I. CRAMER HILL: INTRODUCTION TO THE COMMUNITY

A. Connecting Neighborhood Redevelopment to Community Development

Beginning with the *FutureCamden* master plan, transformation of the community, i.e. the people, is foremost in our efforts to transform the neighborhood, i.e. the place. We know, from the many studies of existing conditions, that the health and functioning of a localized community is intrinsically bound to the same for its neighborhood. It is our observation that strong and enriched societies rarely (if ever) flourish or sustain themselves amidst physical blight and disorder; nor do the mix of good land uses and attractive as well as well maintained properties survive, let alone thrive, where neglect, disorder, and abuse are the hallmarks of social and economic expression. Although it is neither the intent nor purpose of Camden's neighborhood and redevelopment plans to engage in social planning or engineering, it is nonetheless incumbent upon us as land use planners to better and fully understand the connections between neighborhood deterioration and community decline.

When they exist, neighborhood studies and plans, intimately developed with the affected communities, are invaluable to informing our examination of the neighborhood's and community's need for redevelopment and the production of any resulting redevelopment plan. Quite fortunately, the Cramer Hill community produced in 2003 the *Cramer Hill Tomorrow* neighborhood study and plan. In addition to articulating the community's needs and desires for neighborhood development, this report also provided a key "snapshot" of Cramer Hill's social and economic

conditions. We provide a similar picture of these conditions, to put a face on who are the victims of past decline and the beneficiaries of future improvements – the people of Cramer Hill

B. A Community in Profile: Social and Economic Characteristics

This section of the report provides the reader with a brief synopsis or snapshot of Cramer Hill's demographics. Source: 2000 U.S. Census.

WHO LIVES HERE?

2000 Population: 10,035

12.6% of all Camden residents live in Cramer Hill

Race:	Hispanic	6,535 (65.1%)
	Black	2,737 (27.3%)
	White	2,180 (21.7%)
	Asian	236 (2.3%)

Age:	18 <	3,803 (37.9%)
	65+	501 (5.0%)

Median Age: **25.2** years old

Interpretations: ***Cramer Hill is a medium-low density neighborhood.*** 13% of the city lives on 17% of its land. Although a largely Hispanic community, *Cramer Hill's* racial diversity is as balanced as Camden (Black – 53.3%; Hispanic – 38.8%; White – 16.8%; Asian – 3.1%). *Cramer Hill* has a large young population; there are proportionately more children (18 years and younger) in Cramer Hill (38%) than Camden as a whole (35%); there are proportionately less elderly (65 years and older) in Cramer Hill (5%) than Camden as a whole (8%)

FAMILY VALUES

Households: 2,913

Living alone: 15.7%

65+: 4.3%

Average Household size: 3.4 persons

Families: 2,305 (79.1%)

Married Couple: 35.9%

Female Householder: 34.4%

With children 18<: 51.2%

Average Family size: 3.8 persons

Interpretations: ***Cramer Hill is a strong family-oriented community.*** There are more families per households in Cramer Hill (79%) than for Camden as a whole (72%). There are proportionately more 2-parent family households in Cramer Hill (36%) than Camden (26%). (Single) Female Head of Households are proportionately less in Cramer Hill (34%) than in Camden (38%).

EDUCATION

School Enrollment:	Elementary School: 54.6%
	High School: 25.6%
	College: 7.9%

Educational Attainment: Less than 9th Grade: 24%
 9-12 (no diploma): 35.5%
 HSD/GED: 21.7%
 A/B Degree: 4.4%
 Graduate/Prof. Degree: 1.1%

Interpretations **More Cramer Hill residents are being educated than Camden as a whole.** Elementary and High School enrollment is slightly higher in Cramer Hill than for Camden (54.6% vs. 50.7%, and 25.6% vs. 23.2% respectively). College enrollment in Cramer Hill is less than that for Camden 7.9% vs. 11.5%. Cramer Hill has more residents who have received elementary and high school education than Camden (24% vs. 17.7%, 35.5% vs. 31.3% respectively). However, there are proportionately less Cramer Hill residents that have achieved high school and college diplomas, than Camden (21.7%, 4.4%, and 1.1% vs. 25.6%, 6.0%, and 1.9% respectively).

EARNING

Employment: 16+ Employed: 44%
 16+ Unemployed: 8.8%
 Private Sector: 82.7%
 Government: 15.7%
 Self-employed: 1.5%

Income: Mean-Median House Income: \$24,934
 Mean-Median Family Income: \$25,858

Poverty Status: Families Below Poverty Level: 33.7%

Interpretations: **Cramer Hill is a middle-income working-class community.** Cramer Hill's employment and unemployment rates are both higher than those for Camden (41.6%, 7.8% respectively). Private, government and self-employed sector employment in Cramer Hill is comparable to that for Camden (81.0%, 16.0% and 2.8%). Cramer Hill's MHI is slightly higher than Camden's \$23,421. Cramer Hill's MFI is also higher than Camden's \$24,612. Nonetheless, there are proportionately slightly more Cramer Hill families in poverty than Camden (32.8%).

HOUSING

Housing Units: Total: 3,220
 Vacant: 19.6%
 Owner-Occupied: 46.8%
 Substandard: 2.2%

Housing Values Median House Value: \$42,000
 Median Contract Rent: \$414

Interpretations: **Cramer Hill's has a healthy housing infrastructure.** Cramer Hill's housing units represent 10.8% of Camden's total. CH vacancy rate is slightly higher than Camden's 18.8%. CH owner-occupancy rate is also slightly higher than Camden's 46.1%. The percentage of substandard housing (i.e. those lacking sufficient kitchen and bathroom plumbing facilities) found in Cramer Hill is almost half of Camden's 4.3%. CH's Median House Value is slightly more than Camden's \$40,700; but CH's Median Contract Rent is slightly less than Camden's \$440.

CRIME – 1/07-12/08

Source: Camden Police Department

CRIME TYPE	INCIDENCE	LOCATIONS: Concentration
Murder, Homicide	5	Pierce, River, Hayes
Assault with firearm, knife, other weapon, hands, fists, feet	103	State, River, Bergen, Wayne, 27th
Sexual Assault	2	27th, River
Robbery, street, business, residential	118	River, Wayne, 27th
Total	228	

Person-related crimes mostly occur on 4 east-west streets: Pierce, River, Hayes and Wayne. Violent crimes against people, as well as violent crimes against property mostly occur on (5) east-west streets: Harrison, River, Wayne, Pierce and Hayes.

CRIME TYPE	INCIDENCE	LOCATIONS: Concentration
Burglary, residential, non-residential, building, motor vehicle, misc.	454	River, Wayne, Hayes, Harrison, Cleveland, 19th, 27th, 32nd, Bergen, 33rd, 36th
Motor Vehicle Theft	239	River, Harrison, 20th, 27th, 30th, 32nd, 35th, Wayne,
Arson, residence (occupied, vacant), motor vehicle	48	Hayes, Cleveland, Harrison, Farragut, State, 22nd, 29th, 32nd, 34th Bergen
Vandalism, residence, business, public building land, motor vehicle	62	Harrison, River, Hayes, 19th, 25th, 27th, 29th, 33rd
Drug sale, manufacture possession: Cocaine, Heroin, Marijuana	106	River, Wayne, Hayes, 19th, 27th, 32nd, 34th, Ablett Village
Total	909	

Crimes against property are more than three times more frequent than those against people (228). Property crimes occur mostly on 12 north-south streets: 19th, 22nd, 27th, Bergen, etc.

C. Conclusions

Although nine years have elapsed since this snapshot of Cramer Hill's social and economic characteristics was produced, no dramatic change in these conditions have been manifested. By all appearances, Cramer Hill today is (still) a socially and economically stable medium-to-low density neighborhood with a large youth population. Cramer Hill is a strong family-oriented community with more families, particularly 2-parent families per households in Cramer Hill than for Camden as a whole. More Cramer Hill residents are being educated than Camden as a whole; however, there are proportionately less Cramer Hill residents that have achieved high school and college diplomas, than Camden. Cramer Hill is mostly a middle-income working-class community, with proportionately slightly more families in poverty than Camden. Cramer Hill's has a healthy housing infrastructure, with a vacancy rate slightly higher than Camden's and an owner-occupancy rate that also appears to be slightly higher than the city's. Although no community is crime-free, Cramer Hill is not a dangerous one, with a crime rate that is low (11% overall for all types of crime). With 228 person-related crimes, the crime rate in this community is 2.3% or about 2 crimes per 100 people living in this community; while crimes against property (909) are more than three times as frequent as those against people. Against this background of a young, educated, middle-income working class community, is the question "To what extent have the neighborhood's physical characteristics and conditions presented support or challenges to Cramer Hill's future as a thriving and successful community?" The balance of this report, which examines the need for the neighborhood's rehabilitation and redevelopment, addresses this vital question.

II. REDEVELOPMENT STUDY: INTRODUCTION

A. Study Authorization

On September 11, 2007, the Municipal Council of the City of Camden passed Resolution MC-07:389, re-authorizing the City of Camden Planning Board to conduct an investigation to determine whether the Cramer Hill Study Area meets the statutory criteria necessary to be declared an “Area in Need of Redevelopment” as outlined in NJSA 40A:12A-5 and NJSA 40A:12A-6. If the area is found to be in need of redevelopment, a redevelopment plan will be proposed.

Dresdner Robin, a Camden-based consulting firm, with assistance from The Camden Division of Planning, has prepared this Study to determine the need for redevelopment of the Cramer Hill neighborhood. Dresdner Robin prepared this study by conducting a field investigation of land uses and property conditions within the Cramer Hill Study Area, and preparing maps and property tables for this study. Property ownership information, tax maps and zoning information were obtained from the City of Camden.

B. Boundary Description

The Cramer Hill Study Area (herein referred to as the “Study Area”) consists of 163 tax blocks and approximately 935 acres (1.46 square miles) in the northeastern section of the City of Camden in Camden County, New Jersey. The boundaries of the Study Area are the Delaware River (also known as the “Back Channel” in this

area) to the west, North 36th Street (County Route 611) to the northeast, the Conrail and New Jersey Transit rail right-of-ways to the southeast and Cooper River to the southwest. The boundaries of the Cramer Hill Study Area (and Cramer Hill neighborhood) contain two U.S. census tracts: 6009 and 6010.

C. Study Area Location/Local Setting

The Study Area is located in the northeastern section of the City of Camden. The Back Channel of the Delaware River bounds the study area to the west and the Cooper River to the southwest. The Study Area is located approximately one and a half miles northeast of Downtown Camden. Redevelopment plans have been completed and adopted for a number of additional Camden neighborhoods, including Lanning Square, Cooper Plaza, Gateway, Liberty Park, Downtown and Rosedale.

The City of Camden is a city of nine square miles with 79,904 residents, approximately a third of who live below the poverty line. According to the City of Camden website, the history of Camden began in colonial times, when European settlers began to settle the land along the Delaware River. By the early 19th century, several villages and small towns developed within the modern city limits of Camden. Expansion of these small settlements continued through the early 19th century and in 1844, Camden County was established. In 1848 the City of Camden became the county seat. (City of Camden)

Cramer Hill
 REDEVELOPMENT REPORT

CITY OF CAMDEN
 CAMDEN COUNTY, NEW JERSEY

MAP # 1
 CRAMER HILL
 STUDY AREA LOCATION

USGS 2002 and City of Camden Tax Information, December 2006.

The Cramer Hill Community Development Corporation notes that Cramer Hill was named after Alfred Cramer, who purchased farmland in this area in the late 19th century and resold it as subdivided lots. Cramer Hill was home to one of Camden's first African American communities and also witnessed an influx of German immigrants. Settlers in this area traditionally worked in local factories or on the waterfront. (Cramer Hill Community Development Corporation [CHCDC])

Camden's population burgeoned in the late 19th and early 20th century, coinciding with the rise of industry in the area. Between the years 1870 and 1920 the population grew from 20,000 to 116,000, according to the City of Camden 2002 Master Plan. Neighborhoods began to grow and establish their own identities. Population growth continued at a slower level until 1950, when the City of Camden reached its peak population of 125,000 residents. (City of Camden Master Plan, 2002)

In the 1950s and 1960s, manufacturing and industry began to decline in Camden and throughout American industrial cities. Meanwhile, the nearby suburbs of Southern New Jersey and their highway infrastructure grew, attracting residents as well as commercial and industrial development. Ultimately, Camden began losing residents and jobs to these outer-ring suburbs.

From the 1970s to 2000, the City of Camden suffered ongoing population loss as well as physical decline. According to the City of Camden Master Plan, during this time, owner occupancy of homes decreased from 59% to only 46%, evidencing residents' decreasing ability to own property. While vacant lands represented only

6% of City parcels in 1970, by 2000, there was a 20% vacancy rate in the City. Service jobs began to replace those lost in manufacturing, but the replacement level was not adequate. As such, the City lost 17% of its prime wage-earning population (those between the ages of 45 and 64) between 1970 and 2000. (City of Camden Master Plan, 2002)

Unlike the City of Camden, which has experienced continual population loss in recent decades, Cramer Hill has enjoyed a particularly stable population. The Cramer Hill Community Development Corporation (CHCDC) notes that Cramer Hill contained 10,107 residents in the 1990 U.S. Census and 10,035 in 2000. Likewise, Cramer Hill did not suffer from much of the physical destruction and neighborhood disintegration associated with the race riots of the 1960s that primarily targeted Downtown Camden.

Today, Cramer Hill is home to a number of low-income and middle-income families, of which 65% are Latino, 24% are African American and 8% are White. While the neighborhood has not witnessed the same extremes of decline apparent in other parts of the City, Cramer Hill nonetheless exhibits relatively high vacancy rates and deteriorated housing stock and other signs of physical decay, as evidenced within this report. (Cramer Hill Community Development Corporation)

D. Transportation Access

The Study Area can easily be accessed by automobile. The main thoroughfare, River Road / River Avenue (County Route 543) runs northeast-southwest through the Study Area and provides access to Downtown Camden to the southwest as well as State Routes 73 and 90 to the northeast. From Downtown Camden, one can easily access Philadelphia via the Benjamin Franklin Bridge and the New Jersey Turnpike via State Route 38. North 27th Avenue (County Route 609) is a major corridor that runs northwest-southeast through the Study Area, also providing access to State Routes 38 and 70, and ultimately the New Jersey Turnpike.

Cramer Hill contains stops for local bus routes as well as a commuter rail line. The RiverLine, operated by NJ Transit, stops at the 36th Street Station, located at River Road and North 36th Street, at the eastern border of the Study Area. The RiverLine is a new commuter rail that provides access to Downtown Camden and Walter Rand Transportation Center to the south as well as Trenton and a number of additional towns along the Back Channel of the Delaware River.

The NJ Transit 460 bus route travels down River Road, providing access to Downtown Camden and the Walter Rand Transportation Center. Route 419 stops at the 36th Street RiverLine Station, providing access to the RiverLine and Downtown Camden as well as Pennsauken and other New Jersey towns to the northeast. Route 452 also stops at the 36th Street Station, providing access to the RiverLine as well as the Tweeter Center, Adventure Aquarium and other locations in Downtown Camden.

The Walter Rand Transportation Center in Downtown Camden hosts the RiverLine commuter rail, PATCO regional rail and a local bus hub. The RiverLine provides a northbound route to Trenton, and access to the Northeast Corridor. PATCO service provides eastbound access to Philadelphia and westbound to Lindenwold, with a connection to Atlantic City via NJ Transit in Lindenwold.

The condition of the road network is also a problem for the neighborhood. Potholes can be found on many streets in the area and several streets are in total disrepair.

E. Tax Blocks and Lots in the Study Area

There are 163 tax blocks and 3,770 lots in the Study Area. Block/Lot numbers have been provided by the Tax Assessor's Office and **Dresdner Robin** takes no responsibility for their inclusiveness or accuracy. A comprehensive listing of all tax lots organized by block can be found below.

BLOCK	Lot
807	1, 2.01, 2.02, 6, 6.01, 12, 12.01, 21, 63

III. Study Area Characteristics and Conditions

A. Zoning

The current zoning standards governing development within the Study Area include R-1-A (Residential), R-2 (Residential), M-R (Manufacturing-Residential), C-R (Commercial-Residential), I-1 (Light Industrial), I-2 (Heavy Industrial) and CV-2 (Conservation Overlay Zone). The majority of the Study Area between North 37th Street and North 27th Street, as well as a smaller area to the southwest of North 27th Street fall in the R-1-A Residential District. A large block in the south of the neighborhood along Cooper River is zoned R-2 Residential. Portions of the River Road / River Avenue corridor are zoned C-R Mixed Use. The M-R Manufacturing-Residential District is located along the northern portion of the Back Channel of the Delaware River, from North 30th Street to North 37th Street. The I-1 Industrial District is also located along the Back Channel of the Delaware River from State Street to 30th Street. The I-2 Industrial District is located along the New Jersey Transit and Conrail lines on the eastern and southeastern border of the neighborhood. **Map 3 illustrates the current zoning districts for the Study Area.** Following is an overview of the zoning contained within the Study Area:

R-1-A Residential: provides for single-family detached dwelling units at a maximum density of approximately 14.5 dwelling units per acre. Uses permitted in the R-1-A District include single family dwellings of any type and customary accessory buildings, municipal buildings, noncommercial parks, playgrounds, churches, educational institutions, planned unit residential developments, home occupations,

parking structures and recreation areas. Specifically prohibited are billboards and lodging houses.

R-2 Residential: provides for single-family and multi-family dwellings at a maximum density of one hundred and nine (109) units per acre. Uses permitted in the R-2 District include single family dwellings of any type and customary accessory buildings, municipal buildings, noncommercial parks, playgrounds, churches, educational institutions, planned unit residential developments, home occupations, parking structures and recreation areas.

M-R Manufacturing-Residence Mixed Use District: provides manufacturing-residence mixed use areas. All uses permitted in the R-2 zone are allowed in the M-R zone. Additional permitted uses include telephone exchangers, non-commercial clubs, gas or electric substations, convenience retail, wholesale establishments and manufacturing establishments.

C-R Commercial-Residential Mixed Use District: provides a mix of single family and multi-family dwellings with general retail commerce and services on the first floor. Wholesale, storage and warehouse facilities, junkyards, hotels, adult entertainment uses and amusement centers are prohibited in the C-R District. Businesses found in the C-R District include grocery stores, bakeries, pharmacies, newspaper and magazine stores, funeral homes, restaurants, gas stations, auto service establishments, clothing stores, barber and beauty shops, dry cleaners and laundries, professional and governmental offices and parking lots.

I-1 Industrial District: provides for light manufacturing and heavy commercial use. Residential uses are prohibited in the I-1 zone, as are: the storage of hazardous gas, slaughterhouses other than poultry, foundries, forge shops, junkyards, automobile disassembly plants, the generation of power, adult entertainment uses or the storage of explosives or radioactive material.

