills of lading and certification materials must be provided to the CRA Representative.

### **2.02 EXCAVATION AND DISPOSAL OF CONTAMINATED SOILS**

- A. **Summary.** The contractor will excavate, stockpile, characterize, transport, and dispose of approximately 250 tons of non-hazardous soils, contaminated with several contaminants of concern associated with historic fill material, outlined in the Remedial Action Workplan Addendum (RAWA), prepared by BL Companies dated September 18, 2024. Following completion of the excavation by the contractor and the subsequent collection of post-excavation confirmatory samples by the LSRP, the contractor will backfill the excavation using certified

clean fill (see Section 2.05). (The collection and analysis of the post-excavation samples are not included in the contractor's scope of work).

- B. **Location and quantity.** The excavation area is approximately 6,000 square feet in area and extends to 12" below the existing grade (approx. 222 cubic yards or 250 tons). The approximate location of the contaminated materials to be removed is indicated on the Plan Set in Attachment 2. The actual location of the excavation will be marked out in the field by the CRA Representative or LSRP.
- C. **Site Features in Excavation Areas.** Concrete sidewalk and concrete curbing areas exist along and within the proposed excavation area. Traffic light control features exist in southeast areas of the proposed excavation (associated with traffic control at the intersection of Ferry Avenue and South 9<sup>th</sup> Street) and a paved basketball court with a chain-link fencing exists along boundaries of the proposed excavation area. The concrete sidewalks and curbing, traffic control features, and adjacent chain-link fencing and pavement shall not be excavated or deteriorated during the soil excavation activities. The features should be protected at all times. In the event that damage is incurred to the existing sidewalk or traffic control features, contractor shall be solely responsible for replacement and adherence to existing Site conditions.
- D. **Historical Reports.** A Remedial Action Workplan Addendum, prepared by the LSRP summarizing historic investigations, sampling and analysis of the contaminated soils at the Site was completed in August 2024. Historical analytical results have identified concentrations of Cadmium, Lead, Mercury and Silver in the soil samples collected at the Site in exceedance of their applicable migration to groundwater soil remediation standards (MGWSRS). Additionally, total PCBs were present at concentrations exceeding Residential Ingestion-Dermal Soil Remediation Standards (RIDSRS). Several of these contaminants exceed their respective toxicity characteristic leaching procedure (TCLP) standards. See discussion below for waste characterization and classification.
- E. **Waste characterization and disposal requirements:**
  - 1. Prior to excavation, the contractor shall collect in-situ waste characterization samples to properly profile the contaminated material for waste disposal, including all testing required by the contractor's selected disposal or recycling facility. At minimum, these samples shall be subjected to total concentration analyses and toxicity characteristic leaching procedure (TCLP) analyses for the chemicals of potential concern. The in-situ characterization sampling will allow the remediation waste to be excavated and directly hauled to the disposal facility without onsite staging. The contractor is solely responsible for performing and paying for all required waste characterization sampling and analysis and applying for and receiving all approvals necessary to dispose of the waste materials generated by the work.
  - 2. Prior to the collection of the in-situ waste characterization samples, the contractor shall provide to the CRA Representative with the proposed disposal facility location and a summary of waste sampling procedures, which will be based on the expected total disposal volume and the disposal facility's acceptance criteria.

3. The contractor is responsible for using and interpreting the results of the waste characterization analysis to properly segregate and classify wastes generated by the work and make appropriate selections for the storage, stockpiling handling, and disposal of the materials based on this classification. If the CRA Representative finds that the contractor is improperly segregating, handling, or disposing of wastes through accidental or purposeful misinterpretation of the waste characterization analysis, the CRA Representative will stop the work until the contractor's procedures have been corrected. The contractor will receive no compensation for any stoppages caused by the contractor's own misinterpretation of the waste characterization analyses.
  4. Prepare for different disposal options prior to excavation based on the results of the waste characterization. Excavated soil has the following disposal options: 1) soil that does not contain hazardous constituents may be sent to a Subtitle D facility, or 2) soil containing hazardous constituents must be managed as hazardous waste and transported to a Subtitle C landfill or treatment facility with the associated hazardous waste manifesting.
  5. Provide on the price form in the indicated line an incremental price per ton (minimum of 20 tons) for the segregation, retesting, re-handling and use of any solidification and stabilization methods for soil volumes that may be characterized as characteristically hazardous (i.e., TCLP samples exceed their respective TCLP standards).
- F. **Clearing and Grubbing:** Clear and grub the area around the excavation as per the requirements of Section 3.08 and as necessary to complete the work.
1. The contractor shall remove five deciduous trees in the area of the remedial excavation as shown on the Plan Set in Attachment 2.
- G. **Excavation dewatering.** The anticipated maximum depth of the excavation is 12" below the existing grade. The observed level of the water table at the site is 13.5-14.0 feet below the existing grade, therefore the contractor shall be prepared to dewater the excavation, if necessary in accordance with the contractor's Workplan (as specified in Section 3.03) and as per the requirements of Section 3.07, however, minimal dewatering is expected.
- H. **Excavation shoring and sloping..** Based on the extent of excavation being limited to 12 inches, shoring, benching, and similar activities are not necessary, however, contractor shall provide at all times a "Competent Person" as defined at Part 1926.650(b) to oversee the installation, maintenance, and backfilling of excavations. As discussed, in section 2.02.C, the proposed excavation area is equipped with several features, which shall be adequately protected.
- I. **Handling of non-contaminated material.** All temporary stockpiling of material must be in conformance with the requirements of the certified SESC Plan. No stockpiling of soil off-site is allowed. Handle all segregated non-contaminated material with decontaminated equipment only. Should the contractor contaminate non-contaminated soil through careless handling of contaminated materials or equipment, the contractor shall be responsible to pay for all testing and disposal of the contaminated material at their own expense.

- J. **J. Utility clearance.** The contractor and their subcontractors are solely responsible for compliance with the NJ One-Call Damage Prevention System. Prior to initiation of any excavation or any other subsurface work that requires notification of the One-Call System, provide to the CRA Representative a copy of the confirmation of the One-Call System notification including information regarding any subsurface utilities that may be present and effect the work. Additionally, a Geophysical Survey shall be conducted, using ground penetrating radar (GPR), electromagnetics (EM), and line tracers to identify subsurface utilities, underground piping/conduits, and other anomalies located within the proposed excavation area

### 2.03 SITE RESTORATION

- A. All disturbed areas, including the remedial excavation shall be restored as per the requirements of the certified SESC Plan. In the event that concrete sidewalk areas and/or traffic control features in southeastern Site areas are disturbed, restoration shall be the sole responsibility of the contractor.
- B. Prior to backfilling activities, a geotextile fabric material to serve as demarcation of impacted media shall be installed following the 12” excavation.
- C. Clean backfill and topsoil for filling and grading all disturbed areas, and all topsoil used for backfill shall be paid for and brought to the site by the contractor. The clean fill and topsoil shall be certified clean by the provider in accordance with the provisions set forth in the NJDEP Guidance Document “Fill Material Guidance for SRP Sites” (April 2015). The certifications must be provided to and approved by the CRA Representative and LSRP prior to bringing the material on-site. Copies of all bills of lading and certification materials must be provided to the CRA Representative.
- D. Fill and compaction of the backfill must be performed and completed so there are no soft or unstable areas. The backfilling must continue until the elevation of the area being filled is free-draining and consistent with surrounding grade. Perform rough grading of the excavation and backfill areas to achieve positive grades for drainage and fill depressions and low areas to prevent ponding of water. Rough grades should tie in uniformly with natural grades outside of the fill area.
- E. Removed deciduous tree species shall be replaced by up to eight (8) trees. The following species are recommended:
- Freeman maple (*Acer x freemanii*)
  - Hackberry (*Celtis occidentalis*)
  - Thornless honey-locust (*Gleditsia triacanthos v inermis*)
  - Blackgum (*Nyssa sylvatica*)
  - Swamp white oak (*Quercus bicolor*)
  - Willow oak (*Quercus phellos*)

Deciduous tree installation should be consistent with the overall project, and adhere to recommendation and guidance reported in an Evaluation from an NJDEP-approved Consulting Forester. The trees should be no larger than 3” caliper as such trees will have a rootball depth of approximately 20”.