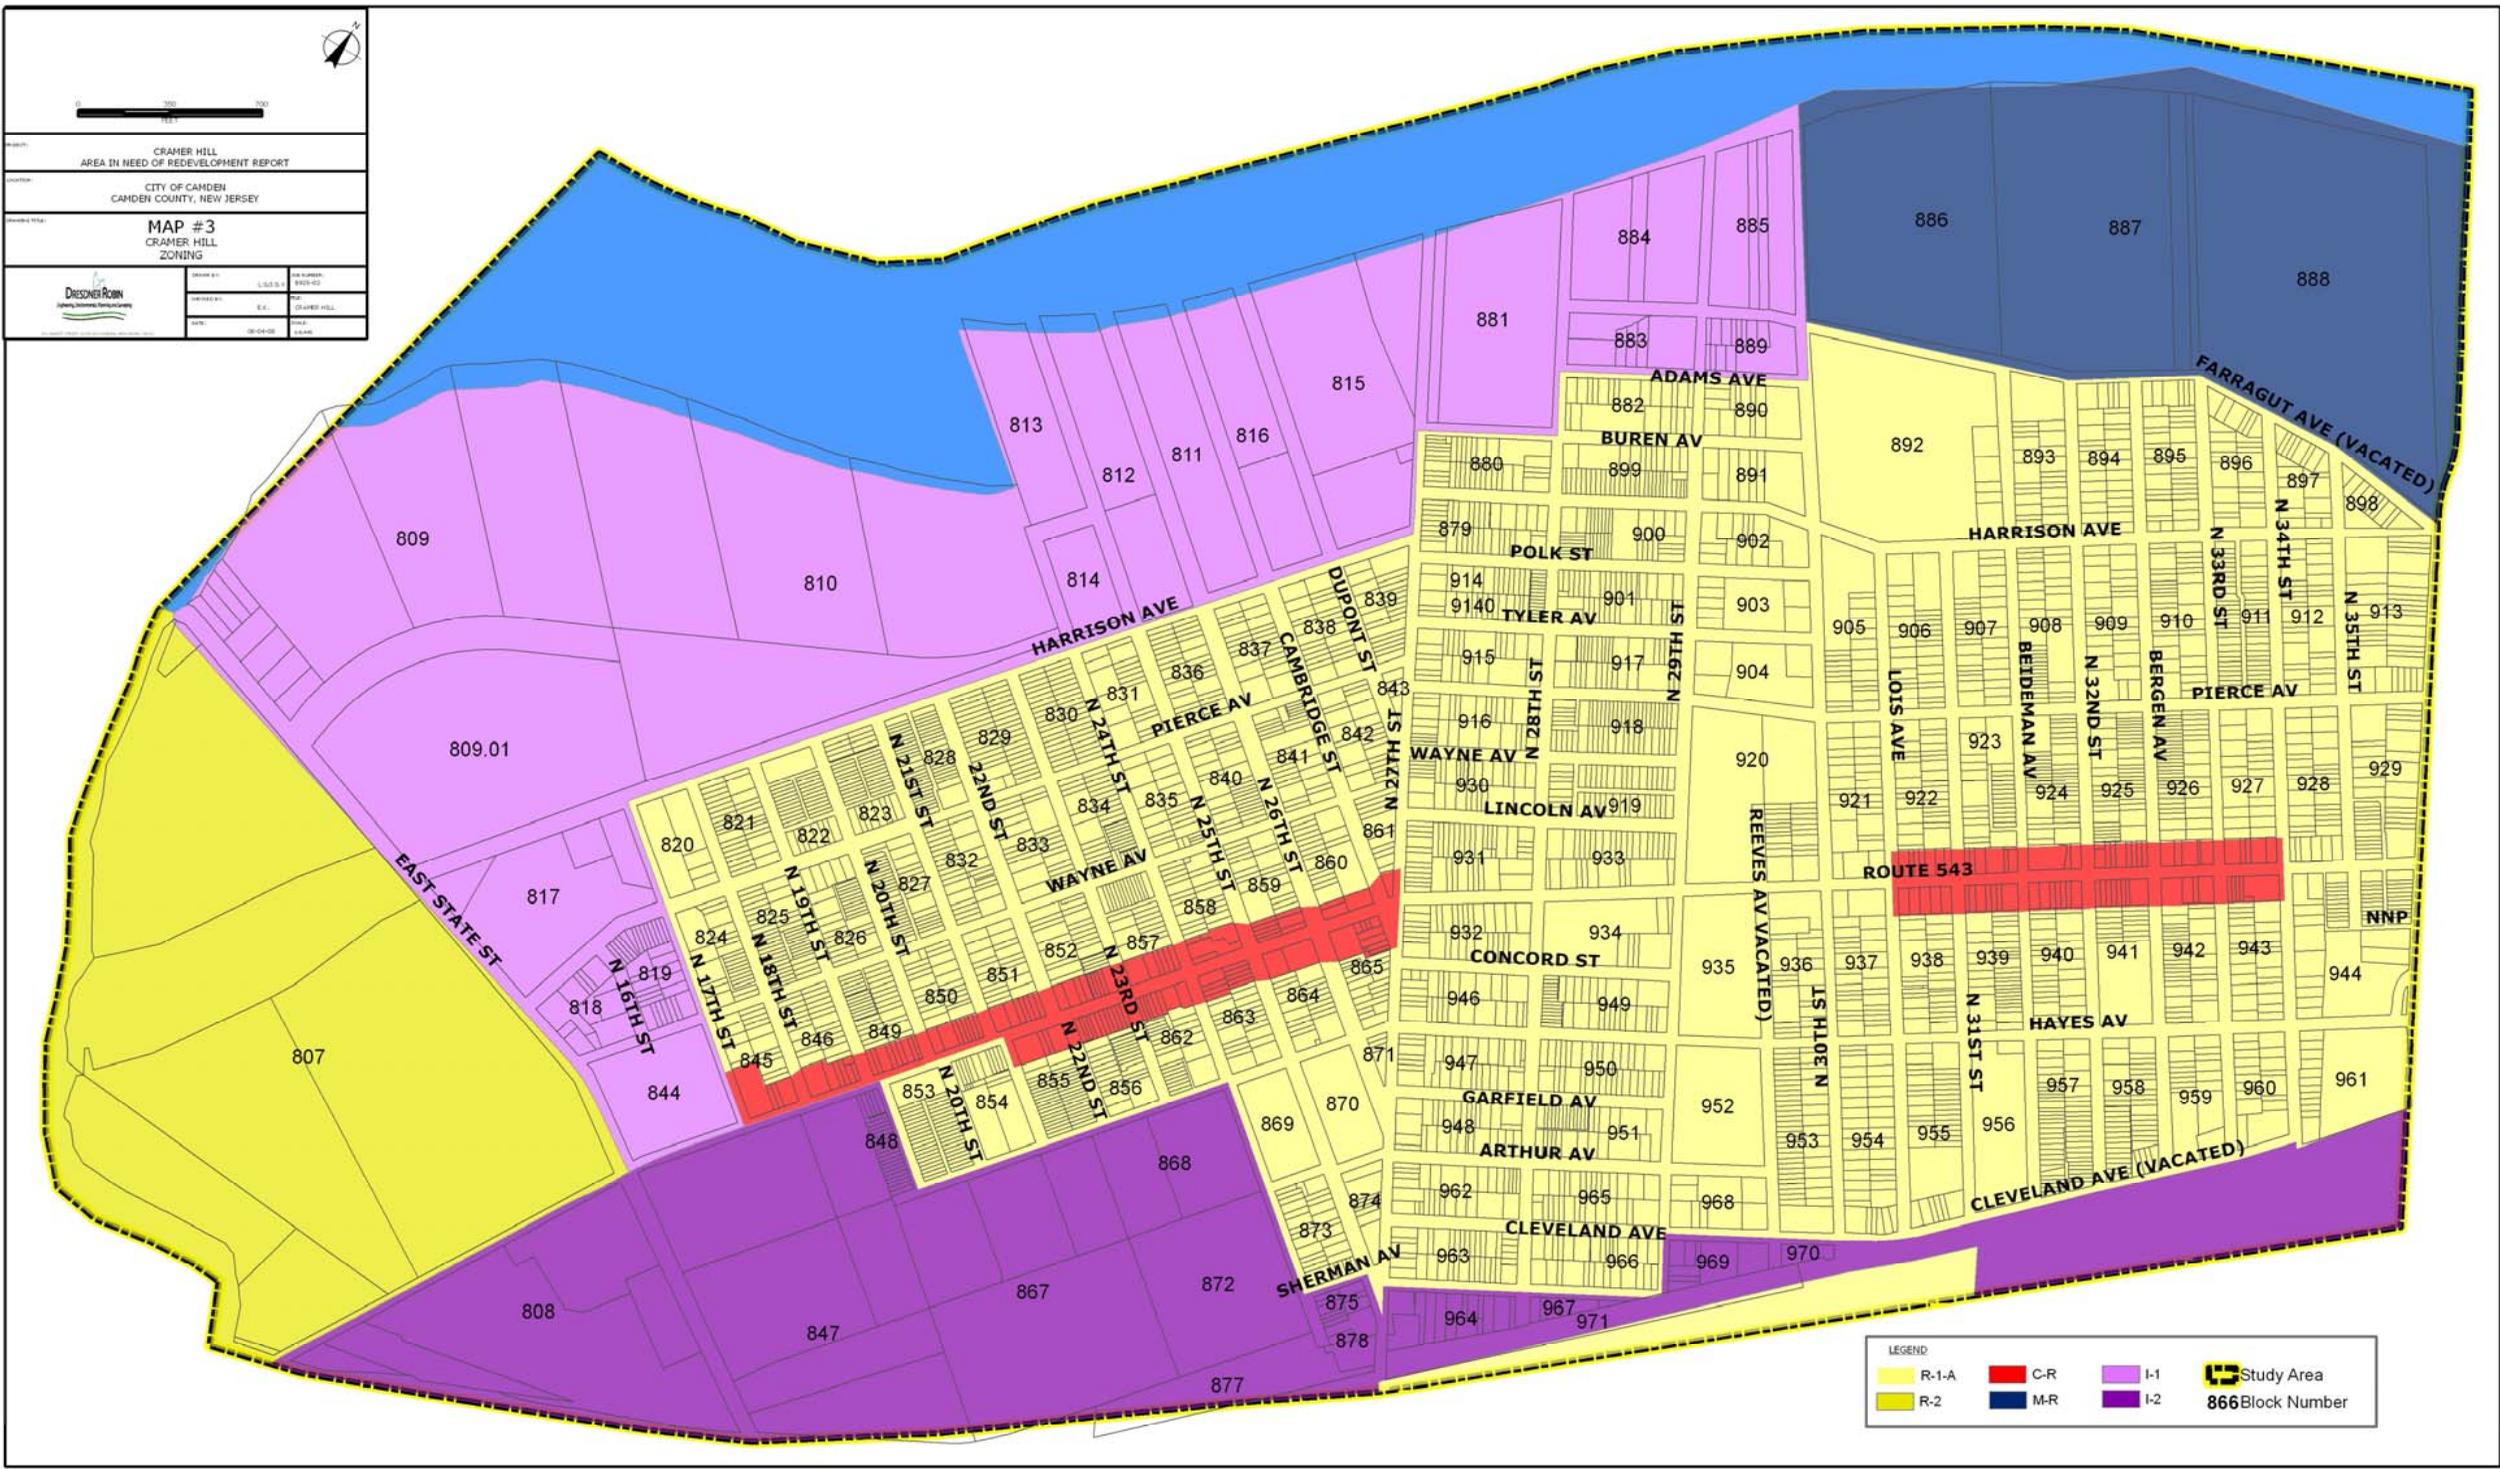

I-2 Industrial District: provides for heavy industrial and manufacturing use. All uses are permitted that are allowed in the I-1 district. Specifically prohibited are: trailer camps; drive-in theaters; auction marts; disassembly plants; any use of materials with potential fire hazard or poisonous gases, chlorine or bleach manufacturing, arsenal manufacturing or storage of explosives or sulphuric hydrochloric acid manufacturing; place of public assembly; residential uses and adult entertainment uses.

CV-2: provides for various types of public and semi-public recreational development, conservation and other open space uses and activities that are consistent with the greenways component of the Future Camden Master Plan and the requirements of the New Jersey Freshwater Wetlands Act. All uses allowed in the CV-1 District are permitted, such as: biking, hiking and interpretive trails; fishing piers; small boat ramps; vista platforms; picnicking; beaches; gardens and other natural areas. Additional uses include: public parks and playgrounds; playfields; winter sports areas; swimming pools; commercial recreational facilities; cemeteries; amphitheaters, nature centers, community centers and environmental centers and marinas. Specifically prohibited are: motorized vehicle use (except on paved roads and boat launches) and the sale and consumption of alcohol.

The City of Camden zoning ordinance was last updated in 1978 and the current zoning is inappropriate for certain parts of the Study Area. Specifically, the land along the Back Channel of the Delaware River is zoned as Industrial and Manufacturing-Residence Mixed Use. While these industrial uses historically developed along the waterfronts throughout Camden and were integrated with residential neighborhoods, the mixing of residential and industrial uses is no longer considered conducive to healthy, safe and prosperous communities. Furthermore, these industrial uses limit the ability of local residents to access the waterfront, a key goal indicated in the New Jersey State Plan. The piecemeal ownership of public vacant lands and private industrial facilities along the Back Channel does a large disservice to the Cramer Hill neighborhood by limiting development and public use of the riverfront. The Camden Master Plan of 2002 recognizes that this area contains obsolete uses detrimental to quality of life in the neighborhood and in the future Land Use Plan for Cramer Hill designates these blocks as Mixed-Use Corridor, Medium-Density Residential, Community Facilities and Parks and Recreation & Open Space along with a small portion of Light Industrial.

B. Land Uses and Vacancy

The majority of properties (63%) in the Cramer Hill Study Area contain residential structures. 60% of lots in the Study Area contain attached, two-story row homes, 1.3% of lots in the Study Area contain multi-family buildings and 1.4% contains mixed-use residential / commercial buildings. The second most-prominent land use in the Area is undeveloped land, which makes up nearly one-third (29%) of the Study Area. Undeveloped land is used here to include any type of land use that does not contain a structure or other improvements, such as parking lots, side yards, gardens and completely unoccupied lots. Land uses not included in this category are parks land and rights of way.

In the site reconnaissance, side yards were defined as vacant parcels that were being maintained and were found under the same ownership as a residential or commercial structure on an adjacent parcel. Likewise, parking lots were defined as vacant lots being used for legitimate parking by an adjacent commercial, residential or institutional use under the same ownership. A total of 8.7% of Study Area parcels are recognized as side yards, 0.6% are parking lots, 0.2% are gardens and 19.4% are unoccupied or vacant lots. In total, there are 229 publicly-owned vacant properties in the Study Area, which account for 21% of the total number of undeveloped lots.

The majority of vacant lots, and the largest vacant lots in the Study Area, are located on formerly industrial parcels along the Back Channel of the Delaware River to the northwest and Cooper River to the southwest. Most of these large, vacant waterfront properties are owned by the City of Camden. Additional vacant lots are scattered throughout the Study Area blocks, yet are more prevalent in blocks near the periphery of the neighborhood. In addition to residential uses and vacant parcels, there are a number of commercial, institutional and industrial properties in this neighborhood as well. 1.5% of the parcels in the Study Area are strictly commercial and 1.4% are mixed-use residential/commercial. Most commercial lots are located along the River Road / River Avenue commercial corridor, running northeast to southwest through the Study Area. Institutional uses occupy 1.6% of the parcels in the Study Area. These include churches, schools and other non-profit institutions. Many of these properties are located along the River Road / River Avenue corridor while the remaining sites are scattered throughout the neighborhood.

2.2% of the parcels in the Cramer Hill Study Area house industrial operations, many of which are large lots and some of which cover entire city blocks. These industrial uses are located primarily along the Back Channel of the Delaware River at the northwestern edge of the neighborhood and adjacent to the rail right-of-way along the southeastern border of the Area. A total of 0.2% of all parcels in the Study Area are designated as “Right of Way” for Conrail freight lines and New Jersey Transit passenger rail lines, located in the south and southeastern portions of the neighborhood. An important feature of Cramer Hill is its open space. At the northern end of the neighborhood is Von Neida Park, which is 18.75 acres and cuts through the neighborhood on a northwest-southeast axis. The park contains baseball fields, playgrounds, basketball courts and other uses. The park constitutes 2.6% of the Study Area parcels.

The mixed uses found in the Cramer Hill neighborhood, its transit accessibility and its ample open space provide the potential for a very walk able, accessible community with high levels of public activity. The River Road / River Avenue commercial corridor interconnected street grid and Von Neida Park are a strong infrastructure foundation. Diverse land uses, including commercial parcels interspersed on corner lots within residential neighborhoods is evidence of an organic, human-scale pattern of development. However, the neighborhood is plagued by an inordinately high number of unoccupied lots and other forms of vacant parcels, such as side yards and parking lots. These vacant properties detract from neighborhood vibrancy, provide a venue for criminal activity and are an inefficient use of urban land. These vacant parcels

must be addressed as potential sites for infill development that will add to the current mix of residential and commercial uses.

Additionally, the neighborhood is surrounded by industrial uses that have naturally occurred along riverfronts and rail lines. These industrial uses must be addressed individually to determine whether their location remains appropriate according to present and future planned land uses and whether their presence is contributing to the decay experienced by the Cramer Hill neighborhood. For instance, the industrial uses along the Back Channel of the Delaware River are particularly detrimental to the Cramer Hill neighborhood in that they restrict public access to the riverfront and represent a “blighting” influence on the adjacent residential area, as evidenced by the fact that many of the residential blocks bordering the area show higher rates of dilapidation and vacancy.

These ten industrial lots located on five blocks along the Back Channel are owned and operated by two companies. Express Marine (also identified as Tucker Towing), a barge transportation service, operates on five contiguous lots in the northern portion of this area (Block 883, Lot 5; 884, Lot 3 and Block 885, Lots 4, 11 and 21). Riverfront Recycling, a Class B recycling facility, is located on five contiguous lots to the southwest: Block 811, Lot 8; Block 812, Lots 3 and 4 and Block 816, Lots 2 and 8. Additionally, Riverfront Recycling operations are encroaching upon Lots 7 and 9 of Block 815, both of which are owned by the City of Camden. Furthermore, Riverfront Recycling has accrued a number of violations for unlawful operations and environmental contamination and has recently even lost its license as a recycling facility. (These violations are documented in files from the New Jersey Department of

Environmental Protection, Appendix D.) These five blocks are the only waterfront industrial uses that remain in Cramer Hill, including the Back Channel and Cooper River waterfronts. The remainder of the area consists of vacant lands. The Back Channel waterfront is primed for redevelopment, which could provide the benefits of open space and waterfront access to local residents as well as improve property values and reduce the blighting patterns in adjacent residential areas. The exception of these lots, currently in industrial use, detracts from the ability to implement comprehensive redevelopment of the Cramer Hill waterfront.

The City of Camden has prioritized waterfront revitalization in its citywide vision for the future in the City of Camden Master Plan (2002). Additionally, the State of New Jersey supports this notion, specifying public access to coastal and waterfront areas as a statewide policy in the State Redevelopment Plan (2001). Furthermore, the State Plan emphasizes the need for the demolition or relocation of industrial uses where “redevelopment opportunities may be increased by land assembly.” In short, both the City and the State support the vision of comprehensive redevelopment of the Cramer Hill waterfront, and the relocation of incongruent and obsolete industrial uses. It is necessary to acknowledge the potential of the existing industrial uses to cause further detriment to the adjacent residential neighborhood as well as the benefit of opening up the waterfront area as a public park and greenway, linking directly to the Von Neida park system. A comprehensive redevelopment effort in this area is the primary means by which the inaccessible and underutilized waterfront land can be redeveloped to a public open space providing ecological, social and

health benefits to the Cramer Hill neighborhood and City of Camden. Below is a breakdown of the current land uses identified in the Cramer Hill neighborhood. **Map 4 delineates all land uses in the Study Area.** * Institutional land uses include all active churches, schools and government buildings.

Land Use	Number of Lots	Percent of Study Area Lots
Residential	2265	60%
Multi-family Residential	48	1.3%
Residential / Commercial	53	1.4%
Commercial	57	1.5%
Institutional*	59	1.6%
Industrial	82	2.2%
Garage	10	0.3%
Side Yard	327	8.7%
Garden	7	0.2%
Parking Lot	22	0.6%
Unoccupied Lot	731	19.4%
Right of Way	9	0.2%
Park	100	2.6%
TOTAL	3770	100%

C. Building Conditions

The following methods were used in gathering information and preparing a physical condition survey of the Study Area. The site reconnaissance and data collection described below was conducted and overseen by a professional licensed planner.

- a. Parcel ownership, land use, lot assignments, size and assessed value were obtained from the municipal tax records for the Study Area parcel. When necessary, land use categories were modified through field surveys. Dresdner Robin made every effort to verify tax record information through field surveys, but takes no responsibility for the correctness of tax record information provided by the City of Camden.
- b. A physical survey of the property was conducted to determine the general physical condition for the parcel within the Study Area, and where necessary to modify characteristics obtained from the tax records. The criteria for the evaluation of the condition of buildings and properties consisted of those factors that would indicate the generality of active maintenance and investment, or the lack thereof, in the residence, business, plant or property surveyed. Building and property condition was determined by focusing on certain indicators such as the following: windows, entranceways, siding, brickwork, cornices, sidewalks and curbing, evident rubbish, foundations and retaining walls, fencing, arrangement of driveways, parking and loading areas, relationship of buildings and land use to the surrounding area, condition of pavement and the grounds in general. Factors which weighed against a positive rating included: cracks and fissures in masonry or concrete,

broken windows, rotted and deteriorated wood elements, missing or damaged siding sections, evident debris and poor maintenance of the grounds or lot areas, rusted or broken fencing elements, damaged or missing sidewalk areas and overcrowding or excessive coverage of buildings and land-use.

Building conditions were assessed during site reconnaissance conducted and overseen by a professional licensed planner. Building conditions were evaluated as either: “Good,” “Fair” or “Poor” according to descriptive standards set forth by Dresdner Robin. The following descriptive standards were also used for evaluating the physical conditions of the buildings where applicable:

Good- A structure with no noticeable building code violations. However, it may need minimal improvements, e.g. painting, woodwork, replacing of windows sash.

Fair- A structure, which is beginning to deteriorate, noted by an urgent need for painting, replacement of windows, repair of fire escapes, steps, and roof repairs.

Substandard- Structure indicating several major maintenance problems or code violations. Such problems or code violations include electrical, plumbing, and/or heating, ventilating, air conditioning systems, etc. Other significant conditions are those deemed to be unsafe, unsanitary, obsolete or

possess any such characteristics, or are so lacking in light, air or space as to be conducive to unwholesome human occupation.

Dilapidated- A structure in the advanced stages of deterioration is considered to be substandard, unsafe, unsanitary or obsolete. These buildings possess major code violations and maintenance problems so as not to be fit for human habitation or fall into so great a state of disrepair as to be untenable.

The physical survey revealed that a majority of the parcels containing structures in the Cramer Hill Study Area are in “Good” (18.8%) or “Fair” (66.6%) condition. Conversely, 14.6% of structures are in “Poor” condition. Poor condition buildings typically suffered from physical dilapidation due to lack of maintenance as well as vandalism, evidenced in broken windows, rotting wood, water damage, cracked foundations and other structural damage. The majority of structures found in the Cramer Hill Study Area (88%) are residential buildings. The number of “Poor” condition structures is low compared to nearby Camden neighborhoods, which often have higher levels of decaying housing. Nevertheless, these “Poor” condition buildings represent a significant portion of Cramer Hill parcels and are strong indicators of the need for reinvestment. Dilapidated and vacant structures are present on almost every block in the Study Area. The table below describes the building conditions found in the property survey. **Map 5 shows building conditions of all parcels with structures in the Area.**

Building Condition	Number of Lots	% Lots Containing Buildings
Good	485	18.8%
Fair	1713	66.6%
Poor	376	14.6%
TOTAL	2574	100%

*This table

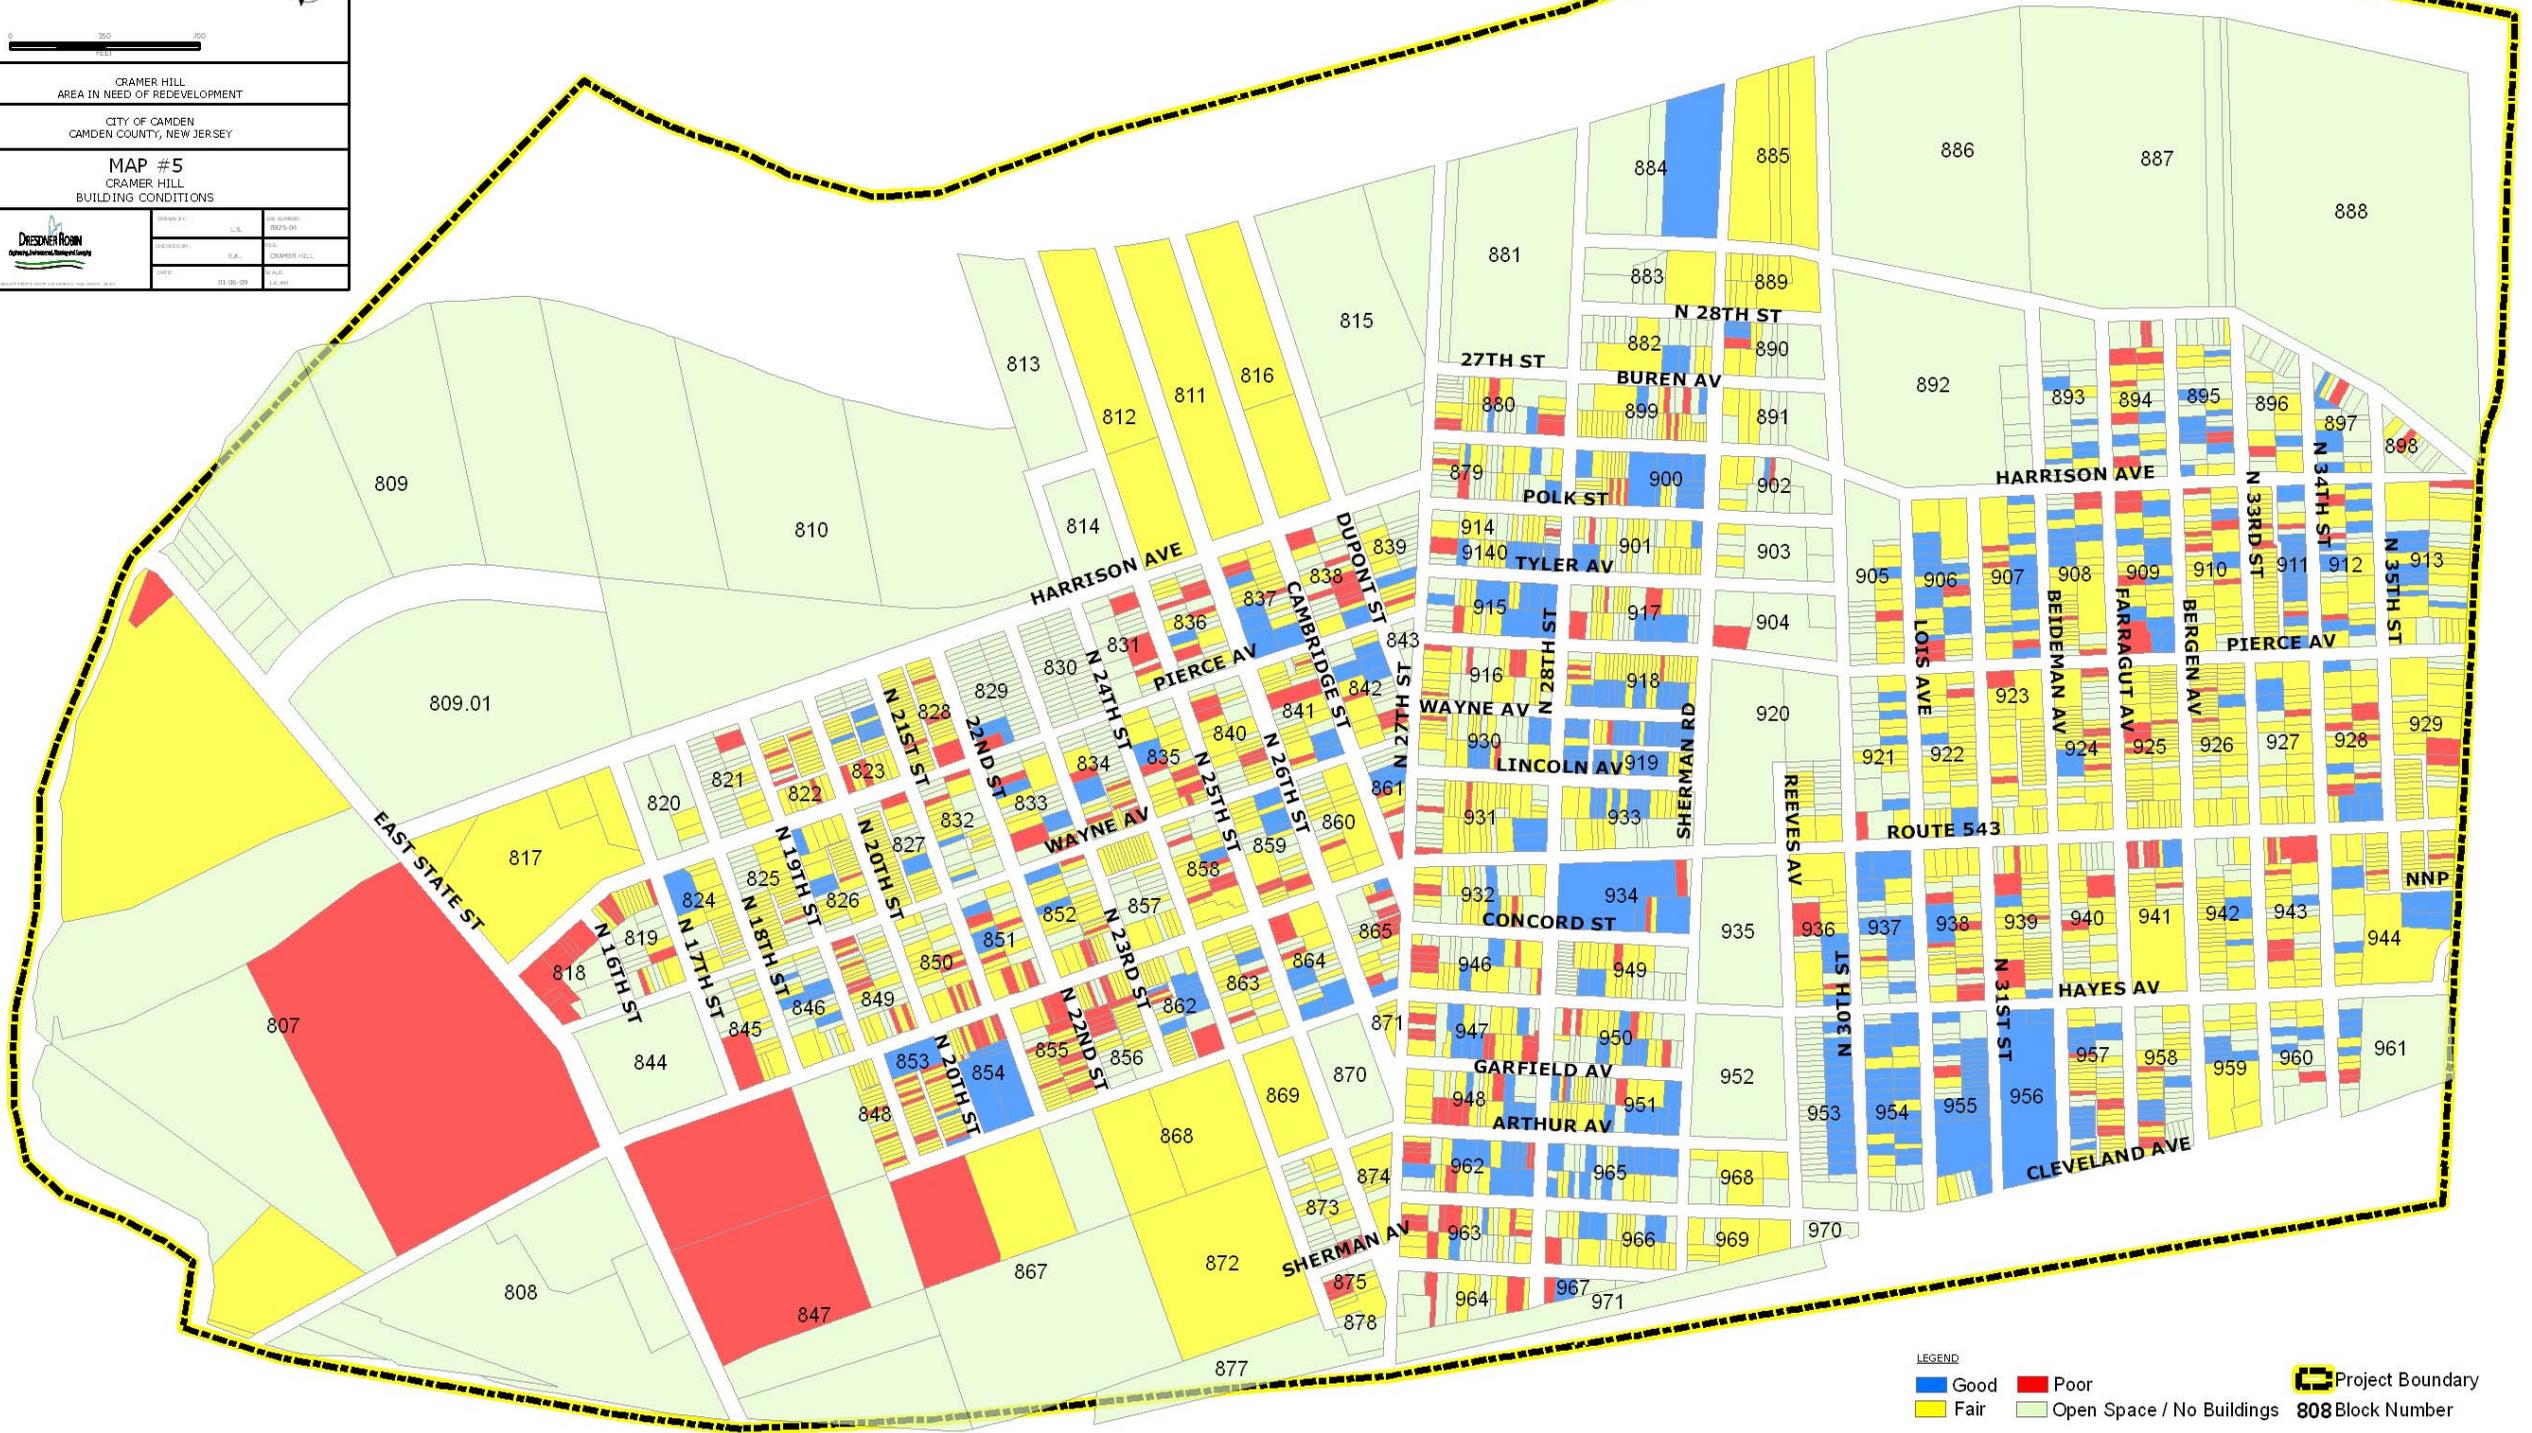

includes *only* parcels with buildings. Undeveloped lots, park space and rights of way are not included.

Note - "Parks and Vacant Land" includes Vacant Lots, Railroad, Water Tower, Driveways, Sideyards and Parking Lots

D. Occupancy

Occupancy was assessed during site reconnaissance as a category separate from land use, due to the fact that each building and / or lot has both a use and an occupancy status. In the occupancy field, each parcel was judged by whether it was being utilized (as a building or lot). The three categories of occupancy reflect this status: “Occupied” signifies an occupied building or utilized lot, “Vacant Building” signifies an unoccupied building and “Vacant Lot” signifies an unutilized lot. Additionally, a total of 197 buildings in the Study Area (5%) are vacant, abandoned and boarded-up buildings. These represent 50% of the “Poor” condition buildings. 164 of these boarded-up buildings are residential. Abandoned buildings such as these are particularly detrimental to residential neighborhoods, as they harbor vermin, induce vandalism and provide a venue for criminal activity, thereby affecting the property values and quality of life of the surrounding community.

A total of 731 parcels are “Vacant Lots,” representing a total of 20% of the parcels in the Study Area. These are parcels of land that are serving absolutely no use, and are currently abandoned or not maintained by their owners. The remainder (2742 lots) are occupied lots in that they are currently in use. These include both occupied buildings *and* occupied parcels of land that do not contain buildings. Examples of “Occupied” lots that do not qualify as “Vacant Lots” are side yards, gardens, parking lots and rights of way. A side yard is defined as open land that is currently being maintained as yard space and is under the same ownership as an adjacent residential, commercial or institutional lot. A parking lot is defined as spaces that are currently being used for automobile parking and are under the same ownership as an

adjacent residential, commercial or institutional lot. A garden is a fully productive garden, under public ownership and a right-of-way is land utilized for transportation and owned by a transit company.

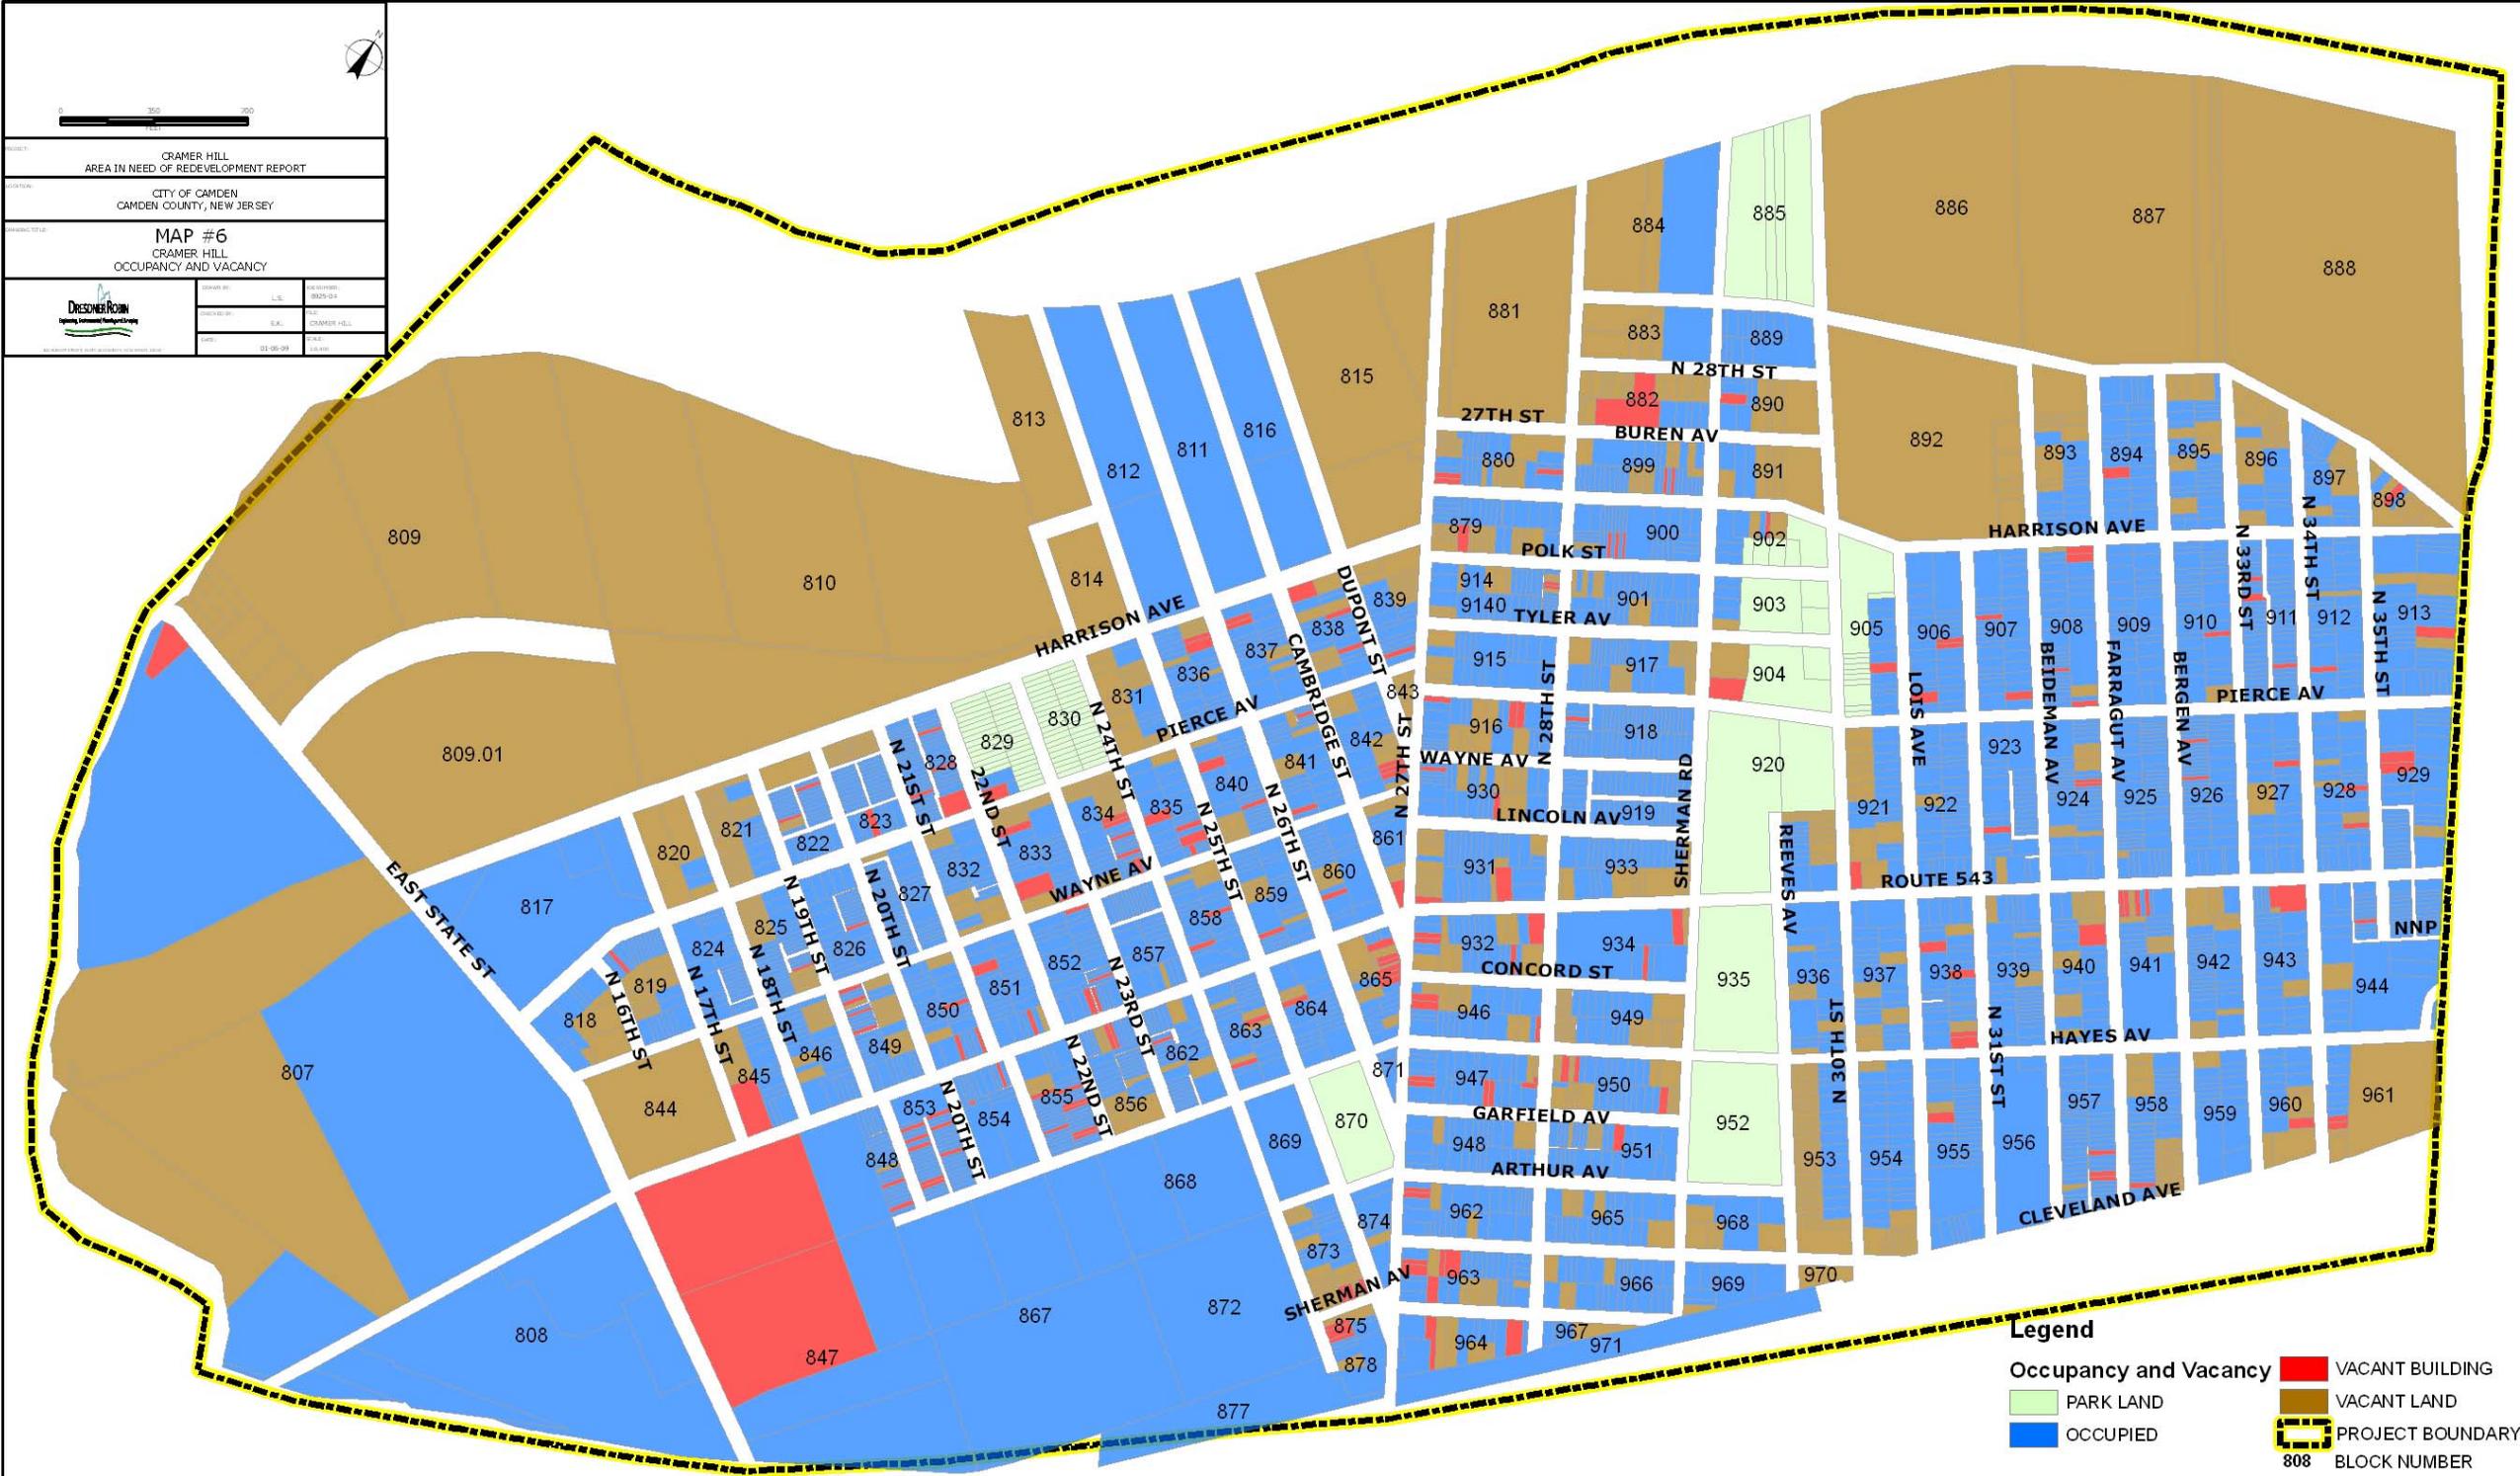

Occupancy	Number of Lots	Percent of Study Area Lots
Occupied Lots	2742	75%
Vacant Land	731	20%
Vacant Buildings	197	5%
TOTAL	3670	100%

*This table does *not* include parcels serving as park space (100 parcels).

E. Environmental Conditions

New Jersey state law (NJSA 58:10B-23d) states that a brownfield is “any former or current commercial or industrial site that is currently vacant or underutilized and on which there has been, or there is suspected to have been, a discharge of a contaminant.” Sections of Cramer Hill have traditionally been home to a variety of industrial uses and therefore contain potentially contaminated sites which may require environmental remediation before redevelopment can occur. There are twelve sites in Cramer Hill that have been identified by the New Jersey Department of Environmental Protection as Known Contaminated Sites and four brownfields identified by the City of Camden. These sites cover a total of fifty (50) lots on fourteen (14) blocks. These blocks and lots that contain contamination are listed below. Active and dormant industrial sites, as well as large vacant lots, may contain contamination and therefore have been designated as suspected contamination sites. The block and lot locations of these ninety-five (95) sites with suspected contamination are also listed below. **Map 7 displays the location of known and suspected contaminated sites and brownfields.** The information summarized in this section does not confirm or guarantee the absence or presence of disposed hazardous waste or environmental concerns on any property within the Study Area.

Known Contaminated Sites:

Block 807, Lots 1.01, 2, 2.01

Block 809, Lots 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17

F. Property Ownership

Parcels in the Cramer Hill Study Area are owned predominantly by private entities, such as individuals and businesses, which own 86.7% of properties. Non-profits and institutions, such as churches, hospitals and schools, own 2.5% of properties. 10.8% of the Study Area parcels are owned by public entities including the City of Camden, Camden Redevelopment Authority, City of Camden Housing Authority, Camden County (including the Camden County Improvement Authority and the Camden County Municipal Utilities Authority) and NJ Transit. The high level of public ownership in the Area points to the economic decline which Camden has witnessed over the past fifty years. As building owners were no longer able to maintain their homes, buildings were abandoned and left to deteriorate. Eventually these debilitated structures were purchased by public entities or foreclosed upon by the City of Camden due to lack of tax payments. They remain public properties due to a general lack of investment by the private sector.

At the time of this survey, 21% of all vacant parcels were owned by the City of Camden or another public entity. On most of the publicly-owned parcels, the structures had been removed and the lots cleared in order to eliminate unsafe conditions. Public ownership and maintenance of these parcels is thus paving the way for future redevelopment. However, 94% of the “Poor” condition buildings (376 parcels) remain privately owned. Private ownership of these dilapidated and vacant buildings that are dispersed throughout the neighborhood signifies the need for broad-scale redevelopment where public entities rehabilitation assistance for homeowners and business owners.

Below is a table outlining the different types of land owners in the Study Area. **See Map 8 for a parcel-by-parcel breakdown of ownership between public entities, non-profit organizations, private entities and rights-of-way.**

Land Ownership	Number of Lots	Percent of Study Area Lots
Public*	409	10.8%
Institutional/Non-Profit**	93	2.5%
Private	3268	86.7%
TOTAL	3770	100%

*Public ownership denotes the City of Camden, Camden Redevelopment Authority, City of Camden Housing Authority, Camden County (including the Camden County Improvement Authority and Camden County Municipal Utilities Authority) and NJ Transit.

IV. CRITERIA FOR DETERMINATION OF NEED FOR REDEVELOPMENT OR REHABILITATION

The Local Redevelopment and Housing Law (LRHL) lays out the criteria that an area must meet to qualify as an area in need of redevelopment or rehabilitation. If an area is found to be in need of redevelopment, a redevelopment plan will be prepared and broad powers will be given to the municipality to redevelop the area, including eminent domain. If an area is found to be in need of rehabilitation, the municipality shall have the same powers as in an area in need of redevelopment with the exception of eminent domain. The Study Area may be determined to be in need of **redevelopment** if, after investigation, notice and hearing, as provided within NJSA 40A:12A-6, the governing body concludes by resolution that within the study area, any of the following conditions are found:

- a. The generality of buildings are substandard, unsafe, unsanitary, dilapidated, or obsolescent, or possess any of such characteristics, or are so lacking in light, air or space, as to be conducive to unwholesome living or working conditions.
- b. The discontinuance of the use of buildings previously used for commercial, manufacturing, or industrial purposes; the abandonment of such buildings; or the same being allowed to fall into so great a state of disrepair as to be untenable.
- c. Land that is owned by the municipality, the county, a local housing authority, redevelopment agency or redevelopment entity, or unimproved vacant land that

has remained so for a period of ten years prior to adoption of the resolution, and that by reason of its location, remoteness, lack of means of access to developed sections or portions of the municipality, or topography, or nature of the soil, is not likely to be developed through the instrumentality of private capital.

- d. Areas with buildings or improvements which, by reason of dilapidation, obsolescence, overcrowding, faulty arrangement or design, lack of ventilation, light and sanitary facilities, excessive land coverage, deleterious land use or obsolete layout, or any combination of these or other factors, are detrimental to the safety, health, morals, or welfare of the community.
- e. A growing lack or total lack of proper utilization of areas caused by the condition of the title, diverse ownership of the real property therein or other conditions, resulting in a stagnant or not fully productive condition of land potentially useful and valuable for contributing to and serving the public health, safety and welfare.
- f. Areas, in excess of five contiguous acres, whereon buildings or improvements have been destroyed, consumed by fire, demolished or altered by the action of storm, fire, cyclone, tornado, earthquake or other casualty in such a way that the aggregate assessed value of the area has been materially depreciated.
- g. In any municipality in which an enterprise zone has been designated pursuant to the "New Jersey Urban Enterprise Zones Act," P.L. 1983, c.303 (C.52:27H-60 et seq.) the execution of the actions prescribed in that act for the adoption by the

municipality and approval by the New Jersey Urban Enterprise Zone Authority of the zone development plan for the area of the enterprise zone shall be considered sufficient for the determination that the area is in need of redevelopment pursuant to sections 5 and 6 of P.L. 1992, c.79 (C.40A: 12A-5 and 40A: 12A-6) for the purpose of granting tax exemptions within the enterprise zone district pursuant to the provisions of P.L. 1991, c.431. (C.40A:20-1 et seq.) or the adoption of a tax abatement and exemption ordinance pursuant to the provisions of P.L. 1992, c.441 (C.40A:21-1 et seq.). The municipality shall not utilize any other redevelopment powers within the urban enterprise zone unless the municipal governing body and planning board have also taken the actions and fulfilled the requirements prescribed in P.L. 1992, c.79 (C.40A: 12A-1 et seq.) for determining that the area is in need of redevelopment or an area in need of rehabilitation and the municipal governing body has adopted a redevelopment plan ordinance including the area of the enterprise zone.

- h. The designation of the delineated area is consistent with New Jersey Smart Growth planning principles adopted pursuant to law or regulation.

The Study Area may be determined to be in need of **rehabilitation** if, after investigation, notice and hearing, as provided within NJSA 40A:12A-14, the governing body concludes by resolution that within the Study Area, any of the following conditions are found:

- a. (1) A significant portion of the structures therein are in a deteriorated or substandard condition and there is a continuing pattern of vacancy, abandonment or underutilization of properties in the area, with a persistent arrearage of property tax payments thereon, or (2) More than half of the housing stock in the delineated area is at least 50 years old, or a majority of the water and sewer infrastructure in the delineated area is at least 50 years old and is in need of repair or substantial maintenance; and, (3) A program of rehabilitation, as defined in section 3 of P.L. 1992, c. 79 (C.40A:12A-3), may be expected to prevent further deterioration and promote the overall development of the community. Where warranted by consideration of the overall conditions and requirements of the community, a finding of need for rehabilitation may extend to the entire area of a municipality.

- b. A delineated area shall be deemed to have been determined to be an area in need of rehabilitation in accordance with the provisions of this act if it has heretofore been determined to be an area in need of rehabilitation pursuant to P.L. 1975, c.104, P.L. 1977, c.12 or P.L. 1979, c.233.

V. ANALYSIS

A. Area in Need of Rehabilitation

An analysis of the collected data, as well as field observations documented that the Cramer Hill Study Area manifests numerous signs of deterioration and disinvestment. However, it was also apparent that Cramer Hill is one of the least blighted and most resilient neighborhoods in the City of Camden, and many of its parcels remain physically sound. Therefore, the majority of the Cramer Hill neighborhood (125 blocks) is recommended to be an Area in Need of Rehabilitation pursuant to the “Local Redevelopment and Housing Law” (NJSA 40A:12A-14). These 125 blocks consist of residential blocks and park space and are all located within the interior portion of the Cramer Hill Study Area. These blocks, while containing a significant number of vacant lots and dilapidated homes, did not manifest blight to the extent of the remaining 51 blocks that are designated as an Area in Redevelopment later in this document.

Subsection 1 requires that “a significant portion of the structures therein are in a deteriorated substandard condition and there is a continuing pattern of vacancy, abandonment or underutilization of properties in the area.” As previously stated, approximately fifteen percent (15%) of the buildings found in the Study Area are in “poor” condition, which includes substandard and deteriorated, yet habitable, structures as well as vacant, boarded up buildings that are not fit for residence. A total of twenty-nine percent (29%) of all parcels in the Study Area are vacant lots.

Taken together, these statistics show a widespread pattern of dilapidation, vacancy, abandonment and underutilization throughout the Study Area.

Subsection 2 states that an area is in need of rehabilitation if “more than half of the housing stock in the delineated area is at least 50 years old, or a majority of the water and sewer infrastructure in the delineated area is at least 50 years old and is in need of repair or substantial maintenance.” A majority of the housing stock and the sewer systems meet this standard. As previously stated, the City of Camden saw its greatest growth between 1870 and 1920, coinciding with the rise of industry in the area, including the Cramer Hill neighborhood. The vast majority of housing in the area is comprised of small row houses and townhouses constructed during the late 19th and early 20th century, and the infrastructure to support this population growth was also constructed during this time frame. As noted in the 2002 City of Camden Master Plan, 70% of the housing stock in the City was built prior to 1950. Thus, the vast majority of the housing stock and water and sewer infrastructure in this area is at least 50 years old.

Subsection 3 states that an area is in need of rehabilitation if “a program of rehabilitation may be expected to prevent further deterioration and promote the overall development of the community.” For the reasons stated above, it is clear that municipal action is necessary to promote stabilization and growth in the Cramer Hill Study Area, and would be expected to prevent further deterioration and promote the overall development of the community. These 125 blocks are in need of a comprehensive rehabilitation strategy to preserve their assets and improve areas

which have suffered from community disinvestment. To be successful, this effort must also be complemented by a comprehensive redevelopment process.