- F. Following completion of backfilling of the disturbed areas, establish permanent stabilization of all disturbed areas, including ongoing maintenance of installed vegetation. Maintenance shall include monthly inspections from a New Jersey Department of Environmental Protection Licensed Tree Expert through two consecutive growing seasons (May through October) to assess for vegetation health issues or other impediments to successful establishment. Maintenance shall also include supplemental watering efforts as necessary for at least two years following tree installation.

#### **2.04 PROJECT RECORD (AS-BUILT) DRAWINGS**

- A. At the project completion, deliver to the CRA, final "As-Built" drawings and AutoCAD file of the work. The As-Built Drawings shall be certified by a New Jersey Professional Land Surveyor.
- B. The Land Surveyor shall prepare a survey in full accordance with the requirements of N.J.A.C. 13:40 Subchapter 5.
- C. Submit to the CRA Representative 4 copies signed and sealed by the Land Surveyor showing the work performed and record survey data. Show boundary lines, monuments, streets, adjoining properties, acreage, grade contours, and the distance and bearing from a site corner to a legal point. Survey must include location of existing boundary markers including chain-link fence, barricades and other development constructed to indicate the location of the Site boundaries. Include on the survey a certification, signed by Land Surveyor, that principal metes, bounds, lines, and levels of project are accurately positioned as shown on the survey.
- D. Provide to the CRA Representative a CAD file of the survey prepared according to the Spatial Reference Information requirements of the Mapping and Digital Data Standards New Jersey Department of Environmental Protection (NJDEP) Geographic Information System (October 2013). Digital data provided to or produced for the NJDEP are required to be in the North American Datum 1983(NAD83) horizontal geodetic datum and referenced in the New Jersey State Plane Coordinate System (NJSPC); and in the North American Vertical Datum of 1988 (NAVD 88). The NJSPC is the official survey base for the State of New Jersey, as outlined in Chapter 218, Laws of New Jersey, 1989.

### **PART 3 – GENERAL CONDITIONS**

- I. The General Conditions will not be measured for payment, and all costs connected, related, or corresponding to the work specified in this Part shall be included in the contract lump sum price for the Bid Item titled "General Conditions."
  - 1. This Bid Item shall constitute full compensation for mobilization (as defined below), all bonds, insurance, supervision and superintendence, permits, taxes, record documents, shop drawings, samples, submittals, surveying, quality control, health and safety program, traffic control and all other necessary work, labor, and material required of the General Conditions of the contract.
  - 2. Mobilization includes mobilization of all equipment, materials, supplies, appurtenances, facilities, and contractor's forces ready for commencing and prosecuting the work; and the subsequent demobilization and removal from the jobsite of said equipment,

appurtenances, and facilities upon completion of the work. Mobilization also includes assembly and delivery to the jobsite of plant, equipment tools, materials and supplies necessary for prosecution of the work which are not intended to be incorporated into the work; the clearing and preparation of the contractor's work area; complete assembly, in working order, of equipment necessary to perform the work; services preparatory to commencing the actual work on items for which payment is provided under the contract.

3. The contractor shall create a Site Protection and Security plan in draft form for review by CRA. The plan should include Site control measures to prohibit public-access to Site areas during work activities involving temporary fencing systems surrounding the Site with locks and signage indicating prohibited public access.
4. The contractor shall be due at the end of the first pay period 50% of the lump sum bid price for General Conditions. During the remaining months, the contractor shall receive a percentage of the lump sum bid price for General Conditions based on the duration of the project. Upon final acceptance and closure the contractor shall be due all remaining monies for the lump sum bid price.

### **3.01 PAYMENT PROCEDURES**

- A. **Application for Payment Forms:** Use AIA Document G702 or similar and AIA Document G703 or similar as form for Applications for Payment or as required by the CRA Representative.
- B. **Contingency Allowance:** Any contingency allowance included on the Price Form belongs to CRA and will be released as needed by the CRA Representative and used by the contractor only as directed by CRA to address unknown or unforeseeable conditions.
- C. **New Jersey Prevailing Wage Act:** No Applications for Payment will be accepted if all certified payroll records for the preceding period have not first been received and approved by the CRA Representative in conformance with the requirements of the New Jersey Prevailing Wage Act.
- D. **Basis of Payment:**
  1. Stipulated ("Lump") Sum items will be evaluated and paid on a "percent complete" basis unless specifically stated otherwise in the bid item. After consultation with the contractor, the CRA Representative will solely decide the percentage of completeness of the work under each lump sum pay item.
  2. Payment for Unit Price Items will be determined by the actual measurement of the unit of work completed. The actual number of units of each unit price item of work may be more, less or never stated in the bidding schedule of the Bid or included in the contract. Payment will be made only for the actual number of units or work performed, and at the contract unit price for each such unit with measurement for payment made as defined in the following paragraphs. Where partial Unit Price Items are required, the contractor will be paid for that portion of the Unit Price Item actually worked or incurred.
  3. For both Lump Sum and Unit Price items, sufficient backup documentation as required by the contract documents and the CRA Representative will be required to establish measurement of completion for each item within a particular pay period and the work

overall. All of the contractor's Applications for Payment must provide sufficient backup documentation for the quantities listed for each pay item including, but not necessarily limited to: waste manifests, certified weight tickets, shipping documents, material certifications, product sheets, chains-of-custody, testing reports, surveys, field logs and other draft and final copies of required submittals; copies of project record drawings showing notations for work completed and materials stored, removed and transported off-site; photographs; or other materials as requested by the CRA Representative.

4. Failure to comply with these requirements to the satisfaction of the CRA Representative may result in delays in payment and requirements for additional documentation and/or certifications prior to payment.

### 3.02 CONTRACT MODIFICATION PROCEDURES

A. **Minor changes to the work:** Supplemental instructions authorizing minor changes in work, not involving an adjustment to Contract Sum or Contract Time, may be issued by the CRA Representative. Such supplemental instructions must be made by the CRA Representative and received by the contractor in writing.

B. **Change Orders:** Any changes to the Contract Sum or Contract Time must be approved the CRA. Under no circumstances shall the contractor undertake any change in the work affecting the Contract Sum or Contract Time without having received this approval and modification to the contract.

1. **Stipulated Sum Change Orders:** Contractor may propose a change by submitting a request to the CRA Representative describing proposed change and full effect on the work with a statement describing reason for change, and effect on Contract Sum and Contract Time with full documentation. Document each quotation for a change in cost or time with sufficient data to allow evaluation of quotation. Provide data to support computations:

- a. Origin and date of claim
- b. Quantities of products, labor, and equipment
- c. Taxes, insurance, and bond
- d. Overhead and profit
- e. Justification for change in Contract time
- f. Credit for deletions from Contract must be similarly documented

2. **Time and Material Change Orders:** Submit itemized account and supporting data within one week after completion of change. Maintain detailed records of work done on a time and material basis. Provide full information needed for evaluation of proposed changes, and to substantiate costs of changes in work. Provide data to support computations:

- a. Date and time work was performed, and by whom
- b. Time records and wage rates paid
- c. Quantities of products, labor, and equipment
- d. Invoices and receipts for products, equipment, and subcontracts, similarly documented