B. Area in Need of Redevelopment

In order to effect successful, long-term rehabilitation of the 111 blocks recommended as an Area in Need of Rehabilitation, this effort must be coupled with a comprehensive redevelopment of the most blighted and deteriorated blocks within the Study Area. These remaining 52 blocks, which will be addressed in the following section, contain the highest rates of land vacancy, building vacancy, dilapidated buildings and deleterious and obsolete land uses. It is apparent that these blocks are already having a pointed effect on the residential portion of the Cramer Hill neighborhood, as the poorest condition residential blocks are located along the periphery of the neighborhood, adjacent to these blighted areas. If these 52 deteriorated blocks are left in their current state, there is a strong possibility that blocks now designated as an Area in Need of Rehabilitation will continue to decline.

An analysis of the collected data, as well as field observations, indicate that fifty-two (52) blocks of the Cramer Hill Study Area qualify as an Area in Need of Redevelopment pursuant to the “Local Redevelopment and Housing Law” (NJSA 40A:12A-1 *et.seq.*): A lot-by-lot analysis of the Study Area revealed that a significant majority (approximately 70%) of the lots in each of the 52 blocks met one or more of the area in need of redevelopment criteria as set forth by the “Local Redevelopment and Housing Law” (NJSA 40A: 12A-1 *et seq.*). These blocks, containing high levels

of dilapidated housing, vacant lands, obsolete and deleterious land uses and other forms of underutilization were deemed in need of a comprehensive redevelopment strategy. These 52 blocks constitute approximately twenty-three percent (31%) of the entire Study Area of 163 blocks. These 52 blocks are designated as the Cramer Hill Area in Need of Redevelopment pursuant to the “Local Redevelopment and Housing Law” (NJSA 40A:12A-1 *et.seq.*), as listed below:

807, 808, 809, 809.01, 810, 811, 812, 813, 814, 815, 816, 817, 818, 820, 821, 831, 833, 836, 837, 838, 839, 843, 844, 845, 847, 849, 861, 865, 867, 868, 872, 873, 881, 882, 883, 884, 885, 886, 887, 888, 890, 891, 892, 893, 896, 897, 898, 949, 953, 967, 968 and 969.

These 52 blocks form a semi-contiguous area that lines the perimeter of the Cramer Hill neighborhood and includes a handful of blocks in the interior residential portion of the neighborhood. The main swath of redevelopment blocks is located along the Back Channel and Cooper River to the west and south and along the New Jersey Transit / Conrail right-of-way. The interior residential blocks are located near the periphery of the neighborhood, adjacent to either the vacant, untended waterfront properties to the west or the industrial blocks to the south. Those blocks that are located within the interior of the neighborhood often contain additional factors which have caused them to be more susceptible to blight and underutilization, namely irregular shapes (the triangular-shaped blocks located at the center of the neighborhood along North 27th Street) and adjacency to Von Neida Park, where many lots near the park remain vacant.

Generally, the potential Redevelopment Area can be broken into three geographic sections. The first is the waterfront area located along the Back Channel and Cooper River, the second is located adjacent to the rail corridor, and the third consists of blocks located within the residential neighborhood. The majority of blocks in the waterfront areas and along the right-of-way are vacant, industrial and/or publicly owned. Those remaining are residential blocks located at the perimeter of the neighborhood that contain privately- and publicly-owned vacant lots and dilapidated and/or abandoned homes. Eighteen (18) of these blocks (807, 809, 809.01, 810, 811, 812, 813, 814, 815, 816, 881, 883, 884, 885, 886, 887, 888 and 892) form a contiguous area that covers the western and southern borders of the Cramer Hill

neighborhood along the waterfronts of both the Back Channel and Cooper River. Many of these 18 blocks contain large lots, with few or no lot subdivisions. Most lots are vacant and/or publicly owned, and those which are not vacant contain industrial uses. These blocks currently inhabit the I-1 Industrial and M-R Manufacturing-Residential districts. Additionally, four of these blocks (885, 886, 887 and 892) fall within the CV-2 Conservation Overlay district. The future land uses planned for this waterfront area by the City of Camden 2002 Master Plan are Parks and Recreation & Open Space, Residential, Mixed Development, Commercial/Open Space and Light Industrial.

Eight additional blocks (808, 817, 818, 844, 847, 867, 868 and 872) are located in the I-1 Industrial zone to the west and the I-2 Industrial zones along the rail corridor right-of-way to the south. These lots contain a variety of vacant, formerly industrial lands and dilapidated industrial buildings. Finally, 26 blocks (820, 821, 831, 833, 836, 837, 838, 839, 843, 845, 849, 861, 865, 873, 882, 890, 891, 896, 893, 897, 898, 949, 953, 967, 968 and 969) are located in the R-1-A Residential district in the interior of the Cramer Hill neighborhood. A number of these blocks border the formerly industrial and vacant waterfront area to the west and northwest, and some of these are vacant and unimproved, despite their residential designation. All of these blocks are located on or near the perimeter of the residential district. These blocks contain many dilapidated and abandoned residential buildings as well as scattered vacant lots. It is apparent that the formerly vacant and industrial blocks adjacent to these blocks are having a detrimental, blighting influence upon this area. **Map 9 displays the blocks contained in the Redevelopment and Rehabilitation Areas.**

C. Area-wide Analysis

As described in Section III (Criteria for Determination of Need of Redevelopment) numerous criteria of the Local Redevelopment and Housing Law (LRHL) pertain to areas, not just individual parcels. In addition to meeting Area in Need of Redevelopment criteria as set forth by the “Local Redevelopment and Housing Law” (NJSA 40A: 12A-1 et seq.) on an individual block basis, the entire Cramer Hill Area in Need of Redevelopment meets criteria “a,” “b,” “c,” “d,” “e” and “g” on an area-wide basis. Following is a description of these six criteria as they apply to the Area in Need of Redevelopment. Additionally, each criterion is applied individually in the subsequent Block by Block Analysis.

Criteria “a” applies to areas where the generality of buildings are substandard, unsafe, unsanitary, dilapidated, or obsolescent, or possess any of such characteristics, or are so lacking in light, air or space, as to be conducive to unwholesome living or working conditions. Some of the factors that contribute to a conclusion that a property meets the “a” criteria include: visible structural damage caused by water or lack of maintenance, broken windows, rotting wood elements on the façade, the abandonment of a residential property, general dilapidation of the façade of a building and buildings that have been boarded up by the Department of Public Works, many of which no longer had utility service or meters. Clearly boarded up houses, homes missing windows and homes without utilities are not habitable and are conducive to unwholesome living conditions. A detailed description of the methodology and descriptive evaluation of buildings conditions in the Study Area can be found in Section III.

In addition to being unsafe, unsanitary, dilapidated, substandard and obsolescent for their inhabitants, these buildings (particularly those which are vacant) pose a threat to nearby occupied residences as well. Vacant and dilapidated buildings can harbor vermin, induce vandalism, constitute a physical hazard, create an unattractive setting, are prone to fire and further decay, and provide a venue for drug usage and other criminal activity. A total of 9% of the lots in the Cramer Hill Redevelopment Area meet criterion “a” due to the fact that they contain “Poor” condition buildings in a state of extreme dilapidation conducive to unwholesome living or working conditions.

Criterion “b” refers to lots where the discontinuance of the use of buildings previously used for commercial, manufacturing, or industrial purposes; the abandonment of such buildings; or the same being allowed to fall into so great a state of disrepair as to be untenable. Factors that contribute to a conclusion that a property meets the “b” criterion include: boarded up storefronts, abandoned industrial bays and all conditions that fulfill any of the “a” criterion as it pertains to former commercial, manufacturing or industrial purposes. These unutilized, poor condition and abandoned industrial properties represent parcels that are untenable and therefore meet the “b” criterion. There are a number of former industrial and commercial sites in Cramer Hill, as well as many dilapidated industrial and commercial buildings, some of which are also vacant and abandoned. A total of 3% of the lots in the Cramer Hill Redevelopment Area meet criterion “b” due to the fact that they contain industrial or commercial facilities that are in “Poor” condition and are either abandoned or have been allowed to fall into so great a state of disrepair as

to be untenable. Requests have been made to the City of Camden Building Department to determine if any violations are present. No information has been received as of this date. Upon receipt, this information will be incorporated into the report.

Criterion “c” refers to “Land that is owned by the municipality, the county, a local housing authority, redevelopment agency or redevelopment entity, or unimproved vacant land that has remained so for a period of ten years prior to adoption of the resolution, and that by reason of its location, remoteness, lack of means of access to developed sections or portions of the municipality, or topography, or nature of the soil, is not likely to be developed through the instrumentality of private capital.” The Cramer Hill Redevelopment Area contains a number of publicly-owned and vacant lands, particularly in the large blocks along the Back Channel and Cooper River waterfronts. 28 out of the 52 blocks designated for redevelopment contain vacant lots and 23 out of the 52 blocks contain parcels owned by the City of Camden, Camden County or the Camden Redevelopment Agency. Specifically, a total of 61% of the lots located in the Redevelopment Area are vacant, and 33% of these vacant lots are owned by a public entity.

In addition to public ownership and vacancy, the Area in Need of Redevelopment meets criterion “c” in that its location, in a remote area with limited access to developed portions of the municipality, its topographic difficulties represented due to location within the floodplain *and* its identity as a distressed and disinvested urban neighborhood limit the possibility for redevelopment via private capital. First, a

number of the redevelopment blocks located directly along the Back Channel and Cooper River are detached from the Cramer Hill neighborhood and cannot be accessed at all via public streets. Specifically, waterfront blocks 813, 884, 885 and 886 have absolutely no public access routes. Additionally, blocks 809.01, 809, 810, 811, 812, 814, 815, 816, 883, 887, 888, 889 and 892, which are also located in the waterfront portion of Cramer Hill, have public access routes along only one of the block boundary lines, and thus many contain lots that cannot be reached via any public access route. The remoteness and lack of access to the adjacent developed neighborhood is one factor discouraging private investment in the development of these tracts along the Back Channel and Cooper River waterfronts. This is particularly significant in light of New Jersey’s statewide policy to provide public access to waterfront areas as well as the City of Camden’s view that waterfront usage for recreation and tourism is essential to citywide revitalization, as stated in the 2002 Master Plan.

Secondly, the majority of blocks in the Redevelopment Area are contained partially or entirely by the 100 year flood plain. 32 out of 52 blocks are located completely or partially within both the 100 year floodplain and the 500 year floodplain. One block, 891, only falls partially within the 500 year floodplain. Five blocks (867, 868, 869, 872 and 896) are not located within either the 100 year or 500 year floodplain. The fact that the majority of the Area is located within the floodplain constitutes a topographical difficulty that prevents private development as described within criterion “c.” **Map 10 displays the 100 year and 500 year floodplains.**

Finally, these waterfront lots and all of those contained in the Cramer Hill neighborhood have disproportionately low prospects for redevelopment via private capital due to their location in a distressed urban neighborhood. The state of community distress in Cramer Hill is evidenced by the high quantity of vacant lands (28.9% of parcels in the neighborhood are vacant); “poor” condition buildings (14.6% of buildings are in poor condition) and abandoned buildings (5% of buildings are abandoned). Despite the fact that Cramer Hill has proven more resilient than other neighborhoods of Camden, it nonetheless contains many signs of a distressed urban area suffering from disinvestment and abandonment requiring public intervention to enable the redevelopment of its most blighted blocks.

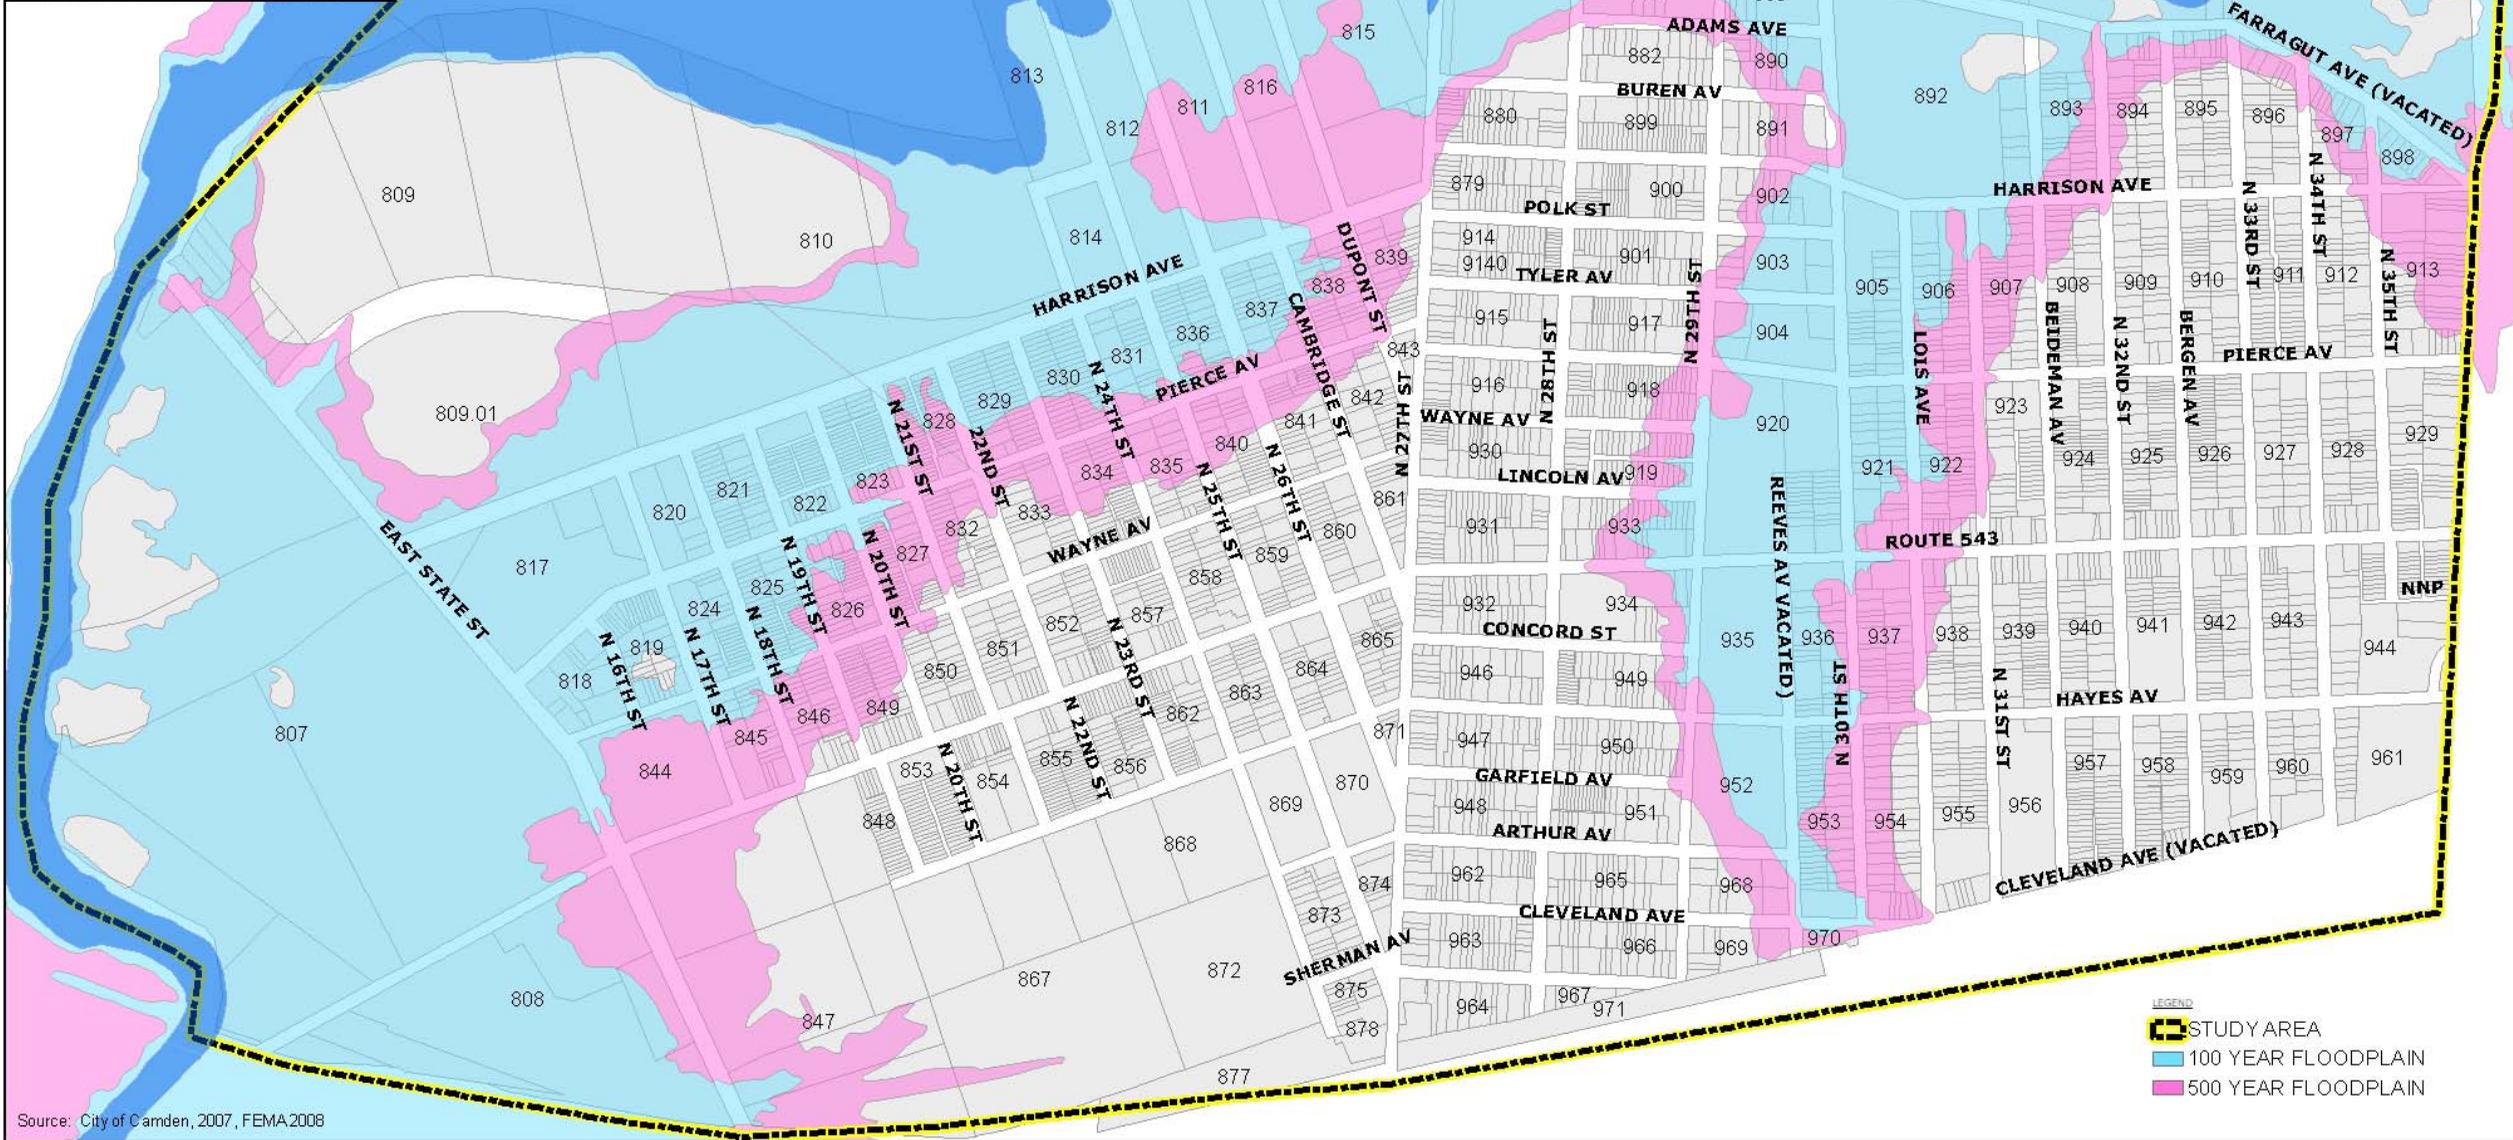

In addition to these local statistics, Cramer Hill suffers from citywide circumstances that discourage private development throughout City of Camden. Camden exhibits a low home ownership rate (46% in 2000 compared to the national and state rates of 66%), indicating community instability. The median value of owner-occupied homes in the City of Camden in 2000 was only \$40,700, compared to the state median of \$170,800 and the national median of \$119,600. The median household income in 1999 was only \$23,421, which was 42% of the state median and 53% of the national median. Additionally, 36% of Camden’s population lived below the poverty line in 1999, compared to 8.5% in the state of New Jersey and 12.7% nationwide. (U.S. Census 1999 and 2000) In addition, Camden has witnessed high crime rates in recent years. In 2003, the murder rate in the City of Camden was 6.69 times the national rate, total violent crime was 4.02 times the national rate and property crime was 1.49 times the national rate (2003 FBI Report of Offenses Known to Law

Enforcement). These statistics illustrating high vacancy rates, deteriorated housing stock, low household incomes, high crime rates, low owner occupancy rates and low home values depict Cramer Hill as a distressed urban neighborhood, where private interests are unlikely to invest. Rather, a comprehensive redevelopment mechanism is recommended to encourage and enable the revitalization of these 52 least accessible and most blighted blocks. In terms of marketing these publicly owned vacant lots. The City of Camden is generally not in the business to market individual lots, however, the redevelopment process and the creation of a redevelopment plan will in effect be the marketing for this area.

Criterion “d” pertains to “Areas with buildings or improvements which, by reason of dilapidation, obsolescence, overcrowding, faulty arrangement or design, lack of ventilation, light and sanitary facilities, excessive land coverage, deleterious land use or obsolete layout, or any combination of these or other factors, are detrimental to the safety, health, morals, or welfare of the community.” The Redevelopment Area meets criterion “d” due to the fact that there are obsolete and deleterious land uses represented within the blocks that result in specific and general threats to the safety, health and welfare of the community. These land uses (which include vacancy, industrial uses and dilapidated residential buildings) cause direct harm to the community by contributing a “blighting” force upon adjacent parcels, preventing public access to the waterfront and/or generally hindering the possibility for a comprehensive revitalization strategy.

 CRAMER HILL
 AREA IN NEED OF REDEVELOPMENT REPORT
 CITY OF CAMDEN
 CAMDEN COUNTY, NEW JERSEY
MAP # 10
 CRAMER HILL
 FLOODPLAIN MAP

LEGEND
 STUDY AREA
 100 YEAR FLOODPLAIN
 500 YEAR FLOODPLAIN

Source: City of Camden, 2007, FEMA 2008

To begin, a number of these 52 blocks are active industrial uses. While many meet the current zoning, being located in areas designated I-1 or I-2 Industrial, they are nonetheless obsolete uses that contribute to a detrimental pattern of land use that is not conducive to a healthy community. The current zoning dates from 1978 and the neighborhood, as well as acceptable limits of proximity between residential and industrial uses, has changed significantly since then. While residential and industrial uses were once tied together due to a necessity for proximate workforce housing, this is no longer the case. In addition, Camden's industrial sector has greatly declined since its height in the 1950s. Today, these industrial uses clearly reduce the quality of life in the community, as evidenced by the fact that the most blighted residential blocks are located near industrial areas. Furthermore, many of these industrial uses prevent public access to waterfront land, and in general inhabit land that could otherwise be redeveloped to improve, rather than harm, the local community.

The City of Camden clearly recognizes the fact that these industrial blocks are obsolete and deleterious uses, as the future Land Use Plan for the Cramer Hill neighborhood as depicted in the 2002 City of Camden Master Plan recommends almost entirely new uses for this portion of the neighborhood. Those blocks along the Back Channel and Cooper River, which are currently zoned I-1 Industrial and Manufacturing / Residential are designated as Mixed-Use Corridor, Medium-Density Residential and Community Facilities and Parks and Recreation & Open Space in the future, with a portion of waterfront land maintained as Light Industrial. Hence, nearly all of the blocks along the Back Channel that are vacant lots or industrial

parcels are obsolescent land uses due to inconsistency with the Camden Master Plan.

Currently, only seven blocks along the Cooper River and the Back Channel in Cramer Hill continue to possess industrial facilities. The remaining 11 blocks are completely vacant, with the exception of one block that contains multi-family housing developments. This fact in itself illustrates the changing character of waterfront land. In order to encourage a comprehensive redevelopment effort along the waterfront, it is essential that all industrial uses be removed and that land is available for future uses that will benefit, rather than harm, the community. The New Jersey State Development and Redevelopment Plan (2001) likewise emphasizes this notion, instructing that industrial uses be demolished or relocated where "redevelopment opportunities may be increased by land assembly." Thus, even those blocks that fall under the "Light Industrial" designation in the future Land Use Plan by the City of Camden must be addressed in order to effectuate a comprehensive redevelopment effort that will optimize the opportunity for community revitalization in Cramer Hill.

Additionally, all blocks lining the waterfront and those adjacent vacant and industrial parcels are obsolete and deleterious land uses in that in their present state as vacant or industrial lands, they are preventing public access to waterfront areas. Some of these blocks do not even contain public roads, creating a situation which not only limits public access and discourages private investment but endangers community safety and health due to the potential emergencies of fire or natural disaster and the inability to combat such emergencies effectively due to the lack of adequate access.

These situations constitute an obsolete layout, which further qualifies the area for criterion “d.” Specifically, waterfront blocks 813, 884, 885 and 886 have absolutely no public access routes. Additionally, blocks 809.01, 809, 810, 811, 812, 814, 815, 816, 883, 887, 888, 889 and 892, which are also located in the waterfront portion of Cramer Hill, have public access routes along only one of the block boundary lines, and many contain lots that cannot be reached via any public access route. These are clear examples of obsolete layout and land use patterns that pose a threat to the larger community as well as hinder private development.

The New Jersey State Plan clearly lists as a goal, in Policy 12, Coastal / Waterfront Access: “Maintain and improve public access to coastal and waterfront areas of recreational, aesthetic, cultural or ecological value.” The City of Camden 2002 Master Plan also prioritizes waterfront revitalizations as a key element in its vision of citywide prosperity, and notes that “recreation, open space and public access to the waterfront” are included in the future plans for Cramer Hill. These initiatives reinforce the sentiment that waterfront lands are valuable and limited, and should be developed for recreation and other uses beneficial to the public. Under this rationale, all industrial and vacant lands in the waterfront areas along the Back Channel and Cooper River constitute obsolete and deleterious uses and are detrimental to the public welfare.

Finally, these industrial and vacant lots along the two rivers, the rail corridors and the perimeter of the Cramer Hill residential neighborhood are deleterious in that their presence appears to be inducing deterioration of the adjacent residential blocks. As

is evident in this block-by-block analysis of the Redevelopment Area, all of the residential blocks identified as being in need of redevelopment are located on the periphery of the neighborhood, adjacent to either the vacant or industrial blocks noted herein. These residential blocks have the highest percentages of undeveloped lands and poor condition buildings, with greater than 70% of their lots meeting redevelopment criteria. This phenomenon illustrates how these vacant and industrial uses are a blighting factor acting like a “cancer” spreading to nearby residential lots, evidently encouraging home abandonment and discouraging investment. In this sense, all of the blocks identified in the Cramer Hill Redevelopment Area constitute deleterious land uses that are detrimental to the safety, health, morals, or welfare of the community.

In sum, the blocks that form the Cramer Hill Redevelopment Area all contain obsolescent and/or deleterious land uses that are detrimental to the safety, health, morals, or welfare of the community. Some are inconsistent with future land uses designated by the 2002 Land Use Master Plan, others restrict access to the waterfronts of the Back Channel and Cooper River and all are shown to act as a detrimental force inducing blighted conditions within the residential neighborhood of Cramer Hill. Additionally, the Redevelopment Area meets criterion “e.” In order to meet criterion “e,” a determination of underutilization caused by the condition of title, diverse ownership of the real property therein or other conditions must be met. After establishing underutilization, it is necessary to provide evidence that due to these conditions a stagnant or not fully productive condition of land potentially useful and valuable for contributing to and serving the public health, safety and welfare has occurred. Stagnation is defined as “characterized by a lack of development, advancement or progressive movement” by the Random House Unabridged Dictionary, 2006.

The blocks within the recommended Cramer Hill Redevelopment Area manifest underutilization due to the fact that 61% of the parcels within the Redevelopment Area are vacant, and 10% of buildings in the Redevelopment Area are vacant. Vacant properties and vacant buildings are clear examples of land that is not serving its highest, most productive potential use and furthermore is not serving *any* productive use. It is evident that these vacant properties are found to meet the criteria due to the fact that they represent a stagnant and not fully productive condition of the Redevelopment Area. The recent Gallenthin case found that property

cannot be redeveloped based solely on the fact that the owners are “not optimizing use of the property.” With this understanding, it should be noted that vacant lands located along the Back Channel and Cooper River waterfront areas and throughout the residential and industrial portions of the Cramer Hill neighborhood represent, in fact, **a complete lack of use** since these lands are entirely undeveloped and serve no productive use. Thus, there is no discussion as to whether or not this is the optimal use, since essentially vacant lands contain no use at all.

These waterfront properties in particular are extremely valuable from an aesthetic and environmental perspective and there are numerous potentially productive uses that would be preferable to their current state of abandonment, which provides no benefits to the surrounding community. Despite this fact, many have remained undeveloped over long periods of time, dating back as far as the decline of the original manufacturing operations in these areas that began in the 1950s. The fact that these parcels have remained vacant in spite of their potential to provide recreational, commercial, ecological and tourism uses is a sign of deeply-rooted stagnancy. The underutilization (based on a complete lack of utilization) and stagnancy found on these redevelopment blocks is a result of diverse ownership, burdensome conditions of title and conditions such as poverty, physical blight and a history of disinvestment in the community which has resulted in a lack of private investment in the area.

These 52 redevelopment blocks, which contain 336 parcels, are owned by 126 different individuals and entities, clearly demonstrating diverse ownership and a

significant hindrance to the assembly of properties into suitable development parcels. 13 of the 52 Redevelopment Area blocks contain or consist of contaminated sites or known brownfield sites due to prior or present industrial operations. This adds a burdensome condition to the title in that such lands must be properly assessed and mitigated in order for future development, in particular residential uses, to be established. The contaminated status of the land is a difficulty that hinders private investment and development. The stagnant and unproductive condition of these properties has led to a growing lack of proper utilization throughout the Study Area, representing a growing cancer spreading through the community. As mentioned earlier, the residential blocks in Cramer Hill that have exhibited the highest rates of vacancies and poor condition buildings are those located adjacent to the vacant and industrial lands forming the perimeter of the neighborhood. The underutilization of these lands is working as blighting force, contributing to the deterioration of the Cramer Hill residential blocks located in the neighborhood interior.

Additionally, these blocks suffer from the condition of being located in a distressed urban neighborhood that faces significant barriers to private investment and revitalization. As previously outlined in respect to criterion “c,” the Cramer Hill neighborhood and the City of Camden itself exhibit a number of symptoms of physical blight and deterioration, as well as challenging socioeconomic conditions, such as high poverty rates, low home ownership rates, high crime rates and low household incomes. In some cases, these blocks do not even contain public access routes, illustrating the effects of long-term disinvestment. These factors all serve to prevent private investment and redevelopment in the neighborhood. These

conditions, and their role in preventing private investment, contribute greatly to the underutilization and stagnancy which these blocks have experienced.

All of these redevelopment blocks, which exhibit stagnancy and underutilization as a result of the conditions outlined above, could potentially serve the greater good for the Cramer Hill neighborhood. In the case of the residential blocks, these vacant parcels could provide infill housing, a strong need in a community such as Camden, where, according to the 2002 Master Plan, 70% of housing was built prior to 1950. Any productive use of vacant parcels, including public open space, will serve to improve the social fabric of the community while removing the threat of untended vacant lands which provide a venue for criminal activity, reduce property values and instigate further dilapidation of adjacent parcels. On the other hand, the underutilized waterfront properties are extremely valuable community assets, as acknowledged by the City of Camden, the State of New Jersey and many other communities across the nation. In Cramer Hill in particular, waterfront lands pose a natural transition to parks and open space, and could easily be linked with the adjacent Von Neida Park to create a broad greenway, providing ecological, health and social benefits to the community. Through a process of comprehensive redevelopment, each of these 52 underutilized blocks has the potential to provide housing, commercial development or public open space to contribute to the health, safety and welfare of the neighborhood and the City at large.

In sum, criterion “e” is applicable to the Cramer Hill Redevelopment Area since its lands suffer from underutilization as illustrated by its high numbers of vacant lands and vacant buildings. It is apparent that these blocks represent a stagnancy, in that no new development has taken place in the area and has allowed them to remain as vacant and undeveloped. This underutilization is a result of diverse ownership in the

Redevelopment Area, environmental contamination which represents a burdensome condition of title and other conditions such as the deteriorated and disinvested state of the surrounding community. As detailed in respect to criterion “c,” Camden is a declining city that has struggled under the burden of high poverty rates, low per capita incomes, low home ownership rates and deteriorated housing stock and infrastructure. This communitywide deterioration clearly inhibits private investment and development in the Redevelopment Area and thus prevents these blocks from contributing a full and productive use to the community and the City as infill development, open space or public waterfront access opportunities.

The entire area is within an Urban Enterprise Zone (UEZ) and therefore meets the Local Redevelopment and Housing Law (LRHL) Area in Need of Redevelopment “g” criteria. The *Local Redevelopment and Housing Law, (C.40A: 12A-3)*, herein referred to as Section 3, speaks to the ability to include certain parcels in a redevelopment area that are not detrimental to the public health, safety or welfare of the region but the inclusion of which, with or without change in their condition, is necessary for the effective redevelopment of the area in which they are a part. This refers to those blocks that either do not meet any of the redevelopment criteria or contain a number of parcels that meet the redevelopment criteria at a rate lower than the 70% standard used for block-wide designation. While these blocks or the parcels within them may not contain sufficient redevelopment criteria, they are nonetheless critical to the success of the Cramer Hill redevelopment efforts. They are included in order to create an appropriately shaped, contiguous Redevelopment Area and thus

effectuate comprehensive redevelopment. Their conclusion is not detrimental to the public health, safety or welfare.

D. Block by Block Analysis

Individually, these 52 blocks contain parcels and areas that meet criteria “a,” “b,” “c,” “d,” “e,” “g” and Section 3. Below are brief descriptions of the blocks designated as an Area in Need of Redevelopment. These descriptions are divided into three major categories of blocks found in the Redevelopment Area: industrial waterfront blocks, industrial blocks along the rail corridor and interior residential blocks.

Waterfront Portion of the Cramer Hill Redevelopment Area

These 17 blocks represent large lots of vacant or industrial lands along or adjacent to the Back Channel and Cooper River waterfronts. These blocks as a whole represent a contiguous waterfront area that is prime for redevelopment, meeting the intentions of both the City of Camden Master Plan, which prioritizes waterfront revitalization, and the State of New Jersey Redevelopment Plan, which emphasizes public access to coastal and waterfront areas. These blocks are all currently zoned Industrial and Manufacturing-Residential. However, the 2002 City of Camden Master Plan designates nearly all of these blocks as, non-industrial uses, including residential, mixed use and open space paving the way for new patterns of waterfront development that better serve the local community. On each block (except those designated under Section 3 as mentioned earlier), 70% or more of the lots within meet one or more redevelopment criteria.

Block 807

Block 807 is located along the Cooper River waterfront in the southern portion of the Cramer Hill neighborhood, and contains nine lots (1, 2.01, 2.02, 6, 6.01, 12, 12.01, 21 and 63). Its uses include a large multi-family public housing development as well as a privately owned housing development, industrial parcels and vacant lots. The block meets criterion “a” due to the poor, dilapidated and generally substandard condition of the industrial structure on Lot 6.01. The abandoned industrial structure on Lot 6.01 also serves to meet criterion “b,” in that this industrial building is in extreme disrepair and has been deemed untenable and boarded up by the City of Camden. Four lots (2.01, 2.02, 6.01 and 12.00) contain industrial buildings in poor and fair condition, and meet criteria “d” due the fact that they constitute obsolete land uses. The existence of industrial uses in close proximity to residential development is an obsolete use in that industrial facilities can create noise, truck traffic, pollution, noxious smells and other nuisances that significantly reduce the quality of life for adjacent residents. Furthermore, these industrial lots are inconsistent with the current zoning, which designates this entire block as R-2 Residential. The block borders the Cooper River, making it a valuable piece of waterfront property that can serve as a key asset in community revitalization, as noted by the City of Camden Master Plan.

Finally, this block meets criterion “e” due to the fact that it is an example of underutilization due to diverse ownership, burdensome condition of title and the physical decline and general disinvestment evident in the Cramer Hill neighborhood. These factors all result in a stagnancy or lack of development of this potentially

useful and valuable land. This stagnancy and underutilization thus detracts from this block's ability to contribute to public health, safety and welfare. The block contains examples not only of underutilization, but a complete lack of utilization. Three lots (1.01, 21 and 63), constituting 30% of the block, are entirely vacant and have no productive use. Three different entities own these three lots, demonstrating diverse ownership and hindering property assembly. Three lots on the block (1.01, 2, 2.01) contain known contaminated sites and another portion of the block is a designated brownfield site, creating a particularly burdensome condition of title. It is further burdened by the conditions of economic disinvestment, physical deterioration and socioeconomic breakdown that exist in the surrounding community, as evidenced in blighted buildings and lands, high levels of poverty, low household incomes, high crime rates and low home ownership rates. These combine to inhibit private investment and result directly in a stagnancy of development and underutilization of the land. Due to its location on the waterfront, this block holds a valuable potential for residential, commercial or public uses. Its vacancy in light of these factors is a clear indicator of underutilization, stagnancy of development and the failure of this block to reach full potential as a productive waterfront site due to the conditions noted herein. As such, this block meets criterion "e." In sum, this block meets criteria "a," "b," "d" and "e."

Block 809

Block 809 is located along the Back Channel waterfront at the mouth of the Cooper River and contains 11 lots (7, 8, 9, 10, 11, 12, 13, 14, 15, 16 and 17). All of these lots are vacant and are owned by the Camden Redevelopment Agency or Camden County. This block meets criterion "c" due to the fact that it is publicly-owned vacant land that is located within a distressed urban neighborhood (evidenced by low property values, a low owner-occupancy rate, high vacancies, high crime, low household incomes and high poverty rates) which limits its possibility of development through the instrumentality of private capital. Additionally, this block meets criterion "e" due to the fact that it is an example of underutilization due to burdensome condition of title and other conditions such as the physical decline and general disinvestment evident in the Cramer Hill neighborhood. These factors all result in a stagnancy or lack of development of this potentially useful and valuable land. This stagnancy and underutilization thus detracts from this block's ability to contribute to public health, safety and welfare. The block is an example not only of underutilization, but a complete lack of utilization. All 11 of the lots on the block, constituting 100% of the block, are entirely vacant and have no productive use.

Additionally, all of the lots included on the block (7, 8, 9, 10, 11, 12, 13, 14, 15, 16 and 17) contain known contaminated sites and another portion of the block is a designated brownfield site, constituting a particularly burdensome condition of title. It is further burdened by the conditions of economic disinvestment, physical deterioration and socioeconomic breakdown that exist in the surrounding community, as evidenced in blighted buildings and lands, high levels of poverty, low household

incomes, high crime rates and low home ownership rates. These combine to inhibit private investment and result directly in a stagnancy of development and underutilization of the land. Due to its location on the waterfront, this block holds a valuable potential for residential, commercial or public uses. Its vacancy in light of these factors is a clear indicator of underutilization, stagnancy of development and the failure of this block to reach full potential as a productive waterfront site due to the conditions noted herein. As such, this block meets criterion “e.” In sum, this block meets criteria “c” and “e.”

Block 809.01

Block 809.01 is located in the southwestern portion of the Cramer Hill neighborhood between the residential neighborhood and the Back Channel waterfront. This block contains only one lot (Lot 18), which is vacant and owned by the Camden Redevelopment Agency. This block meets criterion “c” due to the fact that it is publicly-owned vacant land that is located within a distressed urban neighborhood (evidenced by low property values, a low owner-occupancy rate, high vacancies, high crime, low household incomes and high poverty rates) and contains limited public access routes, all of which limit its possibility of development through the instrumentality of private capital. Additionally, this block meets criterion “e” due to the fact that it is an example of underutilization due to burdensome condition of title and other conditions such as the physical decline and general disinvestment evident in the Cramer Hill neighborhood. These factors all result in a stagnancy or lack of development of this potentially useful and valuable land. This stagnancy and

underutilization thus detracts from this block’s ability to contribute to public health, safety and welfare.

The block is an example not only of underutilization, but a complete lack of utilization. Lot 18, constituting 100% of the block, is entirely vacant and has no productive use. Additionally, the entire block is a designated brownfield site, constituting a particularly burdensome condition of title. It is further burdened by the conditions of economic disinvestment, physical deterioration and socioeconomic breakdown that exist in the surrounding community, as evidenced in blighted buildings and lands, high levels of poverty, low household incomes, high crime rates and low home ownership rates. These combine to inhibit private investment and result directly in a stagnancy of development and underutilization of the land. Due to its location on the waterfront, this block holds a valuable potential for residential, commercial or public uses. Its vacancy in light of these factors is a clear indicator of underutilization, stagnancy of development and the failure of this block to reach full potential as a productive waterfront site due to the conditions noted herein. As such, this block meets criterion “e.” In sum, this block meets criteria “c” and “e.”

Block 810

Block 810 is located along the Back Channel waterfront and contains five lots (4, 5, 6, 18 and 18.01). All of these lots are vacant and are owned by the Camden Redevelopment Agency. This block meets criterion “c” due to the fact that it is publicly-owned vacant land that is located within a distressed urban neighborhood (evidenced by low property values, a low owner-occupancy rate, high vacancies,

high crime, low household incomes and high poverty rates) and contains limited public access routes, all of which limit its possibility of development through the instrumentality of private capital. Additionally, this block meets criterion “e” due to the fact that it is an example of underutilization due to burdensome condition of title and other conditions such as the physical decline and general disinvestment evident in the Cramer Hill neighborhood. These factors all result in a stagnancy or lack of development of this potentially useful and valuable land. This stagnancy and underutilization thus detracts from this block’s ability to contribute to public health, safety and welfare.

The block is an example not only of underutilization, but a complete lack of utilization. All 5 of the lots on the block, constituting 100% of the block, are entirely vacant and have no productive use. Additionally, the four out of the five lots on the block (4, 5, 6 and 18.01) are designated brownfield sites, constituting a particularly burdensome condition of title. It is further burdened by the conditions of economic disinvestment, physical deterioration and socioeconomic breakdown that exist in the surrounding community, as evidenced in blighted buildings and lands, high levels of poverty, low household incomes, high crime rates and low home ownership rates. These combine to inhibit private investment and result directly in a stagnancy of development and underutilization of the land. Due to its location on the waterfront, this block holds a valuable potential for residential, commercial or public uses. Its vacancy in light of these factors is a clear indicator of underutilization, stagnancy of development and the failure of this block to reach full potential as a productive

waterfront site due to the conditions noted herein. As such, this block meets criterion “e.” In sum, this block meets criteria “c,” “d” and “e.”

Block 811, 812 and 816

These three blocks form a contiguous area on the Back Channel waterfront and are all owned by Riverfront Recycling, a Class B recycling facility and light industrial use in fair condition. Each of these blocks consists of only one lot (Block 811, Lot 8; Block 812, Lot 3 and Block 816, lot 2) and share a number of characteristics and thus have been grouped together. These blocks meet criterion “d” due to the fact that they contain industrial facilities and as such constitute obsolete land uses. While the industrial operations are a functional land use on this site, these industrial uses are nonetheless incompatible with the City of Camden’s future visions for this waterfront area as well as detrimental in that they induce blight and reduce the quality of life in the adjacent residential neighborhood. This detrimental effect is apparent in many of the residential blocks that adjoin this waterfront industrial strip that manifest significant signs of blight and as such have been included in the Redevelopment Area. This incompatibility and detriment implicitly make these industrial operations obsolete uses.

This combined property borders the Back Channel, making it a valuable piece of waterfront property that can serve as a key asset in community revitalization, as noted by the City of Camden Master Plan. As such, the industrial use of the property in essence restricts public access to the waterfront (as prioritized by the City of Camden and State of New Jersey). Furthermore, the existence of industrial uses in

close proximity to residential development, which is located adjacent to these blocks, is an obsolete land use approach in that industrial facilities can create noise, truck traffic, pollution, noxious smells and other nuisances that significantly reduce the quality of life for nearby residents. This block was zoned Industrial (I-1) by the Camden Zoning Ordinance, which was last updated in 1978, making it outdated and minimizing its relevance to present-day development patterns. Additionally, in the City of Camden Land Use Plan of 2002, this block is designated as Medium Density Residential, illustrating that the City envisions new non-industrial development in this area that can better serve the community and protect the quality of the residential neighborhood. In total, the industrial uses located on this block represent obsolete land uses due to the fact that they pose a nuisance as well as a blighting force on adjacent residences and they are incongruent with the patterns of future development for the area, as envisioned by the City of Camden.

In addition to being an obsolete use on waterfront land, the operations of Riverfront Recycling are encroaching upon Lots 7 and 9 of Block 815, both of which are owned by the City of Camden. Furthermore, Riverfront Recycling has accrued a number of violations for unlawful operations and environmental contamination and has recently even lost its license as a recycling facility (See Section VI Neighborhood Disinvestment and Community Distress). Due to these combined factors of being an obsolete land use, restricting public access to the waterfront and being an unlawful operation, it is clear that the industrial uses on these blocks represent a detriment to the safety, morals, health and welfare of the community, thereby meeting the conditions of criterion “d.” Additionally, these blocks are included in the

Redevelopment Area pursuant to Section 3, in that each one is a key plot of land located within the large grouping of waterfront properties along the Back Channel and Cooper River which are otherwise included within the Cramer Hill Redevelopment Area. This strip of waterfront land has been designated by the City of Camden for future uses of Residential, Commercial / Open Space, Mixed Use or Parks and Recreation & Open Space, as well as Light Industrial. However, it is apparent that any remaining industrial operations within these blocks would constitute an incongruent and obsolete usage (as noted under criterion “d”), causing detriment to adjacent properties and preventing a comprehensive land assembly process necessary to redevelop and revitalize the waterfront as a whole. Thus, it is essential that Blocks 811, 812 and 816 be included in the Cramer Hill Redevelopment Area for effective redevelopment of the area to take place.

Block 813

Block 813 is located along the Back Channel waterfront and contains one lot (Lot 1) which is owned by the City of Camden. Lot 1 is currently being used as an active private marina as leased to Farragut Sportsmen’s Club. This block meets criterion “c” due to the fact that it is publicly-owned land that is located within a distressed urban neighborhood (evidenced by low property values, a low owner-occupancy rate, high vacancies, high crime, low household incomes and high poverty rates) and contains limited public access routes, all of which limit its possibility of development through the instrumentality of private capital.

Block 814

Block 814 is located within the large grouping of waterfront properties, between the Back Channel waterfront and the Cramer Hill residential neighborhood. It contains one vacant lot (Lot 2) which is owned by the City of Camden. This block meets criterion “c” due to the fact that it is publicly-owned vacant land that is located within a distressed urban neighborhood (evidenced by low property values, a low owner-occupancy rate, high vacancies, high crime, low household incomes and high poverty rates) and contains limited public access routes, all of which limit its possibility of development through the instrumentality of private capital.

Block 815

Block 815 is located on the Back Channel waterfront and contains five lots (3, 7, 9, 14 and 16). Four of these lots (7, 9, 14 and 16) are vacant and owned by the City of Camden. One lot (Lot 3) is occupied by Riverfront Recycling, a Class B recycling facility and light industrial use in fair condition. Additionally, Riverfront Recycling is encroaching upon Lots 7 and 9 of Block 815, both of which are owned by the City of Camden, utilizing these properties for its own operations. This block meets criterion “c” due to the fact that it contains a significant amount of publicly-owned vacant land that is located within a distressed urban neighborhood (evidenced by low property values, a low owner-occupancy rate, high vacancies, high crime, low household incomes and high poverty rates) and contains limited public access routes, all of which limit its possibility of development through the instrumentality of private capital. This block meets criterion “d” due to the fact that Lot 3 (and portions of Lots 7 and 9), contain industrial facilities and as such constitute an obsolete land use. While the

industrial operations are a functional land use on this site, these industrial uses are nonetheless incompatible with the City of Camden’s future visions for this waterfront area as well as the detrimental in that they induce blight and reduce the quality of life in the adjacent residential neighborhood. This incompatibility and detriment implicitly make these industrial operations obsolete uses.

This block borders the Back Channel, making it a valuable piece of waterfront property that can serve as a key asset in community revitalization, as noted by the City of Camden Master Plan. As such, the industrial use of the block in essence restricts public access to the waterfront (as prioritized by the City of Camden and State of New Jersey). Furthermore, the existence of industrial uses in close proximity to residential development, which is located adjacent to this block, is an obsolete and deleterious land use approach in that industrial facilities can create noise, truck traffic, pollution, noxious smells and other nuisances that significantly reduce the quality of life for nearby residents. This block was zoned Industrial (I-1) by the Camden Zoning Ordinance, which was last updated in 1978, making it outdated and minimizing its relevance to present-day development patterns. Additionally, in the City of Camden Land Use Plan of 2002, this block is designated as Medium Density Residential, illustrating that the City envisions new non-industrial development in this area that can better serve the community and protect the quality of the residential neighborhood. In total, the industrial uses located on this block represent obsolete land uses due to the fact that they pose a nuisance as well as a blighting force on adjacent residences and they are incongruent with the patterns of future development for the area, as envisioned by the City of Camden.

Finally, this block meets criterion “e” due to the fact that it is an example of underutilization due to diverse ownership, burdensome condition of title and other conditions such as the physical decline and general disinvestment evident in the Cramer Hill neighborhood. These factors all result in a stagnancy or lack of development of this potentially useful and valuable land. This stagnancy and underutilization thus detracts from this block’s ability to contribute to public health, safety and welfare. The block is an example not only of underutilization, but a complete lack of utilization. Four lots (7, 9, 14 and 16), constituting 80% of the block, are entirely vacant and have no productive use. Additionally, the block is a designated brownfield site, constituting a particularly burdensome condition of title. It is further burdened by the conditions of economic disinvestment, physical deterioration and socioeconomic breakdown that exist in the surrounding community, as evidenced in blighted buildings and lands, high levels of poverty, low household incomes, high crime rates and low home ownership rates. These combine to inhibit private investment and result directly in a stagnancy of development and underutilization of the land. Due to its location on the waterfront, this block holds a valuable potential for residential, commercial or public uses. Its vacancy in light of these factors is a clear indicator of underutilization, stagnancy of development and the failure of this block to reach full potential as a productive waterfront site due to the conditions noted herein. As such, this block meets criterion “e.” In sum, this block meets criteria “c,” “d” and “e.”

Block 881

Block 881 is located on the Back Channel waterfront and contains two vacant lots (Lots 1 and 2) that are privately owned. This block meets criterion “e” due to the fact that it is an example of underutilization due to burdensome condition of title and other conditions such as the physical decline and general disinvestment evident in the Cramer Hill neighborhood. These factors all result in a stagnancy or lack of development of this potentially useful and valuable land. This stagnancy and underutilization thus detracts from this block’s ability to contribute to public health, safety and welfare. The block is an example not only of underutilization, but a complete lack of utilization. Lots 1 and 2, constituting 100% of the block, are entirely vacant and have no productive use. Lot 2, which constitutes the majority of the block, is a designated brownfield site, creating a particularly burdensome condition of title. It is further burdened by the conditions of economic disinvestment, physical deterioration and socioeconomic breakdown that exist in the surrounding community, as evidenced in blighted buildings and lands, high levels of poverty, low household incomes, high crime rates and low home ownership rates. These combine to inhibit private investment and result directly in a stagnancy of development and underutilization of the land. Due to its location on the waterfront, this block holds a valuable potential for residential, commercial or public uses. Its vacancy in light of these factors is a clear indicator of underutilization, stagnancy of development and the failure of this block to reach full potential as a productive waterfront site due to the conditions noted herein. As such, this block meets criterion “e.” In sum, this block meets criteria “d” and “e.”