3. **Unit Price Change Orders:** For pre-determined unit prices and quantities, the change order will be executed on a fixed unit price basis. For unit costs or quantities of units of work that are not pre-determined, execute work under a Construction Change Directive. Changes in Contract Sum or Contract Time must be computed as specified for Time and Material Change Order.
4. **Construction Change Directives:** The CRA Representative may issue a document, signed by the CRA, instructing contractor to proceed with a change in the work, for subsequent inclusion in a change order. The document will describe changes in work and will designate method of determining change in Contract Sum or Contract Time.
5. **Proposal Request:** The CRA Representative may issue a Proposal Request that includes a detailed description of a proposed change with supplementary or revised drawings or specifications. Prepare and submit an estimate within 10 days, including a proposed change in Contract Time for executing change and period of time during which requested price will be considered valid. Contractor must endeavor to not delay project as a result of requested changes.

**C. Correlation of Contractor Submittals:**

1. Promptly revise Schedule of Values and Application for Payment forms to record each authorized change order as a separate line item and adjust Contract Sum.
2. Promptly revise progress schedules to reflect changes in Contract Time, revise sub-schedules to adjust time for other items of work affected by change, and resubmit.

### **3.03 WORK PLAN**

- A. A Workplan must be prepared by the contractor as per the submittal requirements of Section 3.14 and as specified below during the pre-planning stage of the work and submitted to the CRA Representative for review within 10 days of the date established for the Notice to Proceed. The contractor may not mobilize to the Site prior to receiving written approval of the Workplan from the CRA Representative.
  1. **Excavation Plan:** Provide approach and scope including methods of excavation and dewatering, stockpiling, segregating, collection and analysis of waste characterization samples, and management of excavated material. ### 3.04 HEALTH AND SAFETY PROGRAM

A. **Site-Specific Health and Safety Plan:** Prepare and implement a Site-Specific Health and Safety Plan (HASP). The HASP must comply with Occupational Safety and Health Administration (OSHA) requirements set forth at 29 CFR 1910.120, Hazardous Waste Operations and Emergency Response. The HASP shall include sections on the following topics, as applicable to the project:

1. Organizational Structure
2. Job Hazard Analysis and/or Site Risk, including:
  - a. A list of the contractor's work tasks that may involve contact, excavation, and/or handling of contaminated soil and/or groundwater.
  - b. Compounds of concern that may be encountered during the course of the work and signs/symptoms of exposure.
  - c. Potential for worker exposure to the compounds of concern for each work task.
3. Accident Reporting Requirements
4. Training Requirements
5. Personal Protection Equipment (PPE)
6. Decontamination Program
7. Emergency Response Plan
8. Medical Surveillance Program
9. Exposure Monitoring
10. Environmental Protection
11. Dust, Odor and Gas Control
12. Noise Control

13. Vector Control
14. Fire Control
15. Site Security and Control
16. Confined Space Operations
17. Spill Containment
18. Excavation and Trenching
19. Hot Work
20. Thermal Stress
21. Lock-out/Tag-out
22. Standard Operating Procedures