Block 883, 884 and 885

These three blocks form one contiguous property owned by Express Marine (also identified as Tucker Towing) along the Back Channel waterfront. These three blocks in total contain 10 vacant lots (Block 883, Lots 1, 2, 3, 4, 11, 12, 13, 31 and Block 884, Lots 1 and 2) and six industrial parcels in fair and good condition (Block 883, Lot 5; Block 884, Lot 3 and Block 885, Lots 4, 5, 11 and 21), where Express Marine, a barge transportation company, operates. These blocks meet criterion “d” due to the fact they contain obsolete and deleterious land uses. The property borders the Back Channel, making it a valuable piece of waterfront property that can serve as a key asset in community revitalization, as noted by the City of Camden Master Plan. As such, the 11 vacant lots and five industrial lots in essence restrict public access to the waterfront (as prioritized by the City of Camden and State of New Jersey). Furthermore, the existence of industrial uses in close proximity to residential development, which is located adjacent to these blocks, is an obsolete land use approach in that industrial facilities can create noise, truck traffic, pollution, noxious smells and other nuisances that significantly reduce the quality of life for nearby residents.

Two of these blocks (884 and 885) are zoned I-1 Industrial by the Camden Zoning Ordinance, which was last updated in 1978, making it outdated and minimizing its relevance to present-day development patterns. The industrial uses located on these lots (Block 883, Lot 5; Block 884, Lot 3 and Block 885, Lots 4, 5, 11 and 21) represent obsolete land uses due to the fact that they pose a nuisance as well as a blighting force on adjacent residences. The patterns of future development

envisioned for the Back Channel waterfront by the City of Camden Master Plan designates the majority of this present Industrial zone as open Space, Residential and Mixed Use. These two blocks (884 and 885) are listed as Light Industrial on the Master Plan Land Use Plan. The other block (883) is currently zoned R-1-A Residential, by the City of Camden zoning ordinance, as well as the City of Camden 2002 Master Plan. Thus, the industrial operations on Block 883, Lot 5 are inconsistent with the current zoning and future land use plan. Further, it is clear that the industrial uses on Blocks 884 and 885, if allowed to remain, would inhibit comprehensive and successful redevelopment of the waterfront area, hindering the City of Camden priority to revitalize its waterfronts. While the industrial operations are a functional land use on this site, their incompatibility with future visions for the area and the detriment they cause on adjacent blocks make them obsolete land uses.

Additionally, these blocks are included in the Redevelopment Area pursuant to Section 3, in that it is a key plot of land located within the large grouping of waterfront properties along the Back Channel and Cooper River which are otherwise included within the Cramer Hill Redevelopment Area. This strip of waterfront land has been designated by the City of Camden for future uses of Residential, Commercial / Open Space, Mixed Use or Parks and Recreation & Open Space, as well as Light Industrial. However, it is apparent that any remaining industrial operations within these lots would constitute an incongruent and obsolete usage (as noted under criterion “d”), causing detriment to adjacent properties and preventing a comprehensive land assembly process necessary to redevelop and revitalize the

waterfront as a whole. Thus, it is essential that Blocks 883, 884 and 885 be included in the Cramer Hill Redevelopment Area for effective redevelopment of the area to take place.

Block 886

Block 886 is located on the Back Channel waterfront and contains one vacant lot (Lot 6) which is owned by the City of Camden. This block meets criterion “c” due to the fact that it is publicly-owned vacant land that is located within a distressed urban neighborhood (evidenced by low property values, a low owner-occupancy rate, high vacancies, high crime, low household incomes and high poverty rates) and contains limited public access routes, all of which limit its possibility of development through the instrumentality of private capital.

Block 887

Block 887 is located on the Back Channel waterfront and contains two vacant lots (7 and 14) which are owned by Camden County Municipal Utilities Authority. This block meets criterion “c” due to the fact that it is publicly-owned vacant land that is located within a distressed urban neighborhood (evidenced by low property values, a low owner-occupancy rate, high vacancies, high crime, low household incomes and high poverty rates) and contains limited public access routes, all of which limit its possibility of development through the instrumentality of private capital.

Block 888

Block 888 is located on the Back Channel waterfront and contains two vacant lots (Lots 10 and 15) which are owned by the City of Camden. This block meets criterion “c” due to the fact that it is publicly-owned vacant land that is located within a distressed urban neighborhood (evidenced by low property values, a low owner-occupancy rate, high vacancies, high crime, low household incomes and high poverty rates) and contains limited public access routes, all of which limit its possibility of development through the instrumentality of private capital.

Block 892

Block 892 is located within the large grouping of Back Channel waterfront properties, between the waterfront and the Cramer Hill residential neighborhood and contains six vacant lots (10, 11, 12, 15, 16 and 30) that are owned by the City of Camden. This block meets criterion “c” due to the fact that it is publicly-owned vacant land that is located within a distressed urban neighborhood (evidenced by low property values, a low owner-occupancy rate, high vacancies, high crime, low household incomes and high poverty rates) and contains limited public access routes, all of which limit its possibility of development through the instrumentality of private capital.

2) Interior Industrial Portion of the Cramer Hill Redevelopment Area

These seven blocks are mixed-use blocks located in the southern portion of the Redevelopment Area, near the rail right-of-way and adjacent to portions of the waterfront area lands. These blocks contain a variety of uses, often juxtaposed within the same block, including active and inactive industrial facilities, vacant lots and residential uses in varying conditions. All of these blocks contain industrial uses, and while many of these blocks are zoned Industrial, others are currently zoned residential, despite their persistent industrial uses. Nearly all of the blocks are designated as non-industrial uses in the City of Camden future Land Use Plan. On each block, 70% or more of the lots within meet one or more redevelopment criteria. *(Rights of way are not considered in this calculation due to the fact that their uses are not changeable and they will ultimately not be included in any redevelopment plan.)*

Block 808

Block 808 is located in within the I-1 Industrial zone in the southern portion of the Cramer Hill neighborhood, along the rail right-of-way and adjacent to industrial tracts to the north. This block contains four lots (1, 2, 7 and 13), two of which (2 and 7) are rights-of-way. The remaining lots (1 and 13) are both parking lots. These two lots are currently being used to park tractor trailer trucks. This block meets criterion “e” because of underutilization due to diverse ownership and other conditions such as the physical decline and general disinvestment evident in the Cramer Hill neighborhood. These factors all result in a stagnancy or lack of development of this potentially useful and valuable land. This stagnancy and underutilization detracts from this block’s ability to contribute to public health, safety and welfare. The block is an example not only of underutilization because Lots 1 and 13, which represent 100% of the block’s viable lots (those not utilized as rights of way) are undeveloped. These lots do not contain any structures or improvements and are currently serving as haphazard parking for commercial trucks. Their status as parking lots is not a fully productive usage of the land in this moderate-density urban neighborhood.

The underutilization of this lot is a result of diverse ownership and other conditions such as the physical decline and general disinvestment evident in the Cramer Hill neighborhood. The two parking lots have different owners, as do the lots of the adjacent right of way. The block is further burdened by the conditions of economic disinvestment, physical deterioration and socioeconomic breakdown that exist in the surrounding community, as evidenced in blighted buildings and lands, high levels of poverty, low household incomes, high crime rates and low home ownership rates.

These combine to inhibit private investment and result directly in a stagnancy of development and underutilization of the land and essentially the failure of this block to reach full potential as a productive site due to the conditions noted herein. As such, this block meets criterion “e.” Additionally, this block is included in the Redevelopment Area pursuant to Section 3, in that it is a key plot of land located within the contiguous swath of underutilized and blighted blocks that are otherwise included within the Cramer Hill Redevelopment Area. Maintaining industrial uses on this block would prevent comprehensive redevelopment efforts and hinder the success of community revitalization in Cramer Hill. Thus, it is essential that Block 817 also be included in the Cramer Hill Redevelopment Area for effective redevelopment of the area to take place.

Block 817

Block 817 contains four lots (1, 1.01, 52 and 60) and is located within the I-1 Industrial zone in the southwestern portion of the Cramer Hill neighborhood, adjacent to both industrial tracts and residential blocks. The four lots are fair condition industrial facilities owned by W. Hargrove Demolition. This block meets criterion “d” due to the fact that it contains obsolete land uses. While the industrial operations are a functional land use on this site, these industrial uses are nonetheless obsolete in that they are incompatible with the City of Camden’s future visions for this area and they cause detriment to the adjacent residential neighborhood. The industrial uses located on this block are in close proximity to residential development, which is located on two adjacent blocks. This constitutes an obsolete land use approach in that industrial facilities can create noise, truck traffic, pollution, noxious smells and

other nuisances that significantly reduce the quality of life for nearby residents. Furthermore, it is apparent that industrial uses represent a detrimental force in the Cramer Hill neighborhood, as all of the most blighted residential blocks are located at the periphery of the neighborhood, adjacent to industrial areas and vacant lands.

This block was zoned Industrial by the Camden Zoning Ordinance, which was last updated in 1978, making it outdated and minimizing its relevance to present-day development patterns. Additionally, in the City of Camden Land Use Plan of 2002, this block is designated as Medium Density Residential, illustrating that the City envisions new non-industrial development in this area that can better serve the community and protect the quality of the residential neighborhood. In total, the industrial uses located on this block represent obsolete land uses due to the fact that they pose a nuisance as well as a blighting force on adjacent residences and they are incongruent with the patterns of future development for the area, as envisioned by the City of Camden. In containing obsolete land uses that threaten the safety, morals, health and welfare of the community, this block meet the conditions of criterion “d.” Additionally, this block is included in the Redevelopment Area pursuant to Section 3, in that it is a key plot of land located within the contiguous swath of underutilized and blighted blocks that are otherwise included within the Cramer Hill Redevelopment Area. Maintaining industrial uses on this block would prevent comprehensive redevelopment efforts and hinder the success of community revitalization in Cramer Hill. Thus, it is essential that Block 808 also be included in the Cramer Hill Redevelopment Area for effective redevelopment of the area to take place.

Block 818

Block 818 contains 11 (14, 16, 17, 30, 31, 48, 49, 51, 53, 57 and 59) lots and is located within the I-1 Industrial zone in the southwestern portion of the Cramer Hill neighborhood, adjacent to both industrial tracts and one residential block. Seven of these lots (14, 30, 48, 49, 53, 57 and 59) contain industrial facilities in poor condition, and the remaining four lots (16, 17, 31 and 52) are vacant. The block meets criterion “a” due to the general substandard state of the industrial structures on the lots 14, 30, 48, 49, 53, 57 and 59. This block meets criterion “c” due to the fact that lots 16 and 17 contain vacant land that has remained vacant for ten years or more and is located within a distressed urban neighborhood (evidenced by low property values, a low owner-occupancy rate, high vacancies, high crime, low household incomes and high poverty rates), limiting its possibility of development through the instrumentality of private capital. This block meets criterion “d” due to the fact that it contains obsolete land uses. While the industrial operations are a functional land use on this site, these industrial uses are nonetheless obsolete in that they are incompatible with the City of Camden’s future visions for this area and they cause detriment to the adjacent residential neighborhood. The industrial uses located on this block are adjacent to a residential neighborhood, constituting an obsolete land use approach in that industrial facilities can create noise, truck traffic, pollution, noxious smells and other nuisances that significantly reduce the quality of life for nearby residents. Furthermore, it is apparent that industrial uses represent a detrimental force in the Cramer Hill neighborhood, as all of the most blighted residential blocks are located at the periphery of the neighborhood, adjacent to industrial areas and vacant lands.

This block was zoned Industrial by the Camden Zoning Ordinance, which was last updated in 1978, making it outdated and minimizing its relevance to present-day development patterns. Additionally, in the City of Camden Land Use Plan of 2002, this block is designated as Commercial Retail use, illustrating that the City envisions new non-industrial development in this area that can better serve the community and protect the quality of the residential neighborhood. In total, the industrial uses located on this block represent obsolete land uses due to the fact that they pose a nuisance as well as a blighting force on adjacent residences and they are incongruent with the patterns of future development for the area, as envisioned by the City of Camden. In containing obsolete land uses that threaten the safety, morals, health and welfare of the community, this block meet the conditions of criterion “d.” In sum, this block meets criteria “a,” “c,” and “d.”

Block 844

Block 844 is located within the I-1 Industrial zone in the southwestern portion of the Cramer Hill neighborhood, adjacent to both industrial tracts and residential blocks, and contains one vacant lot (Lot 13) that is owned by the City of Camden. This block meets criterion “c” due to the fact that it is publicly-owned vacant land that is located within a distressed urban neighborhood (evidenced by low property values, a low owner-occupancy rate, high vacancies, high crime, low household incomes and high poverty rates), limiting its possibility of development through the instrumentality of private capital. This block likewise meets criterion “e” due to the fact that it is an example of underutilization due to a burdensome condition of title and other conditions such as the physical decline and general disinvestment evident in the Cramer Hill neighborhood. These factors all result in a stagnancy or lack of development of this potentially useful and valuable land. This stagnancy and underutilization thus detracts from this block’s ability to contribute to public health, safety and welfare.

The block is an example not only of underutilization, but a complete lack of utilization. Lot 13, constituting 100% of the block, is entirely vacant and has no productive use. Additionally, the block is a designated City of Camden brownfield site, constituting a particularly burdensome condition of title. It is further burdened by the conditions of economic disinvestment, physical deterioration and socioeconomic breakdown that exist in the surrounding community, as evidenced in blighted buildings and lands, high levels of poverty, low household incomes, high crime rates and low home ownership rates. These combine to inhibit private investment and

result directly in a stagnancy of development and underutilization of the land and essentially the failure of this block to reach full potential as a productive site due to the conditions noted herein. As such, this block meets criterion “e.” In sum, this block meets criteria “c” and “e.”

Block 847

Block 847 contains four lots (2, 7, 8 and 17) and is located within the I-1 Industrial zone in the southern portion of the Cramer Hill neighborhood, adjacent to both industrial tracts and one residential block. One lot (2) contains an abandoned industrial structure, one lot (17) is being used as parking lot for tractor trailer trucks and the remaining two lots (7 and 8) are rights of way owned by Conrail. The block meets criterion “a” due to the poor, dilapidated and generally substandard condition of the vacant industrial structure on Lot 2. The dilapidated and abandoned industrial building on Lot 2 also meet criterion “b,” in that this structure has fallen into a state of severe disrepair and is currently untenable. This block meets criterion “d” due to the fact that it contains an obsolete land use. The industrial use on Lot 2 is in close proximity to residential development, which is located on an adjacent block. This use constitutes an obsolete and deleterious land use approach in that industrial facilities can create noise, truck traffic, pollution, noxious smells and other nuisances that significantly reduce the quality of life for nearby residents. Furthermore, it is apparent that industrial uses represent a detrimental force in the Cramer Hill neighborhood, as all of the most blighted residential blocks are located at the periphery of the neighborhood, adjacent to industrial areas.

The block is zoned Industrial by the Camden Zoning Ordinance, which was last updated in 1978, making it outdated and minimizing its relevance to present-day development patterns. Additionally, in the City of Camden Land Use Plan of 2002, this block is designated as Mixed Corridor and Community Facilities use, illustrating that the City envisions new non-industrial development in this area that can better serve the community and protect the quality of the residential neighborhood. In containing obsolete land uses that threaten the safety, morals, health and welfare of the community, this block meet the conditions of criterion “d.” In sum, this block meets criteria “a,” “b” and “d.” Additionally, this block is included in the Redevelopment Area pursuant to Section 3, in that it is a key plot of land located within the contiguous swath of underutilized and blighted blocks that are otherwise included within the Cramer Hill Redevelopment Area. Only one (Lot 2) of the two viable lots (those not used as rights of way) on the block contains redevelopment criteria, which makes the block criteria measurement 50%, which is under the previously established standard of 70%. However, because Lot 2 covers the majority of the area Block 847, it follows that the dilapidation and obsolete land usage evident on Lot 2 be an indicator of the block’s need for redevelopment. Furthermore, it is essential that Block 868 also be included in the Cramer Hill Redevelopment Area for effective redevelopment and community revitalization of Cramer Hill to take place.

Block 867

Block 867 contains four lots (1, 1.01, 10 and 15) and is located within the I-1 Industrial zone in the southern portion of the Cramer Hill neighborhood, along the rail right-of-way. The block contains two industrial lots in poor condition (10 and 15), and two lots that constitute rail rights-of-way (1 and 1.01). The block meets criterion “a” due to the general substandard state of the industrial structures on Lots 10 and 15. The block meets criterion “d” due to the fact that it contains obsolete land uses. While the industrial uses on Lots 10 and 15 are functional, they are nonetheless obsolete, primarily due to their close proximity residential development and inconsistency with future plans for the area. This use constitutes an obsolete and deleterious land use approach in that industrial facilities can create noise, truck traffic, pollution, noxious smells and other nuisances that significantly reduce the quality of life for nearby residents. Furthermore, it is apparent that industrial uses represent a detrimental force in the Cramer Hill neighborhood, as all of the most blighted residential blocks are located at the periphery of the neighborhood, adjacent to industrial areas. The poor condition industrial facilities on Lot 10 and 15 is not only an obsolete land use but also a dilapidated structure that further threatens public health and welfare.

The block is currently zoned Industrial by the Camden Zoning Ordinance, which was last updated in 1978, and has also been designated as Light Industrial in the City of Camden Master Plan Land Use Plan. However, the Master Plan designates nearly all of the surrounding blocks as non-industrial uses including mixed use development and Medium Density Residential. This phenomenon illustrates that the area is

undergoing a metamorphosis from its history as an industrial district to a non-industrial, mixed use district. Finally, even if this block is redeveloped in the future for light industrial use, the development on these lots should be designed in such as way to create a barrier between industrial operations and the adjacent residential lots. The present state of development represents not only dilapidation and obsolete use but a faulty arrangement or design in that industrial use lots are located directly across from residential lots without any physical buffers.

Based on the fact that the industrial uses located on this block pose a nuisance and blighting force to adjacent residences, resulting in obsolete land use, and the fact that the current structures are dilapidated and contain a faulty design, these two lots and the block as a whole threaten the safety, morals, health and welfare of the community, this block meet the conditions of criterion “d.” In sum, this block meets criteria “a” and “d.”

Block 868

Block 868 contains two industrial lots in fair condition (Lots 12 and 14) and is located within the I-1 Industrial zone in the southern portion of the Cramer Hill neighborhood, along the rail right-of-way. The block meets criterion “d” due to the fact that it contains obsolete land uses. While the industrial uses on this block are functional, they are nonetheless obsolete, primarily due to their close proximity to residential development. This use constitutes an obsolete land use approach in that industrial facilities can create noise, truck traffic, pollution, noxious smells and other nuisances that significantly reduce the quality of life for nearby residents. Furthermore, it is

apparent that industrial uses represent a detrimental force in the Cramer Hill neighborhood, as all of the most blighted residential blocks are located at the periphery of the neighborhood, adjacent to industrial areas. The block is currently zoned Industrial by the Camden Zoning Ordinance, which was last updated in 1978, and has also been designated as Light Industrial in the City of Camden Master Plan Land Use Plan. However, the Master Plan designates nearly all of the surrounding blocks as non-industrial uses including Mixed Use Development and Medium Density Residential. This phenomenon illustrates that the area is undergoing a metamorphosis from its history as an industrial district to a non-industrial, mixed use district.

Finally, even if this block is redeveloped in the future for light industrial use, the development on these lots should be designed in such as way to create a barrier between industrial operations and the adjacent residential lots. The present state of development represents not only dilapidation and obsolete use but a faulty arrangement or design in that industrial use lots are located directly across from residential lots without any physical buffers. Additionally, this block is included in the Redevelopment Area pursuant to Section 3, in that it is a key plot of land located within the contiguous swath of underutilized and blighted blocks that are otherwise included within the Cramer Hill Redevelopment Area. Maintaining industrial uses on this block would prevent comprehensive redevelopment efforts and hinder the success of community revitalization in Cramer Hill. Thus, it is essential that Block 868 also be included in the Cramer Hill Redevelopment Area for effective redevelopment of the area to take place.

Block 872

Block 872 contains only one lot, which is an industrial use, and is located within the I-1 Industrial zone in the southern portion of the Cramer Hill neighborhood, along the rail right-of-way. This block meets criterion “d” due to the fact that it contains an obsolete and deleterious land use. The industrial use on this block is in close proximity to residential development, which is located on adjacent blocks. This use constitutes an obsolete and deleterious land use approach in that industrial facilities can create noise, truck traffic, pollution, noxious smells and other nuisances that significantly reduce the quality of life for nearby residents. Furthermore, it is apparent that industrial uses represent a detrimental force in the Cramer Hill neighborhood, as all of the most blighted residential blocks are located at the periphery of the neighborhood, adjacent to industrial areas. Finally, the block is zoned Industrial by the Camden Zoning Ordinance, which was last updated in 1978, making it outdated and minimizing its relevance to present-day development patterns. In total, these industrial uses located on this block represent obsolete and deleterious land uses due to the fact that they pose a nuisance as well as a blighting force on adjacent residences and they are incongruent with the patterns of future development, as envisioned by the City of Camden. In containing obsolete and deleterious land uses that threaten the safety, morals, health and welfare of the community, this block meet the conditions of criterion “d.”

Additionally, this block is included in the Redevelopment Area pursuant to Section 3, in that it is a key plot of land located within the contiguous swath of underutilized and blighted blocks that are otherwise included within the Cramer Hill Redevelopment

Area. Maintaining industrial uses on this block would prevent comprehensive redevelopment efforts and hinder the success of community revitalization in Cramer Hill. Thus, it is essential that Block 868 also be included in the Cramer Hill Redevelopment Area for effective redevelopment of the area to take place.

3) Residential Portion of the Cramer Hill Redevelopment Area

These remaining 12 redevelopment blocks are primarily residential blocks that are located within the Cramer Hill residential neighborhood and are also zoned for residential. All of them are located at the periphery of the neighborhood, adjacent to either vacant or industrial parcels that have also been included in the Redevelopment Area. These residential blocks suffer from high numbers of vacant parcels, dilapidated housing and scattered industrial uses and known contaminated sites. The location of these residential redevelopment blocks is evidence of the threatening force of the vacant and industrial parcels lining the neighborhood, demonstrating how the blight witnessed on these deteriorated lands is spreading inward into the residential area. On each block, 70% or more of the lots within meet one or more redevelopment criteria.

Block 821

Block 821 contains 32 lots (1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 13, 14, 15, 16, 17, 18, 19, 21, 22, 23, 24, 25, 26, 27, 29, 31, 33, 75, 76, 82 and 97) and is located within the residential portion of the Cramer Hill neighborhood, along the southwestern periphery, adjacent to the vacant lots of the Back Channel waterfront area. 23 of these lots are vacant, one lot contains a residential structure in poor condition, two

lots are side yards and the remaining six lots contain fair condition residential structures. This block meets criterion “a” due to the fact that Lot 22 contains a residential structure in poor, substandard and dilapidated condition. This block meets criterion “c” due to the fact that the 13 of these lots (5, 6, 7, 8, 9, 11, 14, 15, 16, 17, 18, 19, 22, 26, 75 and 82) are publicly-owned vacant land and eight lots (1, 2, 4, 10, 13, 21, 23 and 24) are privately-owned and have been vacant for at least 10 years, as verified through municipal tax records contained in the New Jersey Parcel Map software.. This block is located within a distressed urban neighborhood (evidenced by low property values, a low owner-occupancy rate, high vacancies, high crime, low household incomes and high poverty rates), limiting its possibility of development through the instrumentality of private capital thereby meeting criteria “c.”

Additionally, this block meets criterion “e” due to the fact that it is an example of underutilization due to diverse ownership and other conditions such as the physical decline and general disinvestment evident in the Cramer Hill neighborhood. These factors all result in a stagnancy or lack of development of this potentially useful and valuable land. This stagnancy and underutilization thus detracts from this block’s ability to contribute to public health, safety and welfare. This block is an example of underutilization of the land due to the fact that 25 of these lots (1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 13, 14, 15, 16, 17, 18, 19, 21, 23, 24, 26, 27, 75 and 82), or 78% of the block, are either vacant lots or side yards. The 23 vacant lots have no productive use at all, and the 2 remaining sideyards are underutilized as they are undeveloped land located in an urban neighborhood. The block exhibits diverse ownership in that nine different individuals and entities own the 25 undeveloped lots therein. It is burdened

by the conditions of economic disinvestment, physical deterioration and socioeconomic breakdown that exist in the surrounding community, as evidenced in blighted buildings and lands, high levels of poverty, low household incomes, high crime rates and low home ownership rates. These combine to inhibit private investment and result directly in a stagnancy of development and underutilization of the land and essentially the failure of this block to reach full potential as a productive site due to the conditions noted herein. As such, this block meets criterion “e.” In sum, this block meets criteria “a” and “c” and “e.”

Block 831

Block 831 contains 19 lots (1, 2, 3, 4, 5, 7, 8, 9, 11, 12, 13, 16, 18, 19, 21, 22, 53, 54 and 58) and is located within the residential portion of the Cramer Hill neighborhood, along the southwestern periphery, adjacent to the industrial lots of the Back Channel waterfront area. 13 of these lots are vacant, three lots contain residential buildings in poor condition, two lots contain a side yard and one lot contains a residential building in fair condition. This block meets criterion "a" due to the fact that three lots (9, 16 and 18) contain residential structures that are in poor, substandard and dilapidated condition. This block meets criterion "c" due to the fact that the block contains 11 lots (3, 4, 5, 7, 11, 12, 13, 21, 22, 53 and 54) of publicly-owned vacant land and two lots (1 and 2) that are privately owned and have been vacant for at least ten years. This block is located within a distressed urban neighborhood (evidenced by low property values, a low owner-occupancy rate, high vacancies, high crime, low household incomes and high poverty rates) which limits its possibility of development through the instrumentality of private capital thereby meeting criteria "c."