- B. **Implementation:** Perform all work in accordance with the contractor's Site-Specific Health and Safety Plan. Always maintain a copy of the Site-Specific Health and Safety Plan on site. Trained supervisors of the contractor's forces responsible for implementing the Site-Specific Health and Safety Plan and assuring quality control shall be present during all hours of operation. The contractor must provide the HASP to the CRA Representative prior to mobilization and may not mobilize to the Site prior to receiving written authorization from the CRA Representative.
- C. **Qualified Health & Safety Professional.** Employ a New Jersey Licensed Professional Engineer, a Certified Industrial Hygienist (CIH), Certified Safety Professional (CSP) or other Qualified Health & Safety Professional to prepare the contractor's Site-Specific HASP and for quality control of execution of the HASP as specified in this Section. The Qualified Health & Safety Professional must have certification as a safety professional qualified by training and experience to act in this capacity, and certification as having completed the 40-hr. OSHA health and safety training course, with current 8-hr. refresher training and 8-hr. OSHA manager's training.
- D. **Accident Reporting Requirements:** Comply with all accident and or incident reporting requirements as provided in the HASP. Should any unforeseen safety-related factor, hazard, or condition become evident during the course of the work, immediately take prudent action to establish, maintain, and secure the Site and working conditions. This must be followed by immediate notice to the CRA Representative.
- E. **Training Requirements:** Provide 40-hour HAZWOPER health and safety training and medical surveillance for all personnel who may come in contact with or be exposed to contaminated materials during the course of the work. Provide personnel, including personnel for subcontractors, who are 40-hr. OSHA trained with an 8-hr. OSHA refresher course completed within the previous twelve months. Personnel who have not received training, and who are not equipped with the required protective clothing and equipment, must not be permitted access to the Site by the contractor during the course of the work that may result in exposure to contaminated soil and/or groundwater.
- F. **Personal Protective Equipment (PPE):** The contractor is solely responsible for determining the appropriate level of personal protection equipment (PPE) that is required based on the criteria outlined in the contractor's HASP.
- G. **Unexpected Hazardous Conditions:** If potentially hazardous conditions develop during the work, the work in that specific area must be terminated until the hazardous condition has been addressed to the satisfaction of the CRA Representative. Potentially hazardous conditions include, but are not limited to, encountering previously unknown hazardous materials or gross contamination, liquids,

or containers. If buried storage tanks, containers, or drums are encountered or if a release of oil or potentially hazardous materials has occurred, the contractor must notify the CRA Representative immediately. The contractor must secure the area to prevent health risks to workers or the public and releases into the environment. The sources of the event causing the material to be considered suspect will be evaluated by the CRA Representative. The CRA Representative will notify NJDEP as required.

### **3.05 TRAFFIC AND SITE CONTROL**

- A. Contractor shall complete necessary traffic control measures. Traffic control measures should be created to minimize pedestrian and vehicle traffic in areas of proximity to the Site. A traffic control plan should be prepared in draft form and provided to CRA for review prior to work activities, which should include details surrounding road and lane closure, sidewalk closure, potential detour routes, City of Camden Police presence at the Site, and methodologies the contractor will utilize in implementing Site traffic controls.
- B. Contractor shall implement Site control measures to prohibit public-access to Site areas during work activities. Site control measures should include but not be limited to temporary fencing systems surrounding the Site with locks and signage indicating prohibited public access.

### **3.06 DUST, ODOR AND NOISE CONTROL**

- A. All work shall be conducted in strict compliance with the NJDEP air emission standards. Clearing, excavation, filling and other land disruption activities shall not result in air contaminants to be emitted in violation of N.J.A.C. 7:27-5.2(a). If the CRA Representative finds that the level of dust or odors is unacceptable, employ measures necessary to reduce dust or odors to an acceptable level. Throughout all operations having ground disturbance activities that generate dust, the contractor shall provide all necessary measures to control dust, including the use of methods per the Dust Control Standard in the New Jersey Standards for Soil Erosion and Sediment Control in New Jersey (7th Edition, January 2014).
- B. Noise control measures shall be implemented so that noise levels generated by Site activities do not exceed the standards set forth by the New Jersey Noise Control Regulations under N.J.A.C. 7:29-1.2. Provide continuous noise abatement as required to prevent disturbance and nuisance to the public and workers and to the occupants of adjacent premises and surrounding areas.

### **3.07 DECONTAMINATION AND CLEANING VEHICLES**

- A. Install temporary stabilized construction entrances as shown on the certified SESC Plan drawings. Construction entrances, exits, and parking areas shall be graveled or paved to reduce the tracking of sediment onto public or private roads. Maintain for the duration of the project.
- B. Minimize the quantity of dirt and debris leaving the Site. Inspect all vehicles leaving the Site for compliance with this provision. Clean roads as necessary and additionally when requested by the CRA Representative at no additional cost to the Owner. Take measures to prevent debris from being spilled from trucks or tracked from the Site onto local streets. Sweep streets adjacent to the Site as necessary or as directed by the CRA Representative.

- C. If the CRA Representative finds that the contractor is unable to comply with this provision using the basic track-out requirements of the SESC Plan, the contractor shall install, operate, and maintain a wheel wash at vehicle access points to the Site at no additional cost to the Owner.

### **3.08 DECONTAMINATION OF HEAVY EQUIPMENT**

- A. Decontaminate all heavy equipment (i.e., backhoes) that come into contact with potentially contaminated media before use. All equipment must be decontaminated before leaving the work area such that it will minimize the risk of transfer of contaminants between work locations. The following steps will be used when decontaminating heavy equipment:
  - 1. Establish a decontamination area (e.g., large troughs or plastic sheeting with temporary wood bermed sides) that is large enough to fully contain the equipment to be cleaned. All decontamination areas must be upwind of the area under investigation.
  - 2. With the heavy equipment in place, spray areas (e.g., bucket of the backhoe) exposed to contaminated media using a hand-handle sprayer. Be sure to spray down all surfaces that contact soil.
  - 3. Use brushes, soap, and potable water to remove dirt whenever necessary.
  - 4. Remove equipment from the decontamination pool and allow it to air dry before returning it to the work site.
  - 5. After decontamination activities are completed, collect all contaminated wastewater, plastic sheeting, and disposable gloves, boots, and clothing in separate containers or receptacles (i.e., solids and liquids). A decontamination area may be used for multiple days/weeks provided the containment integrity is maintained. All receptacles containing contaminated items must be properly labeled for disposal. Liquids must be separated from solids and drummed.
  - 6. The contractor is responsible for providing and paying for all water necessary to complete decontamination activities and for disposing off all decontamination materials.

### **3.09 CLEARING AND GRUBBING**

- A. Clear and grub the Site as necessary to complete the work at the areas of disturbance only, including the five deciduous tree species to be replaced. Other overgrown vegetation shall be cleared by the contractor as determined to be necessary by the contractor or otherwise as directed by the CRA Representative.
  - 1. Clearing consists of the felling, cutting up, and satisfactory disposal of all five trees, vegetation, and debris occurring within the construction limits.
  - 2. Grubbing consists of the complete disposal or removal of all stumps, roots larger than one and one half (1-1/2) inches in diameter and longer than three (3) feet, vegetation, and debris.

- B. All waste material generated by the clearing and grubbing process that may not be used on-site as fill shall be transported to an off-site licensed disposal facility. Small trees and shrubs shall be shredded and properly disposed off-site.

### **3.10 STORMWATER CONTROL AND DEWATERING**

- A. Employ all reasonable means and methods to control or divert upslope stormwater runoff away from cleared and grubbed areas, stockpiled materials, open excavations, and other disturbed areas. Keep excavations and Site construction areas free of stormwater. Capture, store and prevent the uncontrolled discharge of stormwater flows as per the requirements of the certified SESC Plan.
- B. The observed groundwater table at the Site is approximately 13.5-14 feet below the existing grade. Therefore, some excavations at depth may encounter groundwater seepage or inflows if dewatering techniques are not employed. The contractor shall at all times keep the remedial excavations free of groundwater to provide suitable working surface of the bottom of the excavation and to stabilize the banks of the excavation to avoid the hazards of slides and sloughing. If more than 2 inches of water accumulates in the bottom of remedial excavations, the contractor shall stop work until the water has been removed and continuous inflows stopped.
- C. Collect, store, and manage stormwater accumulations, dewatering fluids, and associated sediments during periods of Site disturbance. Work shall include installation and furnishing of frac tanks and all appurtenant piping, valves, supports, and devices to control overflow and/or sediment.
- D. Containerize, characterize, and dispose of all dewatering sediment and fluids from on-site storage tanks during operation. Provide all waste management documentation to the CRA Representative as per the requirements of Section 3.14.