This block meets criterion "d" due to the fact that it contains three poor condition residential buildings, which constitute dilapidation. The dilapidated, poor condition buildings are eyesores, attract vermin and are safety hazards. The dilapidated buildings on this block represent deleterious land uses due to the fact that they pose a nuisance and threaten the safety, morals, health and welfare of the community. The block thereby meets the conditions of criterion "d." Additionally, this block meets criterion "e" due to the fact that it is an example of underutilization due to diverse ownership and other conditions such as the physical decline and general

disinvestment evident in the Cramer Hill neighborhood. These factors all result in a stagnancy or lack of development of this potentially useful and valuable land. This stagnancy and underutilization thus detracts from this block's ability to contribute to public health, safety and welfare.

This block is an example of underutilization of the land, due to the fact that 15 of these lots (1, 2, 3, 4, 5, 7, 8, 11, 12, 13, 21, 22, 53, 54 and 58), or 79% of the block, are either vacant lots or side yards. The 13 vacant lots have no productive use at all, and the 2 remaining sideyards are underutilized as they are undeveloped land located in an urban neighborhood. The block exhibits diverse ownership in that four different individuals and entities own the underutilized lots therein. It is burdened by the conditions of economic disinvestment, physical deterioration and socioeconomic breakdown that exist in the surrounding community, as evidenced in blighted buildings and lands, high levels of poverty, low household incomes, high crime rates and low home ownership rates. These combine to inhibit private investment and result directly in a stagnancy of development and underutilization of the land and essentially the failure of this block to reach full potential as a productive site due to the conditions noted herein. As such, this block meets criterion "e." In sum, this block meets criteria "a," "c," "d" and "e."

Block 836

Block 836 contains 31 lots (23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52 and 57) and is located within the residential portion of the Cramer Hill neighborhood, along the western periphery, adjacent to the industrial lots of the Back Channel waterfront area. This block meets criterion "a" due to the fact that five lots (28, 34, 41, 42 and 44), or 29% of the residential structures on this block, are in substandard, dilapidated condition. This block meets criterion "c" due to the fact that two lots (27 and 36) are publicly-owned vacant land and two lots (37 and 46) are privately-owned land that has been vacant for 10 years, as verified through municipal tax records contained in the New Jersey Parcel Map software. This block is located within a distressed urban neighborhood (evidenced by low property values, a low owner-occupancy rate, high vacancies, high crime, low household incomes and high poverty rates), limiting its possibility of development through the instrumentality of private capital thereby meeting criteria "c."

This block meets criterion "d" due to the fact that it contains five poor condition residential buildings (28, 34, 41, 42, and 44), which constitute deleterious land uses and dilapidation. The dilapidated, poor condition buildings are eyesores, attract vermin and are safety hazards. In total, the dilapidated buildings on this block represent deleterious land uses due to the fact that they pose a nuisance and threaten the safety, morals, health and welfare of the community. The block thereby meets the conditions of criterion "d." Finally, this block meets criterion "e" due to the fact that it is an example of underutilization due to diverse ownership and other

conditions such as the physical decline and general disinvestment evident in the Cramer Hill neighborhood. These factors all result in a stagnancy or lack of development of this potentially useful and valuable land. This stagnancy and underutilization thus detracts from this block's ability to contribute to public health, safety and welfare.

This block is an example of underutilization due to the fact that 17 of these lots, constituting 56% of the block, are either vacant lots, parking lots or side yards. Five vacant lots (27, 29, 36, 37 and 46) have no productive use at all. The seven remaining side yards (30, 32, 35, 47, 49, 50 and 52) and five parking lots (23, 38, 39, 40 and 43) are underutilized as they are undeveloped land located in an urban neighborhood. Their status as undeveloped land points to the fact that this block is suffering from an extreme lack of residential stability as well as investment and new development. The block exhibits diverse ownership in that 11 different individuals and entities own the undeveloped lots therein. It is burdened by the conditions of economic disinvestment, physical deterioration and socioeconomic breakdown that exist in the surrounding community, as evidenced in blighted buildings and lands, high levels of poverty, low household incomes, high crime rates and low home ownership rates. These combine to inhibit private investment and result directly in a stagnancy of development and underutilization of the land and essentially the failure of this block to reach full potential as a productive site due to the conditions noted herein. As such, this block meets criterion "e." In sum, this block meets criteria "a," "c," "d" and "e."

Block 837

Block 837 contains 24 lots (1, 2, 3, 4, 5, 6, 7, 8, 10, 14, 16, 17, 19, 20, 21, 22, 23, 24, 25, 27, 55, 57, 58 and 60) and is located within the residential portion of the Cramer Hill neighborhood, along the western periphery, adjacent to the industrial lots of the Back Channel waterfront area. The block contains 12 lots with industrial facilities, nine residential lots and three vacant lots. This block meets criterion “a” due to the fact that three lots (2, 3 and 55), or 33% of the residential structures on this block, are in substandard, dilapidated condition. This block meets criterion “c” due to the fact that two lots (24 and 60) on the block contain publicly-owned vacant land and one lot (22) is privately-owned and has been vacant for at least ten years. This block is located within a distressed urban neighborhood (evidenced by low property values, a low owner-occupancy rate, high vacancies, high crime, low household incomes and high poverty rates), limiting its possibility of development through the instrumentality of private capital thereby meeting criteria “c.”

This block meets criterion “d” due to the fact that it contains 12 industrial lots (1, 5, 6, 7, 8, 16, 17, 19, 20, 21, 23 and 58) that constitute obsolete land uses and three poor-condition residential lots that represent dilapidation. The industrial uses on this block are in extremely close proximity to residential development, which is located within this block and adjacent blocks. This use constitutes an obsolete land use approach in that industrial facilities can create noise, truck traffic, pollution, noxious smells and other nuisances that significantly reduce the quality of life for nearby residents. Furthermore, it is apparent that industrial uses represent a detrimental force in the Cramer Hill neighborhood, as all of the most blighted residential blocks are located at

the periphery of the neighborhood, adjacent to industrial areas. Finally, the industrial uses on the block are incongruent with the current zoning, which is R-1-A Residential as well as the future Land Use Plan established by the City of Camden. In total, these industrial uses located on this block represent an obsolete land use approach due to the fact that they pose a nuisance as well as a blighting force on adjacent residences and they are incongruent with the current zoning ordinance and future development patterns, as envisioned by the City of Camden.

The dilapidated, poor condition buildings are eyesores, attract vermin and are safety hazards, making them deleterious land uses as well. In total, the dilapidated buildings as well as the industrial lots represent obsolete and deleterious land uses that threaten the safety, morals, health and welfare of the community, thus meeting the conditions of criterion “d.” In containing dilapidated structures and obsolete and deleterious land uses that threaten the safety, morals, health and welfare of the community, this block meet the conditions of criterion “d.” In sum, this block meets criteria “a,” “c” and “d.”

Block 838

Block 838 contains 25 lots and is located within the residential portion of the Cramer Hill neighborhood, along the western periphery, adjacent to the industrial lots of the Back Channel waterfront area. The block contains 13 residential lots, one mixed-use lot and 11 undeveloped lots (including vacant lots, side yards and one garden). This block meets criterion “a” due to the fact that seven lots (34, 44, 47, 48, 49, 50 and 54), or 50% of the residential structures on this block, are in substandard, dilapidated, poor condition. This block meets criterion “c” due to the fact that the one lot (43) contains publicly-owned vacant land and five lots (35, 36, 37, 38 and 40) contain privately-owned land that has been vacant for at least 10 years, as verified through municipal tax records contained in the New Jersey Parcel Map software.. This block is located within a distressed urban neighborhood (evidenced by low property values, a low owner-occupancy rate, high vacancies, high crime, low household incomes and high poverty rates), limiting its possibility of development through the instrumentality of private capital, thereby meeting criteria “c.” This block meets criterion “d” due to the fact that it contains seven poor condition residential buildings (34, 44, 47, 48, 49, 50 and 54), which constitute deleterious land uses and dilapidation. The dilapidated, poor condition buildings are eyesores, attract vermin and are safety hazards. The dilapidated buildings on this block represent deleterious land uses due to the fact that they pose a nuisance and threaten the safety, morals, health and welfare of the community. The block thereby meets the conditions of criterion “d.”

Additionally, this block meets criterion “e” due to the fact that it is an example of underutilization due to diverse ownership and other conditions such as the physical decline and general disinvestment evident in the Cramer Hill neighborhood. These factors all result in a stagnancy or lack of development of this potentially useful and valuable land. This stagnancy and underutilization thus detracts from this block’s ability to contribute to public health, safety and welfare. This block is an example of underutilization due to the fact that 11 of these lots, constituting 44% of the block, are vacant lots, parking lots or side yards. Six vacant lots (35, 36, 37, 38, 40 and 43) have no productive use at all. The four remaining side yards (30, 33, 42 and 45) and garden (31) are underutilized as they are undeveloped land located in an urban neighborhood. Their status as undeveloped land points to the fact that this block is suffering from an extreme lack of residential stability as well as investment and new development. These lots could serve a much more productive and beneficial use for the community as infill residential or other development.

The block exhibits diverse ownership in that seven different individuals and entities own the undeveloped lots therein. Additionally, a portion of the block is a known contaminated site which constitutes a particularly burdensome condition of title. It is further burdened by the conditions of economic disinvestment, physical deterioration and socioeconomic breakdown that exist in the surrounding community, as evidenced in blighted buildings and lands, high levels of poverty, low household incomes, high crime rates and low home ownership rates. These combine to inhibit private investment and result directly in a stagnancy of development and

underutilization of the land and essentially the failure of this block to reach full potential. In sum, this block meets criteria “a,” “c,” “d” and “e.”

Block 843

Block 843 is located in the residential interior of the neighborhood and is a triangular block composed of entirely vacant land. The four lots that make up Block 843 (15, 16, 17 and 26) are all vacant and city-owned. This block meets criterion “c” due to the fact that 4 lots contain publicly-owned vacant land. This block is located within a distressed urban neighborhood (evidenced by low property values, a low owner-occupancy rate, high vacancies, high crime, low household incomes and high poverty rates), limiting its possibility of development through the instrumentality of private capital, thereby meeting criteria “c.”

Block 882

Block 882 contains 22 lots and is located within the residential portion of the Cramer Hill neighborhood, along the northwestern periphery, adjacent to the industrial lots of the Back Channel waterfront area. The block contains two lots with industrial facilities, four fair and good condition residential lots, 15 vacant lots and one side yard. This block meets criterion “c” due to the fact that 15 lots (18, 19, 21, 26, 27, 28, 29, 30, 32, 34, 35, 39, 40, 44 and 49) contain privately-owned land that has been vacant for at least 10 years, as verified through municipal tax records contained in the New Jersey Parcel Map software.. This block is located within a distressed urban neighborhood (evidenced by low property values, a low owner-occupancy rate, high vacancies, high crime, low household incomes and high poverty rates), limiting its

possibility of development through the instrumentality of private capital, thereby meeting criteria “c.” This block meets criterion “d” due to the fact that it contains two industrial lots (20 and 23), which are obsolete land uses. The industrial uses on this block are in extremely close proximity to residential development, which is located within the same block and adjacent blocks. This use constitutes an obsolete and deleterious land use approach in that industrial facilities can create noise, truck traffic, pollution, noxious smells and other nuisances that significantly reduce the quality of life for nearby residents. Furthermore, it is apparent that industrial uses represent a detrimental force in the Cramer Hill neighborhood, as all of the most blighted residential blocks are located at the periphery of the neighborhood, adjacent to industrial areas.

Finally, the industrial uses on the block are incongruent with the current zoning, which is R-1-A Residential as well as the future Land Use Plan established by the City of Camden, which designates this block as Parks and Recreation & Open Space. In total, these industrial uses located on this block represent obsolete and deleterious land uses due to the fact that they pose a nuisance as well as a blighting force on adjacent residences and they are incongruent with the current zoning ordinance and future development patterns, as envisioned by the City of Camden. In containing obsolete and deleterious land uses that threaten the safety, morals, health and welfare of the community, this block meet the conditions of criterion “d.” Additionally, this block meets criterion “e” due to the fact that it is an example of underutilization due to diverse ownership and other conditions such as the physical decline and general disinvestment evident in the Cramer Hill neighborhood. These

factors all result in a stagnancy or lack of development of this potentially useful and valuable land. This stagnancy and underutilization thus detracts from this block's ability to contribute to public health, safety and welfare. This block is an example of underutilization due to the fact that 16 of these lots, constituting 73% of the block, are either vacant lots or side yards. 15 vacant lots (18, 19, 21, 26, 27, 28, 29, 30, 32, 34, 35, 39, 40, 44, 46 and 49) have no productive use at all. The remaining side yard (Lot 46) is underutilized as it is undeveloped land located in an urban neighborhood. These lots could serve a much more productive and beneficial use for the community as infill residential or other development.

The block exhibits diverse ownership in that three different individuals and entities own the undeveloped lots therein. Additionally, a portion of the block is a known contaminated site which constitutes a particularly burdensome condition of title. It is further burdened by the conditions of economic disinvestment, physical deterioration and socioeconomic breakdown that exist in the surrounding community, as evidenced in blighted buildings and lands, high levels of poverty, low household incomes, high crime rates and low home ownership rates. These combine to inhibit private investment and result directly in a stagnancy of development and underutilization of the land and essentially the failure of this block to reach full potential as a productive site due to the conditions noted herein. As such, this block meets criterion "e." In sum, this block meets criteria "c," "d" and "e."

Block 891

Block 891 is located within the residential portion of the Cramer Hill neighborhood, near the western periphery, adjacent to the vacant lands of the Back Channel waterfront area. This block meets criterion "c" due to the fact that five lots (17, 18, 22, 23 and 25) contain publicly-owned vacant land and one lot (21) contains privately-owned land that has been vacant for at least 10 years, as verified through municipal tax records contained in the New Jersey Parcel Map software.. This block is located within a distressed urban neighborhood (evidenced by low property values, a low owner-occupancy rate, high vacancies, high crime, low household incomes and high poverty rates), limiting its possibility of development through the instrumentality of private capital, thereby meeting criterion "c."

Additionally, this block meets criterion "e" due to the fact that it is an example of underutilization, diverse ownership and stagnancy of potentially useful and valuable land that detracts from its ability to contribute to public health, safety and welfare. This block is an example not only of underutilization but a complete lack of utilization of the land, due to the fact that eight lots (15, 16, 17, 18, 21, 22, 23 and 25), or 72% of the block, are entirely vacant and have no productive use. The block exhibits diverse ownership in that four different individuals and entities own the undeveloped lots therein. This high vacancy rate is a clear indicator of underutilization, stagnancy of development and the failure of this lot to reach full potential as a productive residential, commercial or public use, thus meeting criterion "e." As part of a comprehensive redevelopment effort, this block can be reallocated to more

appropriate uses that better serve the public health, safety and welfare. In sum, this block meets criteria “c” and “e.”

Block 893

Block 893 contains 27 lots (3, 5, 6, 7, 8, 9, 12, 13, 14, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 31, 32, 33, 34 and 35) and is located within the residential portion of the Cramer Hill neighborhood, near the northwestern periphery, adjacent to the vacant lands of the Back Channel waterfront area. It contains 27 lots, 19 of which are undeveloped, 12 of which are vacant and owned by the City of Camden and eight of which are residential lots in fair and good condition. This block meets criterion “c” due to the fact that 12 lots (3, 5, 8, 9, 12, 14, 20, 21, 22, 23, 25 and 26) are publicly-owned vacant land that is located within a distressed urban neighborhood (evidenced by low property values, a low owner-occupancy rate, high vacancies, high crime, low household incomes and high poverty rates), limiting its possibility of development through the instrumentality of private capital. Finally, this block meets criterion “e” due to the fact that it is an example of underutilization due to diverse ownership and other conditions such as the physical decline and general disinvestment evident in the Cramer Hill neighborhood. These factors all result in a stagnancy or lack of development of this potentially useful and valuable land. This stagnancy and underutilization thus detracts from this block’s ability to contribute to public health, safety and welfare.

This block is an example not of underutilization of the land, due to the fact that 19 lots (3, 5, 6, 7, 8, 9, 12, 14, 20, 21, 22, 23, 24, 25, 26, 27, 28, 31 and 34), or 70% of the block, are either vacant lots or side yards. 12 vacant lots (3, 5, 8, 9, 12, 14, 20, 21, 22, 23, 25 and 26) have no productive use at all. The seven remaining side yards (6, 7, 24, 27, 28, 31 and 34) are underutilized as they are undeveloped land located in an urban neighborhood. These lots could serve a much more productive and beneficial use for the community as infill residential or other development.

The block exhibits diverse ownership in that seven different individuals and entities own the 19 undeveloped lots therein. It is further burdened by the conditions of economic disinvestment, physical deterioration and socioeconomic breakdown that exist in the surrounding community, as evidenced in blighted buildings and lands, high levels of poverty, low household incomes, high crime rates and low home ownership rates. These combine to inhibit private investment and result directly in a stagnancy of development and underutilization of the land. Due to its location within a residential neighborhood, this block holds a valuable potential for residential or public uses. Its vacancy in light of these factors is a clear indicator of underutilization, stagnancy of development and the failure of this block to reach full potential as a productive site due to the conditions noted herein. As such, this block meets criterion “e.” In sum, this block meets criteria “c,” “d” and “e.”

Block 896

Block 896 contains 25 lots (1, 2, 3, 4, 5, 6, 8, 9, 11, 12, 13, 14, 25, 26, 27, 30, 32, 33, 36, 39, 40, 43, 44, 49 and 50) and is located within the residential portion of the Cramer Hill neighborhood, along the northwestern periphery, adjacent to the vacant lots of the Back Channel waterfront area. The block contains 18 undeveloped lots and seven residential lots. This block meets criterion “a” due to the fact that one lot (Lot 12) contains a residential structure in poor, substandard, dilapidated condition. This block meets criterion “c” due to the fact that 16 lots (1, 2, 3, 4, 5, 6, 8, 9, 13, 25, 26, 27, 30, 32, 40 and 49) are publicly-owned vacant land. These lots are located within a distressed urban neighborhood (evidenced by low property values, a low owner-occupancy rate, high vacancies, high crime, low household incomes and high poverty rates), limiting its possibility of development through the instrumentality of private capital.

Additionally, this block meets criterion “e” due to the fact that it is an example of underutilization, diverse ownership and stagnancy of potentially useful and valuable land that detracts from its ability to contribute to public health, safety and welfare. This block is an example, not only of underutilization but a complete lack of utilization of the land on the 16 lots, or 64% of the lots on the block, that are entirely vacant and serve no productive use. Additionally, two side yards (Lots 44 and 50) are underutilized in that they are undeveloped properties in an urban neighborhood. The block exhibits diverse ownership in that three different individuals and entities own the undeveloped lots therein. This high vacancy rate is a clear indicator of underutilization, stagnancy of development and the failure of this lot to reach full

potential as a productive residential, commercial or public use, thus meeting criterion “e.” As part of a comprehensive redevelopment effort, this block can be reallocated to more appropriate uses that better serve the public health, safety and welfare. In sum, this block meets criteria “a,” “c” and “e.”

Block 898

Block 898 contains 11 lots (2, 3, 4, 5, 6, 7, 8, 9, 10, 11 and 12) and is located within the residential portion of the Cramer Hill neighborhood, along the northwestern periphery, adjacent to the vacant lots of the Back Channel waterfront area. The block contains eight vacant lots and three residential lots. This block meets criterion “a” due to the fact that one lot (Lot 11) contains a residential structure in poor, substandard, dilapidated condition. This block meets criterion “c” due to the fact that 7 lots (3, 4, 5, 6, 7, 10 and 12) are publicly-owned vacant land and one lot (8) is privately-owned land that has been vacant for more than 10 years, as verified through municipal tax records contained in the New Jersey Parcel Map software.. These lots are located within a distressed urban neighborhood (evidenced by low property values, a low owner-occupancy rate, high vacancies, high crime, low household incomes and high poverty rates), limiting its possibility of development through the instrumentality of private capital.

In sum, this block meets criteria “a” and “c.”

Block 968

Block 968 contains 9 lots (2, 3, 4, 5, 6, 15, 16, 17 and 18) and is located within the residential portion of the Cramer Hill neighborhood, along the eastern periphery, within the residential neighborhood and adjacent to the Von Neida Park. The block contains five vacant lots, three industrial use lots and one residential lot. This block meets criterion “c” due to the fact that one lot (Lot 18) contains publicly-owned vacant land that is located within a distressed urban neighborhood (evidenced by low property values, a low owner-occupancy rate, high vacancies, high crime, low household incomes and high poverty rates), limiting its possibility of development through the instrumentality of private capital. This block meets criterion “d” due to the fact that it contains obsolete and deleterious land uses. The industrial uses on this block (Lots 5, 15 and 16) are in extremely close proximity to residential development, which is located within the same block and adjacent blocks. This use constitutes an obsolete and deleterious land use approach in that industrial facilities can create noise, truck traffic, pollution, noxious smells and other nuisances that significantly reduce the quality of life for nearby residents. Furthermore, it is apparent that industrial uses represent a detrimental force in the Cramer Hill neighborhood, as all of the most blighted residential blocks are located at the periphery of the neighborhood, adjacent to industrial areas.

Finally, the industrial uses on the block are incongruent with the current zoning, which is R-1-A Residential as well as the future Land Use Plan established by the City of Camden, which designates this block as Residential. In total, these industrial uses located on this block represent obsolete and deleterious land uses due to the

fact that they pose a nuisance as well as a blighting force on adjacent residences and they are incongruent with the current zoning ordinance and future development patterns, as envisioned by the City of Camden. In containing obsolete and deleterious land uses that threaten the safety, morals, health and welfare of the community, this block meets the conditions of criterion “d.” Finally, this block meets criterion “e” due to the fact that it is an example of underutilization due to diverse ownership and other conditions such as the physical decline and general disinvestment evident in the Cramer Hill neighborhood. These factors all result in a stagnancy or lack of development of this potentially useful and valuable land. This stagnancy and underutilization thus detracts from this block’s ability to contribute to public health, safety and welfare.

This block is an example, not only of underutilization but a complete lack of utilization of the land on the five lots (2, 3, 4, 6 and 18) that are entirely vacant. The block exhibits diverse ownership in that three different individuals and entities own the vacant lots therein. It is further burdened by the conditions of economic disinvestment, physical deterioration and socioeconomic breakdown that exist in the surrounding community, as evidenced in blighted buildings and lands, high levels of poverty, low household incomes, high crime rates and low home ownership rates. These combine to inhibit private investment and result directly in a stagnancy of development and underutilization of the land. Its vacancy is a clear indicator of underutilization, stagnancy of development and the failure of this block to reach full potential as a productive site due to the conditions noted herein. As such, this block meets criterion “e.” In sum, this block meets criteria “c,” “d” and “e.”

VI. CONCLUSION

As is indicated by the above analysis, 38 blocks of the Cramer Hill Study Area qualify as an Area in Need of Redevelopment pursuant to the “Local Redevelopment and Housing Law” (NJSA 40A:12A-1 *et.seq.*). There blocks, according to a lot-by-lot survey and analysis, contain seventy percent (70%) or more lots meeting the conditions of one or more of the redevelopment criteria of subsections a, b, c, d and e. The prevalence and distribution of vacant land, abandoned lots and dilapidated land uses on these blocks evidenced their need for comprehensive mechanism for redevelopment.

The remaining 125 blocks are recommended as in Area in Need of Rehabilitation, meeting the rehabilitation criteria of NJSA 40A:12A-14, subsection “a”, which states that areas wherein there is a general degradation of buildings, the housing stock or sewage system is at least 50 years old and where “a program of rehabilitation, as defined in Section 3 of P.L. 1992, c. 79 (C.40A:12A-3), may be expected to prevent further deterioration and promote the overall development of the community,” qualify as in need of rehabilitation.

Cramer Hill has proven to be one of the most resilient neighborhoods in the City of Camden, with a more stable population and less abandoned homes and vacant lots than many other neighborhoods of the City. The River Road / River Avenue commercial corridor, vacant and mainly undeveloped waterfront lands and substantial open space all serve as excellent assets for the revitalization of the

Cramer Hill neighborhood. Despite these positive features, the neighborhood contains a relatively high number of vacant lots, dilapidated homes and obsolete industrial uses. The identification of 38 blocks in particularly poor condition in this neighborhood for designation as an Area in Need of Redevelopment and the designation of the remaining 125 blocks as an Area in Need of Rehabilitation is the key step towards ensuring that any blighting forces within the community can be halted and the neighborhood be revitalized as a whole.

Therefore, it is recommended that the thirty-eight (38) blocks in the aforementioned Study Area and designated on Map 8 be determined as an “AREA IN NEED OF REDEVELOPMENT”; as they qualify for such a determination under subsections a, b, c, d, e and g of NJSA 40A:12A-5. It is recommended that the remaining 125 blocks in the Study Area, designated on Map 8 as rehabilitation blocks, be determined as an “AREA IN NEED OF REHABILITATION”; as they qualify for such a determination under section “a”, subsections 1, 2 and 3 of NJSA 40A-1.

VII. NEIGHBORHOOD DISINVESTMENT and COMMUNITY DISTRESS INDICATORS

In addition to the physical characteristics and conditions observed through the field survey and described in the above sections of this report, there are several accompanying indicators of neighborhood (property) disinvestment and community (socio-economic) distress. These indicators for Cramer Hill (U.S. census tracts #6009, 6010) become evident through a review of data provided by the U.S Census Bureau, as well as municipal departments that record housing and building code enforcement, public safety and property values (assessments and taxes). This information, supplemental to that considered in making a determination as to the need for redevelopment, is given below.

A. Population, Age and Income

During a 20 years' period, Cramer Hill gained 6% in population, contrasted with Camden's population decline of 6%; the biggest increase occurring from 1990-2000.

Census Year	Cramer Hill	Camden
1980	9,446 (10.3%)	84,910
1990	10,107 (11.6%)	87,492
2000	10,035 (4.6%) *	79,904

Significant in this general picture of population, was the dwindling numbers of seniors (65 years+) with a nearly 17% reduction in Cramer Hill and 42.5% for Camden, presently accounting for slightly more than 5% and 7% of their populations

respectively. Population numbers for those 19 years old and younger grew 6.7% for Cramer Hill; but fell 20.5% for Camden, resulting in 40% and nearly 35% of their respective general populations.