### **3.11 UTILITY LOCATION AND CLEARANCE**

- A. The contractor and their subconsultants and subcontractors are solely responsible for compliance with the NJ One-Call Damage Prevention System (N.J.A.C. 14:2-1.1 (2014)). The One-Call System receives information from excavators that plan to perform excavation or demolition, and relays that information to those persons that own, operate, or control the operation of underground facilities, and have registered with the One-Call System operator. Information regarding the requirements of the One-Call system may be found at <http://www.nj1-call.org/nj-law/>
- B. Prior to initiation of any excavation or any other subsurface work that requires notification of the One-Call System, provide to the CRA Representative a copy of the confirmation of the One-Call System notification including information regarding any subsurface utilities that may be present and affect the work.
- C. The contractor or their subconsultants and subcontractors shall confirm that all required mark-outs by the registered utilities have been completed prior to the initiation of the subsurface work.

- D. Protect any active sewer, water, gas, electric, and other utilities and drainage and irrigation lines indicated or, when not indicated, found, or otherwise made known to the contractor before or during the work.
- E. In the event water, gas pipes, conduits, or other utilities become broken in the execution of the work, stop work, notify the CRA Representative, and file immediate notice to the proper authorities.

### 3.12 PERMITS

- A. The contractor is solely responsible for all permits, certifications, licenses, and approvals required to complete the work. The contractor must prepare and file all required applications and pay all applicable fees. The contractor must provide to the CRA Representative draft and final copies of all applications and proof of fee payments, and copies of all permits, certifications, licenses, or approvals obtained for the work.

### 3.13 WASTE MANAGEMENT DOCUMENTATION

- A. **Load-Out Documentation:** At least two days before planned removal of any waste material from the Site, submit copies of all waste analyses performed for disposal, completed profile form to the receiving facility for the waste materials; and approval form or letter from the receiving facility confirming that the facility will accept the waste materials.
- B. **Disposal Documentation:** Within seven days after shipment, submit copies of completed bill of lading, generator's copies of any manifests and waste shipment records, and all supporting documentation of handling and transport of waste materials from the Site to approved off-site disposal facilities for each load transported from the Site. If material is salvaged or scrapped, receipts must be provided. Progress payments will only be made upon receipt of said documents.

### 3.14 SUBMITTALS

- A. Workplans, reports, drawings, and record documents to the Owner:
  - 1. All workplans, reports, drawings, record documents and other submittals required by the contract documents shall be submitted to the CRA Representative in draft for review and comment prior to finalizing. The contractor shall then incorporate comments from the CRA Representative into the documents and resubmit them to the CRA Representative for approval to finalize.
  - 2. Text documents shall be prepared in Microsoft Word. Drawings shall be prepared in AutoCAD. Tables and cost estimates shall be prepared in Microsoft Excel. Project Schedules shall be prepared in Microsoft Project.
  - 3. The draft and final deliverables provided by the contractor to the Owner must consist of the following:

REPLACEMENT PLANTS SHALL BE THE SAME AS SPECIFIED FOR THE ORIGINAL PLANTING. REPLACEMENTS SHALL BE MADE AS MANY TIMES AS NECESSARY TO ENSURE HEALTHY PLANTS. FINAL ACCEPTANCE SHALL BE MADE IF ALL PLANTS MEET THE GUARANTEE REQUIREMENTS INCLUDING MAINTENANCE, MAINTENANCE RESPONSIBILITIES INCLUDE CULтивATING, SPRAYING, WEEDING, WATERING, TIGHTENING GUYS, PRUNING, FERTILIZING, MULCHING, AND ANY OTHER OPERATIONS NECESSARY TO MAINTAIN PLANT VIABILITY. MAINTENANCE SHALL BEGIN IMMEDIATELY AFTER PLANTING AND CONTINUE UNTIL THE END OF THE GUARANTEE PERIOD.