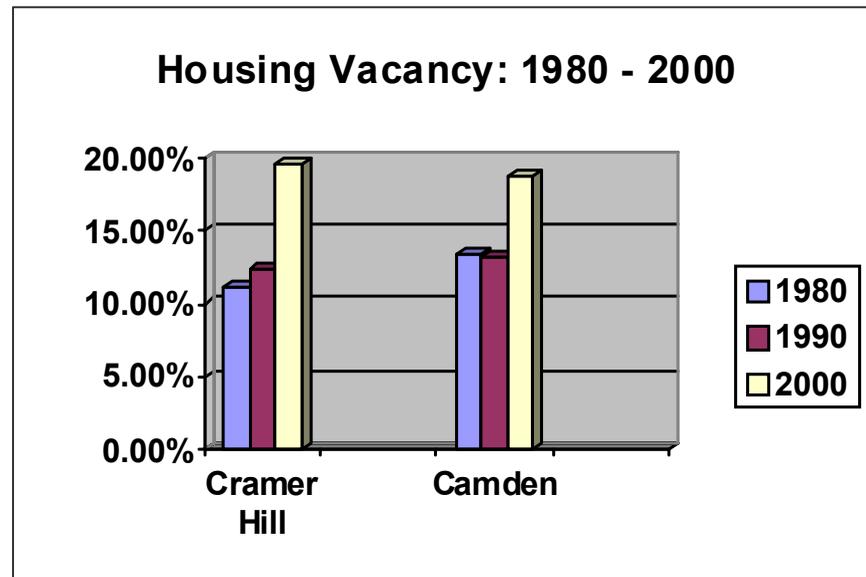

Regarding Median Household Incomes, in Cramer Hill MHI more than doubled over 20 years, while it nearly doubled for Camden overall; more dramatically, these income increases closed – if not reversed -- the gap between Cramer Hill and Camden MHIs from Cramer Hill's income being 88% of Camden's (1980) to 106% of Camden's (2000). Correspondingly, poverty levels have dropped nearly 20% for Cramer Hill and 1.4% for Camden, over this 20 years' period, resulting in Cramer Hill having approximately 5% less in poverty than Camden by the year 2000.

Census Year	Cramer Hill		Camden	
	MHI	% Poverty	MHI	% Poverty
1980	\$10,312	38.3	11,756	36.9%
1990	\$17,660	46.9	22,650	36.6
2000	\$24,934	30.7	\$23,421	35.5

B. Property Vacancy and Occupancy

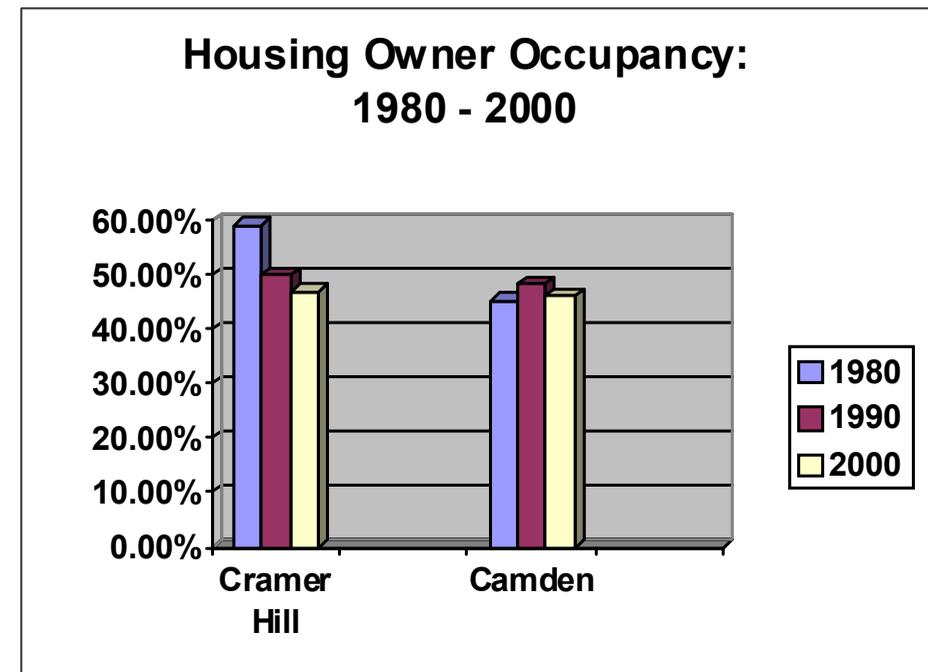

During the past 20 years, the number of housing units declined for Cramer Hill (-6%) and Camden overall (-8.6%), closing the gap between Cramer Hill and Camden: 10.5% (1980) to 10.8% (2000). Conversely, the percentage of housing vacancy increased for both during the same 20 years period, from 11.2% and 13.4% (1980) to 19.6% and 18.8% (2000) for Cramer Hill and Camden respectively, making the change in the relative amount of Cramer Hill's vacants as a portion of Camden's vacants from 8.1% to 5.5%.

Census Year	Cramer Hill		Camden	
	Total Hsg	Vacants	Total Hsg	Vacants
1980	3,422	355 (11.2%)	32,573	4,352 (13.4%)
1990	3,263	266 (12.3%)	26,526	3,512 (13.2%)
2000	3,220	307 (19.6%)	29,769	5,592 (18.8%)

Census Year	Cramer Hill			Camden		
	Total Occ Housing	Owner Occupied	% O-O	Total Occ Housing	Owner Occup	% O-O
1980	3,067	1,816	59.2	33,573	15,171	45.2
1990	2,997	1,501	50.0	26,626	12,885	48.4
2000	2,913	1,365	46.8	24,177	11,141	46.1

Regarding owner occupancy of existing housing, this rate has steadily decreased during 1980-2000 for Cramer Hill (59.2% - 46.8%), but remained virtually unchanged for Camden (45.2%-46.1%) – resulting in less than half of all occupied housing being owner-occupied.

C. Substandard Housing and Crowding

According to the 1980 – 2000 U.S. census data, there has been an increase in the amount of substandard housing (i.e. lacking complete plumbing and kitchen facilities) for Cramer Hill and Camden overall, +30.6% and +15.9% respectively. Regarding housing density, the number of persons per unit has increased slightly, from roughly two-and-a-half to 3 and 4 persons for Camden and Cramer Hill respectively.

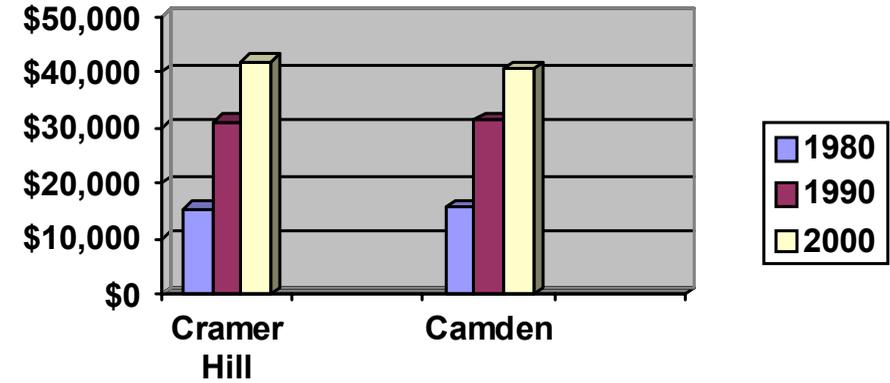

Census Year	Cramer Hill		Camden	
	Substandard	P/Unit	Substandard	P/Unit
1980	49	2.74	895	2.51
1990	133	3.40	1,107	3.15
2000	64	3.94	1,037	3.12

D. Property Values and Tax Delinquency

According to the 1980 – 2000 U.S. census data, Median House Value and Median Contract Rent have substantially increased over this 20 years' period with MHV at +172% and 159% and MCR at +164% and 191% for Cramer Hill and Camden respectively, slightly reversing the position of prosperity between Cramer's MHV (98% of the city's – 1980, up to 103% -- 2000) and Camden's overall.

Census Year	Cramer Hill		Camden	
	MHV	MCR	MHV	MCR
1980	\$15,400	\$156	\$15,700	\$152
1990	\$31,200	\$288	\$31,300	\$323
2000	\$42,000	\$412	\$40,700	\$440

Median House Value: 1980 - 2000

Regarding real estate tax delinquency, 315 parcels (8%) in Cramer Hill accounted for \$11,546,017 in tax liens in 2008. Although this massive amount of property disinvestment in Cramer Hill, as reflected by tax delinquency, would suggest a corresponding erosion of property values, it is difficult to definitively make this case in Camden, where properties have been historically under-valued as compared to values in the surrounding region.

E. Public Safety

A review of recent crime data for Cramer Hill, as reported to and recorded by the Camden Police Department reveals that crimes against property (909) are slightly more than three times as frequent than those against people (228). Person-related crimes, mostly robbery and assault, occur on 4 east-west streets: Pierce, River, Hayes and Wayne; whereas property crimes, e.g. burglary, auto theft, vandalism, arson, drug dealing, etc. occur mostly on 12 north-south streets: 19th, 22nd, 27th, Bergen, 30th, 32nd, 36th, etc. Violent crimes against people, as well as violent crimes against property mostly occur on (5) east-west streets: Harrison, River, Wayne, Pierce and Hayes.

Drug sale, manufacture possession: Cocaine, Heroin, Marijuana	106	River, Wayne, Hayes, 19th, 27th, 32nd, 34th, Ablett Village
Total	909	

F. Correlations To Redevelopment Criteria:

Although there are no direct correlations between the demographic and crime data discussed above and New Jersey's criteria used to determine whether an area is in need of redevelopment, the following inferences and connections between socio-economic and land use conditions are suggested for several applicable redevelopment need criteria:

The generality of buildings are substandard, unsafe, unsanitary, dilapidated, or obsolescent, etc. as to be conducive to unwholesome living or working conditions. Although U.S. census data point to an increasing amount of substandard building conditions for Cramer Hill, these observations apply only to housing. Redevelopment need criteria only address non-residential conditions and characteristics, i.e. commercial and industrial buildings and vacant land. There is no data available, census or otherwise, that has comprehensively assessed these conditions and characteristics for commercial and/or industrial properties, occupied or vacant, and their impacts on the living conditions of adjacent housing.

Discontinuance of buildings previously used for commercial, manufacturing, or industrial purposes; the abandonment of such buildings or being in so great a state of disrepair as to be untenable. Again, in contrast to the building abandonment and conditions surveys done for this redevelopment study, census data is silent on this matter as it applies to commercial and industrial properties..

Areas with buildings or improvements which, by reason of dilapidation, obsolescence, overcrowding, faulty arrangement or design, lack of ventilation, light and sanitary facilities, excessive land coverage, deleterious land use or obsolete layout, or any combination of these or other factors, are detrimental to the safety, health, morals, or welfare of the community. As might be expected, crime data for Cramer Hill indicates that most crimes against persons (murder, assault, robbery) occur on streets that are well populated or traveled, whereas most crimes against property occur on streets less populated or traveled. A common characteristic for streets with concentrations of crime, particularly robbery, assault and drug dealing, is a correspondingly noticeable amount of vacant buildings and land.

In conclusion it must be said that although there are no demographic data that directly make the case for redevelopment in Cramer Hill, as per New Jersey's Local Housing and Redevelopment Law, clearly a slightly dwindling population, growing property abandonment, increasing property values flanked by substantial property tax delinquency, and notoriously significant personal and property crimes concentrated on blocks showing signs of such property disinvestments, indicate that such evidence of socio-economic distress exacerbates and underscores the need for a substantial and comprehensive public-private intervention for neighborhood revitalization, i.e. redevelopment.

APPENDIX A: CITY COUNCIL AUTHORIZING RESOLUTION

R-18

MAR:dh
09-11-07

RESOLUTION RE-AUTHORIZING THE PLANNING BOARD AND THE DIVISION OF PLANNING OF THE CITY OF CAMDEN TO CONDUCT AN INVESTIGATION AND PREPARE AN AREA IN NEED OF REDEVELOPMENT STUDY AND A REDEVELOPMENT PLAN FOR THE CRAMER HILL NEIGHBORHOOD (CENSUS TRACT 6009 AND 6010)

WHEREAS, N.J.S.A. 40A:12A-1, et seq., authorizes the governing body of any municipality, by resolution to have its Planning Board conduct a determination of need study for any areas of the municipality for the purpose of developing a redevelopment plan; and

WHEREAS, the City Council of the City of Camden considers it to be in the best interest of the City to have its Planning Board conduct such an investigation and study for the purpose of developing a redevelopment plan for the Cramer Hill Neighborhood Area; and

WHEREAS, the proposed areas to be studied in the Cramer Hill Neighborhood Area is a diverse development opportunities through potential acquisitions of property in certain select development areas within census tract 6009 and 6010; and

WHEREAS, the present land uses within the subject areas indicated an under utilization of valuable property that would better serve the City of Camden if it were redeveloped; now, therefore

BE IT RESOLVED, by the City Council of the City of Camden that the Planning Board of the City of Camden is requested to conduct a Determination of Need Study for the purpose of developing a Redevelopment Plan for the Cramer Hill Neighborhood Area; and

BE IT FURTHER RESOLVED that the staff of the Planning Department, the Camden Redevelopment Agency and other appropriate City agencies, and their consultants assist the Planning Board in conducting said study and developing a Redevelopment Plan for the aforesaid areas of the City; and

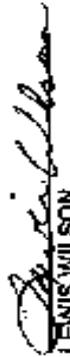

BE IT FURTHER RESOLVED that said Determination of Need Study and Redevelopment Plan shall be submitted to the governing body for their review and approval in accordance with the provisions of N.J.S.A. 40A:12A-1, et seq.

BE IT FURTHER RESOLVED that pursuant to N.J.S.A. 62:27BBB-23, a true copy of this resolution shall be forwarded to the Chief Operating Officer, who shall have ten days from the receipt thereof to approve or veto this resolution. Notice of approval or veto shall be filed in the office of the Municipal Clerk.

On Motion Of: GILBERT "WIP" WILSON

Dated: September 11, 2007

The above has been reviewed and approved as to form.

APPENDIX C: STUDY TEAM RESUMES

EDWARD V. KOLLING, PP, AICP, CLA
DIRECTOR OF PLANNING SERVICES

FIELDS OF SPECIALIZATION

Land Use and Redevelopment Planning
Smart Growth & Transit Oriented Development
Brownfield Redevelopment
Urban Design, Concept Plans & Landscape Architecture
Variance Reports
Expert Testimony

PROFESSIONAL CREDENTIALS

B.S. (Land Management & Planning/Landscape Architecture (Rutgers University), 1974
Licensed Professional Planner - State of New Jersey, 1984
Licensed Landscape Architect - State of New Jersey, 1985
Member - American Institute of Certified Planners
Member - American Society of Landscape Architects
Member - American Planning Association
Member - New Jersey Planning Officials

PROFESSIONAL EXPERIENCE

Mr. Kolling is a principal with the firm of Dresdner Robin, and the Director for Planning Services. Throughout his career, Mr. Kolling has demonstrated extensive skill and experience as a planner and design professional. He has excellent management and organizational skills as evidenced by the positions of responsibility he has held in both the public and private sectors. His experience includes project coordination; preparation of redevelopment plans, grant applications and development applications; testimony and presentations to Planning Boards and Boards of Adjustment throughout the State; design of parks, plazas and streetscapes; site plan review; development of land use regulations; and studies and site plans for both large and small site specific developments. Mr. Kolling also has extensive and varied experience in the fields of Community and Urban Planning.

His public sector experience includes the position of Executive Director of the Elizabeth Development Company, a non-profit economic development corporation. In addition to managing this corporation of 24 employees with a budget of over three million dollars, Mr. Kolling was responsible for planning and implementation of economic development and redevelopment projects in the City of Elizabeth; administration of the Urban Enterprise Zone Program, and numerous business assistance programs. Earlier, Mr. Kolling was Executive Director of the Jersey City Economic Development Corporation. In this position he carried out many of these same responsibilities for the City of Jersey City. In each position, he was the primary contact for members of the business community, acting as the chief liaison between the public and private sectors.

Prior to this, Mr. Kolling was Director of Jersey City's planning division. He supervised a staff of 20 and was the City's chief liaison to the Planning Board and Board of Adjustment. He was responsible for the preparation and/or amendment of literally dozens of redevelopment plans; a new Master Plan Land Use Element, and a comprehensive review of the City's Master Plan. He was also involved in the City's coordination of various projects with State agencies related to waterfront development, park development and historic preservation.

In the private sector, Mr. Kolling served as Vice-President for Planning and Landscape Architecture with the Fellows Read Organization; a large multi-disciplinary firm of Engineers, Architects, Planners, and Environmental Scientists. In this position, Mr. Kolling worked on a wide variety of projects ranging from preparing Master Plan Reviews and Zoning Ordinance Amendments to the preparation of Fiscal Impact Analysis and Variance Reports to the preparation of Master Development Plans for large scale Planned Unit Developments. He was later a Principal in the firm Planning Solutions. The firm specialized in community and urban planning issues including; Land Use and Zoning, Blight Studies and Redevelopment Planning.

Currently, Mr. Koiling specializes in the areas of Urban & Community Planning, Economic Development and Redevelopment. He has provided expert testimony for private clients, not-for-profit organizations and community based groups before Planning Boards and Boards of Adjustment throughout the State of New Jersey. He has prepared area in need of redevelopment studies and redevelopment plans in larger cities such as Jersey City, Passaic, Newark, Elizabeth and Union City; as well as smaller municipalities such as Bayonne, Asbury Park and Roselle. He also serves as an economic development consultant to the non-profit Elizabeth Development Company in the City of Elizabeth.

KEY PROJECTS

Professional Planner, The Grove Street II Redevelopment Plan, which has resulted in the construction of a high-density, high-rise, mixed-use building, currently under construction at the Grove Street PATH Station;

Professional Planner, Columbus Towers project, involving amendments to the Exchange Place North Redevelopment Plan, which has resulted in the construction of a high-density, high-rise, mixed-use residential commercial building, currently under construction at the Grove Street PATH Station and a new entrance to the PATH Station at Marin Boulevard;

Professional Planner, An amendment to the Journal Square Redevelopment Plan to permit the construction of a high-rise, primarily residential mixed-use building at the former site of the State Theater on Kennedy Boulevard within a short walk of the Journal Square Transportation Center and PATH Station;

Professional Planner, Amendments to the Liberty Harbor North Redevelopment Plan, as a part of the New Urbanism Plan prepared by Duany Plater-Zyberk and Company, which envisions the creation of entire mixed-use neighborhood of primarily mid-rise and high-rise structures, located just north of Liberty State Park on the Tidewater Basin and serviced by two light rail stations.

Professional Planner, Amendments to the Colgate Redevelopment Plan, which were crafted to permit the construction of the Goldman Sachs Building and the recently approved K. Hovnanian project at 77 Hudson Street. The Colgate Redevelopment Area is serviced by two Light Rail Stations, the Exchange Place PATH Station and numerous bus lines.;

Professional Planner, Preparation of the MGM Redevelopment Plan, a redevelopment plan intended to spur the redevelopment of a two block section of Downtown Jersey City by permitting the construction of high-rise, primarily residential, mixed-use structures along Marin Boulevard just two blocks north of the Path Station.

Professional Planner, Preparation of a new redevelopment plan for the Midtown Section of the City of Elizabeth. The plan permits the construction of new mixed-use, mid & high rise structures within walking distance of the Broad Street N.J. Transit Rail Station. The plan requires improvements to the pedestrian circulation system to provide better linkages to the Train Station and encourage mass transit usage.

LAWRENCE SMITH, P.P.

PLANNER/GIS SPECIALIST

FIELDS OF SPECIALIZATION

- National Environmental Policy Act (NEPA) Documentation
- Geographic Information Systems
- Environmental Impact Statements
- Categorical Exclusion Document (CED)
- Environmental Assessment
- Regulatory Permitting (wetlands, USACE, Waterfront Development Permits and CAFRA)
- Preliminary Assessment Including File Reviews

QUALIFICATIONS

Professional Planner in New Jersey License #5859
M.E.P. (Environmental Planning), Arizona State University, 2003
B.A. (Environmental Studies), Binghamton University, 1995

PROJECT EXPERIENCE

Mr. Smith has over 8 years experience with NEPA documentation including Environmental Impact Statements (EIS), Environmental Assessment (EA), and Categorical Exclusion Documents (CED). Additionally, Mr. Smith has conducted file reviews, preliminary assessments and public participation programs and worked on numerous regulatory permits including the Waterfront Development Permit for a residential property in Jersey City. He has conducted land use surveys, socioeconomic impacts analyses including environmental justice concerns for various projects including, the I-295/I-76/ Route 42 Direct Connection EIS, City of Passaic, the Portway Project in Hudson and Essex County, the Waterfront Access Improvement project in Jersey City, Route 27 and Wood Avenue EA Intersection Improvement Project in Edison and Woodbridge, New Jersey and University Heights Connector for NJDOT in Newark, New Jersey. In addition, Mr. Smith is proficient in the use of ArcView GIS and Spatial Analyst software and currently runs and maintains Dresdner Robin's GIS system. GIS applications performed by Dresdner Robin include environmental impact assessments for major transportation projects including I-295/I-76/Rte. 42, Rte. 173 and the Portway Corridor.

KEY PROJECTS

Environmental Planner, Currently managing the regulatory permitting requirement for a recycling facility in Old Bldg, New Jersey which included addressing a NJDEP Notice of Violation. In order to address this violation, an extensive wetland delineation effort was undertaken.

Environmental Planner, Managed the development of the Socioeconomic/Land Use/ Environmental Justice Technical Environmental Study as well as the Ecological Technical Environmental Study for the I-295/I-76/ Route 42 Direct Connection Study. An extensive community impact analysis was conducted as part of the TES development. Mr. Smith participated in an environmental screening process of five alternatives which were then approved for further analysis. Additionally, a GIS impact analysis for five roadway design alternatives pertaining to Right-of-Way acquisitions, wetland impacts and floodplain impacts was conducted.

Environmental Planner, Managed the development and submission of the I-295/I-76/ Route 42 Wetland Delineation Letter of Interpretation (LOI) submission to NJDEP. The delineation included approximately forty-five acres of tidal and non-tidal wetlands. NJDEP as well as United States Army Corps. Of Engineers concurred with Dresdner Robin's wetland delineation and subsequent LOI submission.

Environmental Planner, Submission of a Waterfront Development Permit for a proposed residential development in Jersey City along Mill Creek. Permit was subsequently approved by NJDEP.

Environmental Planner/GIS Specialist, Managed and created a GIS for the Environmental Assessment (EA) for the NJDOT Route 27 and Wood Avenue Intersection Improvement Project. Socioeconomic, hazardous waste, land use, and ecological information were incorporated into the GIS to determine, if any, significant impacts regarding the improvement of this intersection. Developed the Socioeconomic, and Hazardous Waste Technical Environmental Studies. Coordinated the Ecological Technical Environmental Study which subsequently was developed into the NEPA Environmental Assessment for this project. Prepared figures and presented findings in public meetings.

Environmental Planner/GIS Specialist, Worked on the Socioeconomic, Land Use and Environmental Justice Environmental Assessment for University Heights in Newark, New Jersey.

Environmental Planner, Conducted three Preliminary Assessments for Union City Redevelopment Agency. These Preliminary Assessments were conducted for the redevelopment of four properties, including Roosevelt Stadium, three additional lots and the street between them. Ultimately, these properties are going to be the New Emerson High School in Union City. Conducted the Environmental Screening Report (ESR) and Executive Order 21.5 EIS for the construction of the New Emerson High School.

Environmental Planner, Conducted the Socioeconomic, Land Use, Environmental Justice component of a CED for the Route 166 and Route 37 Intersection Improvement Project in Toms River, New Jersey. Included in this analysis was an extensive environmental justice analysis.

Environmental Planner, Conducted the Socioeconomic, Land Use, Environmental Justice, air, noise, and ecology component of a CED for the replacement of the Park Avenue Bridge in Long Branch, New Jersey.

Environmental Planner, Worked on Hazardous Waste Screening Technical Environmental Study as part of an Environmental Assessment for the NJDOT Portway project located in Jersey City, New Jersey (2004). The screening included database searches and historical map interpretation for hundreds of properties.

Environmental Planner/GIS Specialist Managed and created a GIS for a waterfront brownfield redevelopment area in City of Passaic, New Jersey. Included in this database was tax information for thirty five properties within the project area as well as environmental information compiled by database resources (EDR as well as DR databases) to determine development potential for each parcel. Additionally, information compiled for this GIS was transferred and used in the development of detailed engineering drawings outlining present utilities. Conducted a Phase 1 Environmental Site Assessment for thirty-five properties, which included a railroad. Assisted on the report to designate the redevelopment area. Prepared figures and presented findings in public meetings.

Enforcement Actions Issued at Site ID: 35402 Between 11/2/2000 and 2/2/2009

Thu Apr 03:02:2009 1:42 PM

NOTE: The information contained in this report will be limited to the date each program began using the Department's integrated database, NEMIS. The programs began using the system for this information as follows: Air - 10/1998; Hazardous Waste - 1/2000; Water - 7/2000; Right To Know - 11/2000; TCPA - 12/2001; Land Use 12/2001; DPCC - 1/2002; Solid Waste - 1/2002 and Pesticides - 4/2002; Site Remediation - 3/2003 and Radiation (limited information) - 7/2006. For complete information prior to these dates, please submit an official OPRA request form to the Department. If printing this report, select landscape orientation. For a list of terms and definitions, click on the following link: <http://www.state.nj.us/dep/infocview/enforcement.html>

Disclaimer: All listed enforcement actions address alleged violations based on facts and information known to the Department at the time the violation information was determined. Errors or omissions in the factual basis for any violation may result in a future change in classification as a violation when such information becomes known. Persons cited for violations may contest the Department's enforcement action or penalty assessment. The resultant final decision may uphold, negate or modify the original violation findings or penalty.
